Service**

26/03/24

Dear 

Please find below our recommendation for tree works to be carried out at 133 Edmond Street, Rochdale:

There is a large Holly tree (about 40ft) situated at the rear of the property. The tree leans on the rear wall and is causing damage to the wall and could push it over in the near future. It actually touched the wall low down (about 4ft).

Our recommendation is to fell the Holly tree to ground level.

All H&S, method statement, risk assessment and insurance documentation will be provided as and when requested.

Personnel are CSCS and NPTC qualified and DBS checked; all certification will be produced on request.

Treelink Northwest Ltd is a CHAS registered company and are certified members of Constructionline.

If you require any further information at this stage please do not hesitate to contact us.

We look forward to hearing from you soon.

Kind regards,
Jon Spencer.
