

14

4mm clear float

6mm argon gas filled

4mm Low E

non setting Compound

Elastic Putty Sealant

Paint

The diagram illustrates a cross-section of a window assembly. It features a central vertical section with a horizontal line passing through its center. The assembly consists of several layers: a 4mm clear float, a 6mm argon gas filled layer, a 4mm Low E layer, a non setting Compound, an Elastic Putty Sealant, and a Paint layer. The overall thickness is 14mm with a 7mm sightline.

Overall Thickness 14mm with a 7mm sightline.
