Dear Sam,

Edgar Woods, Temporary Accommodation - Materials Management Plan Verification Report

Further to your notification that the works relating to a Material Management Plan have been completed on the Edgar Woods temporary accommodation site, we have completed our review of the associated record information.

This letter and the information attached herein is the Verification report required by The Definition of Waste: Development Industry Code of Practice Version 2.

This Verification Report concerns the earth movements related to "Site of Origin" scenario only and does not consider imported materials.

1) Description of the Project

The project comprises the re-development of an area of land located off Hopwood Hall College, Middleton Campus, Rochdale Road, Middleton M24 6XH, for temporary school accommodation. The Grant of Planning Permission for planning application reference 21/00074/FUL describes the intended development as;

The erection of temporary school classrooms and associated facilities including play area, car parking, access and landscaping and boundary treatments.

The site location and application boundary are shown on ADP drawing ref. ADP-00-ZZ-DR-A-0950 Proposed Site Plan and can be referred to in Attachment A of this letter.

2) Materials Management Plan and the Remediation Strategy

A Materials Management Plan (MMP) was compiled in May 2021 by Curtins, report ref. EWATMP-CUR-00-XX-RP-GE-00002 and was declared by Qualified Person no. QP370 with receipt received from CLA:IRE on 13th May 2021; refer to Attachment B.

With reference to previous ground investigation reports produced by Wardell Armstrong, including a Phase 1 Desk Study (Ref. GM11383/004) and Phase 2 Ground Investigation (Ref. GM11383), no remediation or remediation strategy was required. Therefore, a design statement was produced with supporting Materials Management Plan (Ref. EWATMP-CUR-00-XX-RP-GE-00002).

The MMP specifically describes the intended earthworks/operations to include the re-use of soils on the site of origin. The works include:

- Moving multiple sources of material including site won Made Ground and natural granular and cohesive soils as part of a cut and fill operation.
 - a. Made Ground typically described as dark grey, slightly sandy, slightly gravelly clay.
 - b. Light to dark grey silty clayey gravelly fine to coarse sand
 - c. Dark grey slightly sandy, silty clay.
- Material does not need to perform a 'structural/engineering' function as foundations will be taken below these materials. As such, a compaction regime is not overly critical.
- A balanced cut and fill operation, where the net cut and net fill are equal.
- Contractors to record daily evidence of the materials moved, volumes and locations excavated and deposited with photographic evidence. Weekly record (on tracking sheet) to be provided during periods material is moved.

The calculated volumes advised in the MMP include:

- Topsoil and shallow Made Ground strip of 1,515m³ which is to be removed from site.
- Cut of 767m³ of Made Ground and natural soils, to be placed in areas of fill, resulting in an estimated net 4m³ cut.

3) Records of Works Undertaken

The main contractor for the works was Williams Construction Ltd. Were responsible for all materials generated on site, their movement and placement on site, or removal from site.

Curtins have reviewed the waste transfer tickets and confirm that 126 No. loads of material, derived from the site strip, were removed from site.

Curtins attended site on three occasions to inspect the works being undertaken. Made Ground materials were being moved in accordance with the MMP. Made Ground being stripped from areas of cut and immediately placed in areas of fill in order to construct a development platform. All excess soils were removed from site to a suitably licensed waste disposal facility as per the waste transfer notes included within attachment D.

No evidence of unexpected contamination was identified.

Excess materials produced during the site strip were removed from site. Records provided by Williams Construction Ltd. Are included within Appendix C. These records detail material excavated and removed between 26th May 2021 and 8th July 2021.

A total of 126 No. 8 wheel wagon loads of material were removed from site.

The volumes of material excavated during the works generally compares with the anticipated volumes stated in the MMP.

A Curtins Engineer visited the site on the following days to supervise the material management plan;

- Visit 1 – 21st May 2021
- Visit 2 – 1st June 2021
- Visit 3 – 11th June 2021

4) Testing

As discussed in Section 2 the site has been assessed as Route B, land not suspected of being affected by contamination.

Seven Made Ground samples were obtained on the 21st May 2021 and tested for the following chemical analysis suite:

Analyte	LOD
Asbestos Screen	-
pH Value	0.01 pH
2:1 Water Soluble Sulphate	0.01 g/l
Soil Organic Matter (SOM)	0.1% w/w
Arsenic, Chromium, Chromium VI, Copper, Lead, Nickel, Selenium	1 mg/kg
Zinc	5 mg/kg
Boron (water soluble)	1 mg/kg
Cadmium	0.5 mg/kg
Mercury	0.17 mg/kg
Cyanide (total)	1 mg/kg
Phenols (screen)	0.2 mg/kg
PAHs (USEPA 16)	0.01 to 0.08 mg/kg
TPH (Aro/Alk Split)	0.01 to 1 mg/kg

The results of laboratory chemical analysis were compared against 'Residential without Home Grown Produce' screening criteria. No exceedances were recorded in the Made Ground with regards to the screening criteria GAC of 2.5%.

The Made Ground soil test results are enclosed in Attachment C.

5) Closure

Curtins attended site on 21st May 2023 to inspect the works and obtain soil samples for chemical analysis. The test results provided show that the material tested is within specification and suitable for use.

In addition, records have been provided Williams Construction Ltd which indicate Excavated materials have been re-used on site in general accordance with the agreed Materials Management Plan. Excess or unsuitable material was removed from site for disposal.

Yours faithfully

R Taylor BSc (Hons), MSc, GradCIWEM
Geo-Environmental Engineer

Subject: CL:AIRE Def. of Waste Code of Practice Declaration - 13/05/2021 12:03:34

Thank you for your recent submission of a Definition of Waste: Development Industry Code of Practice Declaration (DoW CoP).

This Declaration will be submitted to the Environment Agency / Natural Resources Wales under the DoW CoP.

You are reminded that if materials are not used in accordance with the Materials Management Plan or risk assessment or if it is discovered that materials were not suitable for use, were used in excessive quantity or in such a manner as to harm human health or pollute the environment, the Environment Agency / Natural Resources Wales may conclude that those materials were discarded and were waste. Please note <https://www.gov.uk/government/publications/landfill-tax-disposals-not-made-at-landfill-sites/landfill-tax-disposals-not-made-at-landfill-sites>.

You are also reminded that a Verification Report must be prepared on completion of the work as set out in the Remediation Strategy / Design Statement covering the site. This Verification Report must be provided to the Environment Agency / Natural Resources Wales upon request.

This acknowledgement email relates to the following Declaration

10. Terms & Conditions	Person identified in Q8 has read and agreed to the Terms & Conditions.
11. Please provide a purchase order number	EBMA2886
12a. I confirm that -	I satisfy the Qualified Person requirements set out in Appendix 6 of the Definition of Waste: Development Industry Code of Practice to complete this Declaration. I have reviewed the Materials Management Plan for the above project. I have reviewed the risk assessment. I have reviewed the Remediation Strategy/Design Statement covering the above site. I have requested correspondence / documentation relating to the development and how that relates to the use of materials.
12b. Please provide a reference for the Materials Management Plan	Curtins, EWATMP-CUR-00-XX-RP-GE-0002_Materials Management Plan, 04.05.21
12c. Please provide a reference for the Risk Assessment	Wardell Armstrong Phase 1 Desk Study Ref: GM11383/004, dated September 2020. (Section 8 – Conclusions & Recommendations.) Wardell Armstrong Phase 2 Ground Investigation Ref: GM11383, dated November 2020. (Section 8 – Revised Conceptual Model.)
12d. Please provide a reference for the Remediation Strategy or Design Statement documents.	Curtins, EWATMP-CUR-00-XX-RP-GE-00001-Design Statement, April 2021
12e. Please provide a reference for the Verification Plan	Curtins, EWATMP-CUR-00-XX-RP-GE-0002_Materials Management Plan, 04.05.21 Rob Allen at Curtins on behalf of Wates will produce the verification report for the use of site won material, incorporating: a) Summary of objectives and methods used b) Details of inspections during the works c) Results of supplementary testing and risk assessments d) Schedule of wastes removed Additionally, the design statement includes the verification of the soils to be re-used and demonstrates appropriate suite of testing, frequency and criteria.
12f. Identify the organisation and individual(s) (email address / contact details) with responsibility for producing the Verification Report	Rob Allen Curtins 17-19 Whitworth Street West Manchester M1 5WG rob.allen@curtins.com 0161 236 2394
12g. Please provide an estimated production date for the Verification Report.	31/12/2021
12h. Please reference other supporting documents as required in the MMP. e.g. as a minimum this must include - location plans, schematics, Desk Top Study, mass balance calculations, contingency arrangements, tracking system. Where these are part of another document, this should be explained here. It is recommended each item is listed.	ADP-00-ZZ-DR-A-0950 Proposed Site Plan Curtins, EWATMP-CUR-XX-00-DR-C-91601-P01 Proposed Earthworks Cut & Fill Analysis Curtins, EWATMP-CUR-00-XX-DR-C-91602-P01 Proposed Earthworks Sections The Materials Management Plan included a tracking pro forma. Contingency arrangements are also included within the Materials Management Plan and detail that materials to be removed or remediated by contractor are paid for by the client. The programme will be extended

	until the works have been completed in accordance with the Specification/clients requirements.
13a. I confirm that I have reviewed the following correspondence / documentation relating to the development and how that relates to the use of materials from:	a) The Local Authority, b) Environment Agency / NRW
13b. Please reference the correspondence with the Local Authority.	Email from Michael Moore of Rochdale Borough Council confirming acceptance dated 12 May 2021 14:35
13c. Please reference the correspondence with the EA / NRW.	Email from Rob Allen to Lee Beveridge confirming points discussed and agreed in telephone call dated 04 May 2021
13d. Please reference the correspondence with other relevant regulatory bodies	NA
14a. I have reviewed the planning consent including planning conditions	21/00074/FUL Granted 30 April 2021
14b. I have reviewed correspondence concerning the planning consent regarding the development from:	a) The Local Authority , b) Environment Agency / NRW
14c. Please list correspondence reviewed in 14b.	Email from Michael Moore of Rochdale Borough Council confirming acceptance dated 12 May 2021 Email from Rob Allen to Lee Beveridge confirming points discussed and agreed in telephone call dated 04 May 2021
15. If planning consent is not required please explain why	NA
16. I confirm that the MMP contains the information required:-	The risk assessment assesses human health and environmental risks in relation to the proposed uses of all the materials in the MMP. The risk assessment concludes that the objectives of preventing harm to human health and pollution of the environment will be met if materials are used in the proposed manner., The Local Authority, the Environment Agency / Natural Resources Wales and other relevant environmental regulatory bodies have not objected to the proposed development / land remediation on the basis that the use of any material is likely to cause harm to human health or pollution of the environment. [This confirmation should be given regardless of whether planning consent is required for the activity. Also see paragraph 3.37 of the CoP.], The EA/NRW have not objected to the reuse of materials on the grounds that it a.) constitutes a waste management operation or b.) has had a previous application for an environmental permit for waste recovery refused (on the grounds that the project represents waste disposal)., The project or phase to which this Declaration applies has not yet commenced; this is not a retrospective application of the DoW CoP., The project does not involve land-spreading / agricultural re-profiling.

Kind regards

REPORT NOTES

General

This report shall not be reproduced, except in full, without written approval from Envirolab.

The results reported herein relate only to the material supplied to the laboratory.

The residue of any samples contained within this report, and any received with the same delivery, will be disposed of six weeks after initial scheduling. For samples tested for Asbestos we will retain a portion of the dried sample for a minimum of six months after the initial Asbestos testing is completed.

Analytical results reflect the quality of the sample at the time of analysis only.

Opinions and interpretations expressed are outside the scope of our accreditation.

If results are in italic font they are associated with an AQC failure, these are not accredited and are unreliable.

A deviating samples report is appended and will indicate if samples or tests have been found to be deviating. Any test results affected may not be an accurate record of the concentration at the time of sampling and, as a result, may be invalid.

The Client Sample No, Client Sample ID, Depth to Top, Depth to Bottom and Date Sampled were all provided by the client.

Soil chemical analysis:

All results are reported as dry weight (<40°C).

For samples with Matrix Codes 1 - 6 natural stones, brick and concrete fragments >10mm and any extraneous material (visible glass, metal or twigs) are removed and excluded from the sample prior to analysis and reported results corrected to a whole sample basis. This is reported as '% stones >10mm'.

For samples with Matrix Code 7 the whole sample is dried and crushed prior to analysis and this supersedes any "A" subscripts

All analysis is performed on the sample as received for soil samples which are positive for asbestos or the client has informed asbestos may be present and/or if they are from outside the European Union and this supersedes any "D" subscripts.

TPH analysis of water by method A-T-007:

Free and visible oils are excluded from the sample used for analysis so that the reported result represents the dissolved phase only.

Electrical Conductivity of water by Method A-T-037:

Results greater than 12900µS/cm @ 25°C / 11550µS/cm @ 20°C fall outside the calibration range and as such are unaccredited.

Asbestos:

Asbestos in soil analysis is performed on a dried aliquot of the submitted sample and cannot guarantee to identify asbestos if only present in small numbers as discrete fibres/fragments in the original sample.

Stones etc. are not removed from the sample prior to analysis.

Quantification of asbestos is a 3 stage process including visual identification, hand picking and weighing and fibre counting by sedimentation/phase contrast optical microscopy if required. If asbestos is identified as being present but is not in a form that is suitable for analysis by hand picking and weighing (normally if the asbestos is present as free fibres) quantification by sedimentation is performed. Where ACMs are found a percentage asbestos is assigned to each with reference to 'HSG264, Asbestos: The survey guide' and the calculated asbestos content is expressed as a percentage of the dried soil sample aliquot used.

Predominant Matrix Codes:

1 = SAND, 2 = LOAM, 3 = CLAY, 4 = LOAM/SAND, 5 = SAND/CLAY, 6 = CLAY/LOAM, 7 = OTHER, 8 = Asbestos bulk ID sample.

Samples with Matrix Code 7 & 8 are not predominantly a SAND/LOAM/CLAY mix and are not covered by our BSEN 17025 or MCERTS accreditations, with the exception of bulk asbestos which are BSEN 17025 accredited.

Secondary Matrix Codes:

A = contains stones, B = contains construction rubble, C = contains visible hydrocarbons, D = contains glass/metal,

E = contains roots/twigs.

Key:

IS indicates Insufficient Sample for analysis.

US indicates Unsuitable Sample for analysis.

NDP indicates No Determination Possible.

NAD indicates No Asbestos Detected.

N/A indicates Not Applicable.

Superscript # indicates method accredited to ISO 17025.

Superscript "M" indicates method accredited to MCERTS.

Subscript "A" indicates analysis performed on the sample as received.

Subscript "D" indicates analysis performed on the dried sample, crushed to pass a 2mm sieve

Please contact us if you need any further information.
