◯ Electro-Galvanised & Powder Coated (£130.00)

1 Add to basket

Description Free Delivery More Information

Description

-
- Electro-Galvanised & Powder Coated – provides added rust resistance.

Specifications

- Solid Steel construction.
- Frames 25mm x 10mm.
- Infill bars 12mm diameter.
- The width measurement refers to the actual opening (between posts, walls or brickwork) not the fence width.

Fittings supplied with this fence

- A pack of screw-on/bolt-on fittings to fix to existing timber or brickwork.

A note on choosing posts

- Suitable posts for this fence are shown below under 'Recommended Accessories'.
- If you wish to mount the fence on steel posts, please allow for the width of the posts. For example; a fence fitting a 72-inch opening with two 3-inch posts will fill a 78-inch gap.

An **installation service** is available for the North Hertfordshire area.

Most gates, fences and railings are available ex-stock for 7-10 days UK mainland delivery.

Please note: Due to exceptional demand, delivery may currently take up to 30 days. **Dismiss**

If you would like this fence made to measure please **contact us** with your requirements, including the size and quantity you require, and we will get back to you with a price.
