

NOTE:
All proposed routes are shown indicatively, along with the location of the existing private gully, the exact position of which must be verified on site by the contractor.
Where connections are made from the gully to the ACO Drain, it is recommended to use an ACO Universal Gully and Sump Unit, or an equivalent approved alternative.

Connection to be made to the outlet leg of the existing private gully

New 150mm connection into proposed SW MH

New 150mm connection into proposed SW MH

Proposed FW manhole connection to be made to the United Utilities combined sewer network.

PROPOSED SITE PLAN
