

View from Tandle Hill Memorial-Trig Point

Viewpoint Description		Distance	Existing View	Visual baseline	Landscape Baseline
View Orientation: Receptor Type: Distance From Site: Date Taken: Time Taken: Camera Model: Full Frame/Pano: Focal Length: OS Map Coords: Elevation:	Facing South-West Ramblers, Visitors 690m 09/12/2024 11.14am Canon EOS R5 Panoramic 50mm E390061.54 N408812.24 221.848 AOD	Foreground	Trees/Scrub. Prominent Conifer tree impedes some of the southern site portion	Visual susceptibility Low/medium	Landscape susceptiilty Low
		Mid-ground	Scrub groupings on slopes down to rough grazing pasture and Gerrard Wood-woodland group of broadleaved trees. Taller tree lines flank the edges if the A627M with gaps revealing direct views to the fields within the site.	Value of View medium/high	Landscape Sensitivity/Value Low
		Background	Prominent views to Stakehill industrial estate large scale built form interspersed with belts of trees. To the LHS grazing fields between Stakehill and Chaderton Fold	Observations: Weather conditions overcast with some occasional breaks. Generally good /very good visibility. A valued view-due to the local elevated prominence of Tandle Hill and the relatively flat topography in the main view subject. This is an increasingly urban facing view with prominent mid-ground appearance of Stakehill Industrial Estate sheds. Beyond this, the view is mainly of Greater Manchester towns and suburban areas. Due to the flatter western lying topography, longer distance viewpoints are visible such as (?) Fiddlers Ferry Power Station.	
		Overall Sensitivity:	Low/medium
