Tree Survey – Land off Todmorden Road, Littleborough, OL15 9EZ.

Tree Number	Species	Height (m)	DBH (mm)	Crown Spread (m)	Life Stage	General observations	SULE	Retention Category
T1	Sycamore	12	400	7	EM	A one-sided tree with historical pruning wounds, main stem breaks at 1.2m and is covered in ivy up 4m making further inspection difficult.	30+	C
T2	Sycamore	12	400	4	EM	A poor supressed specimen	30+	C
T3	Sycamore	12	300	5	EM	A poor supressed specimen	10+	U
T4	Sycamore	12	300	4	EM	A poor supressed specimen	30+	C
T5	Sycamore	11	250	3	EM	A poor supressed specimen	30+	C
T6	Sycamore	6	150	2	SM	A poor supressed specimen	10+	U
T7	Sycamore	11	250	3	EM	A poor supressed specimen	30+	C
T8	Sycamore	11	250	4	EM	A poor supressed specimen	30+	C
T9	Sycamore	12	350	5	EM	A one-sided specimen.	30+	C
T10	Group 1					A group of approximately 30 trees all sycamore and including trees 1-9 as detailed above. A group with no real trees of individual merit, but with some merit as a group. The trees have previously been largely unmanaged and as such have all grown tall and drawn with poor height to diameter ratios. Trees 1-9 are separately recorded only because they are the only trees that could be potentially impacted by the planning proposal, none of the other trees can be affected by either completed works or proposed works.
