

2000-2500EAV / 4000-5000EAV

Variable slotvent

Physical specification

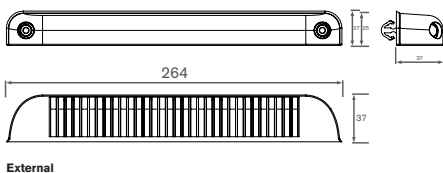

All measurements in millimetres unless otherwise indicated

Materials: ASA

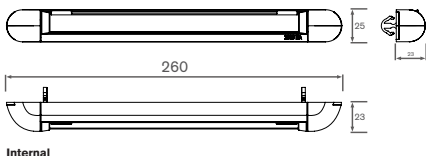

Installation

1. Prepare the window frame with the correct slot sizes.
2. Use the provided fixing screws or fixing clips to install the canopy and vent.
3. Fit the end caps by pushing them into each side of the canopy and vent.

2000-2500EAV

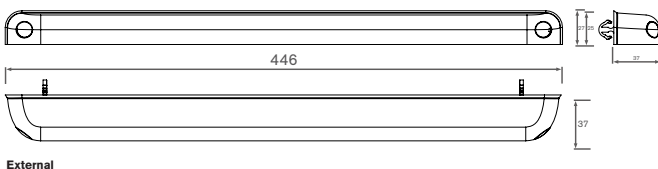

External

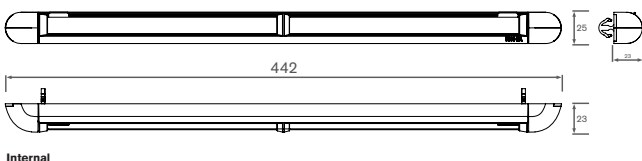

Internal

4000-5000EAV

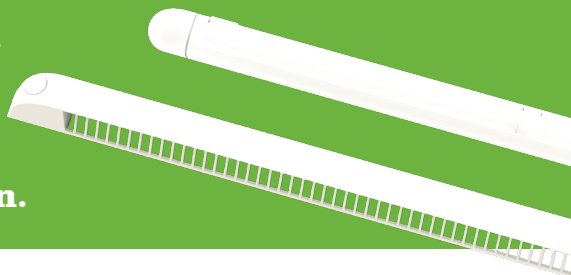

External

Internal

Our variable window vents have been designed with flexibility in mind; allowing the option to partially close the vent enabling a comfortable flow of natural ventilation.

Features and benefits

- Suitable for use where a high level of equivalent area is required and to achieve the minimum room requirements under the latest Building Regulations (between 4000mm² ea and 10,000mm² ea depending on the room and type of dwelling)
- Each model is able to be installed with the option of two equivalent areas (2000/2500 mm² ea or 4000/5000mm² ea) meaning lower stock requirements
- Variable control allowing users to fully or partially close the internal vent achieve the desired flow of natural ventilation
- Manufactured from tough and strong ASA plastic which is known for high impact wear and UV resistance - minimising the risk of decolouration and weathering
- Excellent air tightness performance, increasingly important with dwelling air pressure tests
- Aesthetically pleasing design – unobtrusive when installed
- Optional installation mechanism using the provided fixing clips or fixing screws

Sets comprise of:

1 EAV vent + external canopy with integral flyscreen, fixing screws, or fixing clips and covers.

Model, control options and key data

Product Code	Equivalent area (mm ²)	Slot height	Slot size			Air Permeability		Watertightness	Airborne Sound Insulation	
			Length	Central gap	Length	@ 50 Pa (m ³ /hr)	@ 50 Pa (l/s)		Pressure @ no leakage (Pa)	Dn,e,w (dB) Open
2000EAV	2000	10mm	102mm	10mm	102mm	1.9	0.54	850		37
	2500	13mm								36
