*To whom it may concern,*

*We have undertaken the conversion of the former Waggon & Horses Public House on behalf of SJA Rochdale Limited.*

*In accordance with the Phase 1 : Preliminary Risk Assessment prepared by the LK Group we have undertaken a contamination watching brief throughout the development project. Personnel working on site were advised that if any potential source of contamination was identified on site that works in that area should stop and be reported to the site manager. The site manager would then liaise with the client and LK Group would be contacted to allow for specialist advice to be provided regarding next steps.*

*Given the nature of the proposed scheme which involved the conversion of an existing building, with no ground works, no potential contamination was identified on site at any point during the conversion scheme.*

*I trust that this letter is of assistance.*

*Yours sincerely*

*Phill Hampshire*
*Director – Nine Point Eight Construction*
