

TREE SURVEY SCHEDULE

DATE	CLIENT	SITE	REFERENCE
02/09/2022	David Wilson Homes	Pargate Chase, Rochdale	1452-TS-001-A

Tree No.	Tag No.	Common Name	Height (est. m)	Stem Dia (est. mm)	Crown Spread (est. m)				Life stage	Phys Con	Struc Con	Target Rating	Additional notes	Work Recommendations	Work Priority	Inspection Frequency	TPO Present
T1	No Tag	Common ash	15	660	8	9	7	7	Mat	Declining	Fair	High	Located on area of open space. Residential dwellings present around tree. Dense Epicormic and ivy around base. Small cavity at base from previous stem failure. Cerioporos squamosus present within cavity at base. Ash has moderate dieback infection with approx 75% of canopy remaining. Moderate desired associated with dieback within canopy.	Fell tree to ground level.	High (4 weeks)	None	Yes - Tree Preservation Order no.157 1998
T2	No Tag	Common ash	12	350	5	6	4	5	E/Mat	Fair	Fair	High	Located on area of open space. Residential dwellings present around tree. Dense Epicormic and ivy around base. Canopy is severely declining with approx 50% of canopy remaining. Tree is unlikely to recover from severe infection.	Fell tree to ground level.	High (4 weeks)	None	Yes - Tree Preservation Order no.157 1998
T3	No Tag	Common ash	6	150	3	3	3	2	S/Mat	Fair	Fair	Moderate	Located on area of open space. Residential dwellings present near tree. Canopy is severely declining with approx 50% of canopy remaining. Tree is unlikely to recover from severe infection.	Fell tree to ground level.	Moderate (6 months)	None	No
T4	No Tag	Common ash	12	650	7	6	6	7	Mat	Declining	Poor	High	Located on area of open space. Residential dwellings present around tree. Dense Epicormic and ivy around base. Canopy is severely declining with approx 50% of canopy remaining. Tree is unlikely to recover from severe infection. One branch has previously failed and is putting on ground, likely due to over extension as no signs of final infection and moderate canopy vigour.	Fell tree to ground level.	High (4 weeks)	None	Yes - Tree Preservation Order no.157 1998
T5	No Tag	Common ash	15	450	7	7	7	7	Mat	Poor	Poor	High	Located on area of open space. Residential dwellings present near base. Canopy is severely declining with approx 25% of canopy remaining. Major deadwood associated with canopy with saprophytic fungi present. Tree is unlikely to recover from severe infection.	Fell tree to ground level.	High (4 weeks)	None	Yes - Tree Preservation Order no.157 1998
