Hi [REDACTED]

We have no further comments with regards to the waste water drainage strategy at this time.

United Utilities are happy for these issues to be dealt with as part of the suggest pre commencement condition from our previous consultation.

“CONDITION: Prior to the commencement of development, details of a sustainable surface water drainage scheme and a foul water drainage scheme shall be submitted to and approved in writing by the Local Planning Authority. The drainage schemes must include: (i) An investigation of the hierarchy of drainage options in the National Planning Practice Guidance (or any subsequent amendment thereof). This investigation shall include evidence of an assessment of ground conditions and the potential for infiltration of surface water in accordance with BRE365; (ii) A restricted rate of discharge of surface water agreed with the local planning authority (if it is agreed that infiltration is discounted by the investigations); (iii) Levels of the proposed drainage systems including proposed ground and finished floor levels in AOD; (iv) Incorporate mitigation measures to manage the risk of sewer surcharge where applicable; and (v) Foul and surface water shall drain on separate systems. The approved schemes shall also be in accordance with the Non-Statutory Technical Standards for Sustainable Drainage Systems (March 2015) or any subsequent replacement national standards. Prior to occupation of the proposed development, the drainage schemes shall be completed in accordance with the approved details and retained thereafter for the lifetime of the development. Reason: To promote sustainable development, secure proper drainage and to manage the risk of flooding and pollution.”

Kind regards

If you have received a great service today why not tell us?
