Heritage Statement

The application site is in close proximity to St Mary's C Of E Primary School and St Mary's C Of E Church both Grade II listed; as such this Heritage Statement has been prepared.

The proposals will have no impact on the School or the Church, albeit in a sensitive area the land that is to be fenced will neaten up the road frontage. The simple materials (timber) will not compete with the listed structures or detract from their prominence or heritage.

The proposed enclosure of the area of land is positioned opposite to the School and close to the Church on the corner but it is on the opposite side of the road so there is natural separation, it is out of sight and unobtrusive to the area of the School and Church.

The application is simple and this simple Heritage Statement has been prepared to emphasise the simplicity of the application.
