

LEGEND

- EXISTING VEGETATION**
Refer to tree survey for details on species and condition
- ROOT PROTECTION AREA**
Refer to tree survey for further information
- TREES TO BE REMOVED**
Refer to tree survey for further information
- PROPOSED TREES**
Native tree species along the boundaries and within the site, to infill gaps, soften the built form and create an attractive setting and introduce new habitats to the site. Species will reflect local characters and include species such as Betula pendula, Acer campestre.
- SHRUB PLANTING**
Swathes of native and ornamental grasses and shrubs including pollinators to increase ecological value within the Site and support existing habitats and create new ones, extending and connecting wildlife corridors.
- NATIVE WHIP / SCRUB PLANTING**
Boundaries and gaps in vegetation to be infilled with native whip planting.
- WILDFLOWER OVERSEEDING**
Existing grassland to be retained and overseeded with a wildflower mix to increase its ecological value and biodiversity levels.
- MIXED NATIVE HEDGEROW**
A mixed native hedgerow to be introduced along the boundaries.
- SPECIES RICH LAWN**
