

This architectural elevation drawing shows a two-story building. On the left, a chimney with two flues rises from the roofline. The roof is covered in a pattern of rectangular tiles. The upper floor features a large rectangular window on the left and a smaller square window on the right, both with dark frames. Below the roofline, there are two square ventilation units or small windows. The ground floor has a set of four tall, narrow vertical windows on the left and a pair of similar windows on the right. The entire building is rendered with a brickwork pattern. A red dashed line on the left side indicates the ground level or a boundary line.

Architectural elevation drawing of a brick house. The house features a gabled roof with a chimney on the right side. A small dormer window is visible on the roof. The main facade is covered in brickwork. A porch with a tiled roof extends from the left side of the house. A dimension line indicates a height of 2281 from the ground to the top of the porch roof. Another dimension line indicates a width of 5277 for the main brick section. An arrow points to the roofline with the text "Adjacent property No.42".

An architectural elevation drawing of a house. The main structure has a steep gabled roof with diagonal hatching. A chimney is located on the roof ridge. On the left side, there is a dormer window with a small gabled roof. To the right, there is a smaller, lower structure with a flat roof. The entire drawing is rendered in black lines on a white background.

General Notes		
The Contractor is to check all dimensions on site and report any discrepancies to the Contract Administrator. This drawing is to be read in conjunction with all other standard documentation. Dimensions are not to be scaled from this drawing.
