LAND OFF BAILDON ROAD, ROCHDALE, OL12 7NB
PRELIMINARY RISK ASSESSMENT (DESK STUDY)

INTRODUCTION

A residential development is proposed. The objective is to carry out a Preliminary Risk Assessment to consider contamination, landfill gas and geotechnical issues.

SITE DESCRIPTION

The site is a rectangular plot, 17 x 15m, located to the southeast of Baildon Road in Rochdale, and at OS Grid Reference 387737, 414073. Inspected on 16/9/22 by Mrs E Whitaker (Geotechnician), the site comprises a domestic garage colony having two garages with suspected asbestos sheet roofs at the southwest, and the remainder being hardcore or overgrown grass surfaced. There is a row of deciduous trees (up to 10-12m high) and bushes along the northwest boundary (this is not an arboricultural survey).

There is a sub-station and garage to the northeast, and houses to the southeast, southwest and northwest. The area slopes down to the southeast.

PROPOSED DEVELOPMENT

It is proposed to build a block of three town houses on the northwest of the site, having gardens to the rear (southeast) and landscaping to the front (northwest).

LEGAL/COPYRIGHT

Material may be included in this report from Ordnance Survey (Licence No. AL100031635), Landmark, Environment Agency, Coal Authority and others. It may be copyright and the usual restrictions apply. This report can only be relied upon if the invoice has been paid promptly and in full. This report may be signed by an individual, but only on behalf of Worms Eye Limited.

NOT INCLUDED IN THE REPORT

- Arboricultural or Invasive Plant Survey (Japanese Knotweed etc.).
- Asbestos Survey
- Mining Risk Assessment.
- Flood Risk Assessment.
- Underground Services Survey.

General comments may be made where they are applicable to the environmental and geotechnical risk assessment. These do not constitute a detailed risk assessment.

DATA SOURCES

The following data sources have been viewed in compiling this report.

- BGS, Geology Map, 1:50000 scale, Solid and Drift Edition
- BGS, on-shore boreholes scans
- Landmark Envirocheck Report, 7/9/22.
- Ordnance Survey, Historical Maps, 1:10000 and 1:2500 scale
- Walkover Survey, 16/9/22.

This report is referred to as a Preliminary Risk Assessment (PRA), alternative names are 'Phase I' Report (Phase II being the intrusive work involving boreholes etc.) or a Desk Study.

ENVIRONMENTAL DATA

A Landmark Envirocheck report and geological maps have been reviewed, the following is a summary of the combined data. The Envirocheck report indicated none of the following within 250 metres:

- Contaminated land register entries
- Discharge consents
- Pollution incidents
- Water abstraction points or Source protection zones
- Landfill sites
- Hazardous substances sites or Fuel stations.
- Sensitive land uses

Geology of Site

The underlying solid rocks are mudstone, of the Penning Lower Coal Measures.

Surface drift is shown as glacial till (boulder clay) and natural subsidence hazards are shown as very low to no hazard.

Surface Water (Hydrology)

A stream/field drain issues 198m south and flows southeast.

The area slopes down to the southeast, the flow of surface water is expected to be in this direction.

Flooding (General)

Flooding can occur for many reasons other than those dealt with by the EA maps. These include:

- burst pipes, blocked drains, sewers and culverts
- inadequate drainage, cloudbursts/flash flooding overwhelming drainage systems

Statements in this report such as 'clear of flooding/flood plain' and 'flooding – no further action' are references to the EA river and sea flood maps and are no guarantee that flooding will not occur.

Groundwater Flooding

The site is shown to have potential for groundwater flooding of property situated below ground level.

Flooding from Rivers

The site is shown to be clear of flooding from rivers.

Surface Water Flooding

The site is shown to be clear of surface water flooding, the nearest being an area at risk of 1 in 1000 year surface water flooding immediately northwest.

Groundwater (Hydrogeology)

The solid rocks under the site are indicated as a Secondary A.

Superficial (drift) deposits are classed as a Secondary Undifferentiated aquifer.

Groundwater flow is likely to follow the topography and move to the southeast.

Filled Ground

Within 250 metres of the site there are the following suspected filled features:

- Immediately northwest – 1993 (area is a road - no feature identified).
- 182m southeast – 1956 (two small reservoirs/mill ponds)

Radon

The site is in a lower probability radon area as less than 1% of homes in the area are above the radon action level. Radon protection measures are not required.

Mining

The Coal Authority Interactive Mapping shows:

- Site is not in a High Risk Area
- No nearby coal seams.
- No nearby mine entries

Nearby Industry

Impeccable Dry Cleaning, 117m southwest, have a Local Authority PPC listing for dry cleaning. This site also has a trade directory entry *

The only other trade directory entry within 200m was for an asphalt and macadam laying contractor, 168m west, inactive*

* not relevant due to distance/severity/significance

SITE HISTORY

Date	On Site	Off Site
1851 (10560)	Undeveloped field	Largely undeveloped
1890 (2500)	Undeveloped	Brick works 125m northeast with brick field 65m north Two reservoirs/mill ponds 185m southeast.
1910 (2500)	Undeveloped	Houses 60m southeast. Brickworks extended, now 115m northeast. Brickfield extended around to 125m northwest, a slope along the north and northwest sides suggests it was cut into the slope to create a level area probably to store bricks. Possible pond at brick works 75m northeast, with mapping suggesting it was above ground with slopes on all sides.
1931 (10560)	Undeveloped	Houses 12m southeast, 5m southwest and 15m northwest, up to 95m northwest. Slope around brick field still present at northwest. Possible pond still present 75m northeast.
1938 (10560)	Undeveloped	Brickworks to northeast demolished and area being developed for housing. Slope around brick field still present to northwest. Suspected raised pond 75m northeast not present, presumed dug out.
1957 (2500)	Undeveloped	Houses 70m northeast and 105m southeast. Slope still present to northwest.
1967 (10000)	Undeveloped	Reservoirs to southeast not present, presumed filled
1975 (2500)	Domestic garages built along southwest and northwest sides.	Sub-station and domestic garage immediately northeast.
1992 to 2003	Little or no change	No relevant change
2003 to 2022	Northwest garages demolished and southwest garages possible demolished and re-built.	No relevant change

DISCUSSION

Contamination

The site is a domestic garage colony. Although not usually a source of high levels of contaminants, levels usually exceed stringent residential thresholds. Contaminants may be present from made ground (imported before construction of the garage), from repairs to or leaks from vehicles or from building materials (especially sulphate and asbestos).

A sub-station immediately northeast can be a source of PCBs, however, these do not usually migrate far from their source and if present would be expected to concentrate close to the sub-station.

There have been no nearby industrial sites which will affect the site and no pollution incidents on or close to the site.

The proposed development will be houses with gardens. Potential pollutant linkages are:

- Direct contact and ingestion of soil.
- From homegrown vegetables and soil attached to vegetables.
- Inhalation and ingestion of dust.
- Sulphate attack on buried concrete.
- Contaminants entering drinking water pipes.

Contaminants are not expected at high levels but are expected to exceed stringent residential thresholds. A moderate risk is anticipated.

Controlled Waters

There is an underlying Secondary A aquifer, beneath clay, and there are no nearby water abstraction points or source protection zones.

A stream/field drain issues 198m south and flows southeast.

Although the gardens will allow rainwater to pass through the surface soils, contamination is not expected at high levels. The underlying clay will impede the migration of water and it is anticipated there will be no risk to controlled waters.

Landfill Gas/Ground Gas

There are no landfill sites within 250m. Two small reservoirs/mill ponds about 185m southeast, were filled circa 1950s. These are relatively small features which would have been designed to hold water. Their size suggests limited material for gas generation. Their age, and not being landfill sites, also suggests material is likely to be largely inert. A low gas generation potential is expected, at worst, and bearing in mind the distance and underlying clay these are not considered a risk to the development.

A suspected brickfield extended to the north and northwest of the site. There is no indication that this was a clay pit, and a slope to the north and northwest suggests a level area was created by cutting into the slope to the northwest. Existing houses are present at a higher level to the northwest and lower level to the southeast of the slope, suggesting there has been no widespread filling.

A suspected pond 75m northeast, close to the brick works, is suggested to be a raised feature by the mapping, possibly an artificially created lagoon which was dug out when the area was developed.

The findings show no credible, on or off-site, landfill or ground gas sources and therefore no gas risk to the development.

Radon

Radon protection measures are not required.

Flooding from Rivers

The Environment Agency maps show that this site is clear of flooding from rivers.

Groundwater and Surface Water Flooding

The site is shown to be clear of surface water flooding, the nearest being an area at risk of 1 in 1000 year surface water flooding immediately northwest.

The site is shown to be in an area with potential for groundwater flooding of property situated below ground level.

Foundations

The geology map suggests the site is underlain by clay which often provides a good bearing strata for traditional shallow foundations.

If foundations are to be on clay the shrinkage potential of the clay needs to be determined, to ensure foundations are below the potential effects of tree root shrinkage.

INDUSTRY PROFILE

The site is a domestic garage colony with adjacent sub-station.

Industry	Possible Contaminants
Domestic Garage Colony	Metals: copper, zinc, chromium, nickel, lead, cadmium, arsenic, Inorganic compounds: cyanide, sulphates Phenols Mineral oils, fuel oils (TPHs) Asbestos General hydrocarbons (PAHs)
Sub-station	PCBs

CONCEPTUAL MODEL

A conceptual model based on the source-pathway-receptor concept is included with this desk study to show the potential pollutant linkages with this site.

Source	Receptors	Pathway	Potential/Likely Pollutant Linkage
Asbestos	End-users	Inhalation	Yes
	Off-site	Migration off-site	Yes
Inorganic contaminants	Householders	Direct contact, ingestion, from home grown vegetables, ingestion and inhalation of dust	Yes
	Groundwater	Leaching towards	No
	River/stream	Leaching towards	No
Sulphate	Building fabric	Concrete directly in contact with soil	Possible
Hydrocarbons	Householders	Direct contact, ingestion, from home grown vegetables, ingestion and inhalation of dust	Yes
	Service pipes	Seeping into drinking water pipes	Yes
	Groundwater	Leaching towards	No
	River/stream	Leaching towards	No
Hydrocarbon vapours	Householders	Inhalation of vapours indoors and outdoors	No
Landfill gas	End-users (inside)	Seeping into buildings, explosion, asphyxiation	No
Radon	End-users (inside)	Seeping into buildings	No

CONCLUSION

Contamination

The history of the site suggests contaminants are unlikely to be present at high levels, but low levels which exceed stringent residential thresholds, are expected.

An intrusive investigation is required, consisting of boreholes/trial holes and tests to confirm the presence/absence and extent of contamination on the site. The sub-station is a point source for PCBs and the investigation will need to target this, proposed gardens (most sensitive part of the development), proposed houses and provide all round coverage.

Controlled Waters

No risk to controlled water is expected and no further action is considered necessary at this stage. This may need to be reviewed following the soil tests.

Landfill Gas/Ground Gas

The findings show no credible, on or off-site, landfill or ground gas sources and therefore no gas risk to the development. Gas testing is not needed and no special precautions are required.

Radon

Radon protection measures are not required.

Flooding

The EA maps indicate that the area is clear of flooding from rivers.

The site is shown to be clear of surface water flooding, the nearest being an area at risk of 1 in 1000 year surface water flooding immediately northwest.

These maps are fairly crude and it is beyond the scope of this report to provide a comprehensive flood risk assessment. For greater confidence a detailed flood risk assessment should be obtained.

Foundations

A series of boreholes are required in the area of the proposed building to allow the most suitable foundations to be designed.

Plasticity tests are required to confirm the shrinkage potential of the clay.

Yours faithfully

1. This report should be considered in relation to the objectives agreed between Worms Eye and the Client, outlined in the introduction.
2. For the work, reliance has been placed on publicly available data, obtained from the sources identified in the report. The information is not exhaustive and further information may be available from other sources. When using the information it has been assumed it is correct, and no attempt has been made to verify the information.
3. This report has been produced in accordance with current UK policy and guidelines, for land and groundwater contamination, enforced by the Local Authority and the Environment Agency.
4. During the site walkover, reasonable effort was made to obtain an overview of the site. However, no attempt was made to enter areas that are unsafe, a risk to health and safety, locked, barricaded, overgrown, or areas not made accessible.
5. Access, the presence of services and activities on the site, limited locations where sampling could be carried out and the techniques that could be used.
6. Assessments are based on available information at the time of writing and are ultimately for the decision of the regulatory authorities.
7. The conclusions and recommendations provide an overview and guidance only and should not be specifically relied upon without considering the context of the report in full.
8. Worms Eye cannot be held responsible for any use of the report or its contents for any purpose other than that for which it was prepared. The copyright of this report, and other plans or documents prepared by Worms Eye, is owned by them, and no such plans or documents may be reproduced, published or adapted without written consent. Complete copies may be made and distributed by the client, as expected, in dealing with matters related to its commission. Should the client pass copies of the report to other parties for information, the whole report should be copied, but no professional liability, or warranties, shall be extended to other parties by Worms Eye, without their written agreement.
9. New information, revised practices, or changes in legislation, may necessitate the re-interpretation of the report, in whole or in part.

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client. In this datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

190	Potentially Infilled Land (Non-Water) Bearing Ref: E Use: Unknown Filled Ground (Pit, quarry etc) Date of Mapping: 1993	A14SE (E)	999	-	388703 413792
191	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1956	A13SE (SE)	182	-	387822 413900
192	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1894	A12SE (W)	367	-	387371 413977
193	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1894	A14SW (E)	424	-	388136 413910
194	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1911	A12NE (W)	443	-	387306 414206
195	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1956	A8NW (S)	602	-	387722 413462
196	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1851	A14SW (E)	648	-	388388 413991
197	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1851	A8NE (S)	655	-	387992 413458
198	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1956	A8NE (S)	664	-	387866 413412
199	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1993	A18NE (N)	674	-	387753 414757

Map ID	Details	Quadrant Reference (Compass Direction)	Estimated Distance From Site	Contact	NGR
200	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1956	A17SE (NW)	690	-	387266 414593
201	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1851	A14NE (E)	767	-	388463 414351
202	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1956	A12SW (W)	917	-	386857 413779
203	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1956	A19NW (NE)	942	-	388146 414933
204	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1911	A7SE (SW)	951	-	387309 413214
205	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1956	A9SW (SE)	990	-	388216 413195

Lancashire And Furness

Published 1851

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.
