1	Areas of Brickwork Infill	2
2	Areas of Stonework Reconstruction	4
3	Gable Reconstruction	9

1 Areas of Brickwork Infill

2no. existing openings to the rear Elevation of Barehill street (facing on to the parking courtyard) were built up with new facing brick to match the existing brickwork.

The chosen brick used in these infill areas was selected to match the existing brickwork in size, colour & texture. The following photos show the new brickwork toothed into the existing walls.

2 Areas of Stonework Reconstruction

The new door opening to Leah Street was to be formed by re-using stone salvaged when forming the opening, as well as a matching reclaimed stone as required.

The following photos show the stone being used to form the jambs, tooled to match the existing stonework. Additionally, a small area of stone has been filled in above the opening (seen on the first photograph) where an existing vent has been removed.

3 Gable Reconstruction

The gable to Leah Street was reconstructed using stone salvaged during the taking-down of the original gable as well as matching reclaimed stone as required.

The following photos show the gable as reconstructed.
