Mini Tree Report Date: 27th September 2018

Gloria Johns
27 Dellside way
Rochdale

As requested please see my mini tree report, as previously mentioned this offers no guarantees as trees are living organisms and can fail at any time. We would also like to point out no indemnity or insurance cover is offered. This report is in "my opinion" only and covers only the trees that have been inspected.

Trees in question

There are 3 Oak trees on land to the rear of 27 Dellside way T1 T2 T3. They are very close to the boundary fence. They are a nuisance to the resident as the lower branches are now coming over the boundary fence and as the trees are getting taller and denser, less and less light is coming through to the garden.

Due to the tree being on the western boundary this is blocking sun for the majority of the afternoon and evening, this is compounded by the tree's position so close to and over the fence line and the fact that there is only about 15% light penetration through the crown.

Rather than damage the tree with a crown reduction, we recommend a crown lift and crown thin. This will allow light through the tree and keep the tree in a healthy condition.
Should you have any queries please do not hesitate to contact me.

Regards

C.Ashton
