RAMSDEN FARM, ROUNDTORN ROAD, MIDDLETON, MANCHESTER, M24 1FT
PRELIMINARY RISK ASSESSMENT (DESK STUDY)

INTRODUCTION

A residential development is proposed. The objective is to carry out a desk study, supplemented with a walk over survey, to form a Preliminary Risk Assessment to consider contamination, landfill gas and geotechnical issues.

SITE LOCATION

The site is almost horn shaped with a main part about 150 x 90 metres narrowing to the south, located to the north of Roundthorn Road in Middleton and at OS Grid Reference 387650, 405370. The site was inspected on 14/09/18 by Mr M. Whitaker and comprises a vacant plot with two mounds, one in the centre up to 5 metres high and a mound along the southeast boundary up to about 8 metres.

To the east the ground sloped up at about 1 in 6. This area will not be developed. To the west of the road is a more level area where four detached houses, with gardens, will be built (see Topographical/Proposed drawing).

The site is on the edge of a residential area having houses to the southwest and southeast, and fields to the northwest, northeast and east.

TREES

There are a few small deciduous trees/shrubs around the site, with woodland concentrated around the perimeter, (see Watergrove proposal/aerial map).

This is not an accurate arboricultural survey.

PROPOSED DEVELOPMENT

It is proposed to build four houses on the main body of the site, with associated roadway, gardens, driveways and garages.

To obtain an access from Roundthorn Road, a road is proposed running north from Roundthorn Road dividing the site in two.

LEGAL/COPYRIGHT

Material may be included in this report from Ordnance Survey (Licence No. AL100031635), Landmark, Environment Agency, Coal Authority and others. It may be copyright and the usual restrictions apply. This report can only be relied upon if the invoice has been paid promptly and in full. This report may be signed by an individual, but only on behalf of Worms Eye Limited.

NOT INCLUDED IN THE REPORT

- Arboricultural Survey.
- Asbestos Survey
- Invasive Plant Survey (Japanese Knotweed etc.).
- Mining Risk Assessment.
- River/Tidal Flood Risk Assessment.
- Surface Water Flooding.
- Underground Services Survey.

General comments may be made with regards to the above where there are obvious features seen on site, in the data review or where they are applicable to the environmental and geotechnical risk assessment. These general comments do not constitute a detailed risk assessment.

DATA SOURCES

The following data sources have been viewed in compiling this report.

- BGS, Geology Map, 1:50000 scale, Solid and Drift Edition
- BGS, on-shore boreholes scans
- Landmark Envirocheck Report, 30.8.2018
- Ordnance Survey, Historical Maps, 1:10000 and 1:2500 scale
- Walkover Survey, 14/09/18

This report is referred to as a Preliminary Risk Assessment (PRA) and may involve a site inspection. Alternative names for such reports are 'Phase I' Report (Phase II being the intrusive work involving boreholes etc.) or a Desk Study.

ENVIRONMENTAL DATA

A Landmark Envirocheck report has been obtained for the site and geological maps have been reviewed, the following is a summary of the combined data. The Envirocheck report indicated none of the following within 250 metres:

- Contaminated land register entries
- Discharge consents
- Pollution incidents
- Substantiated pollution incidents
- Water abstraction points
- Source protection zones
- Radioactive sites
- Hazardous substances sites
- Fuel stations

Geology of Site

The geological map indicates that the underlying solid rocks are undefined strata, likely to be mudstone, of the Pennine Lower Coal Measures, dipping to the south.

Surface drift is shown as glacial sand and gravel of unknown thickness.

Natural subsidence hazards are shown as very low to no hazard.

Radon

The site is in a lower probability radon area as less than 1% of homes in the area are above the radon action level. Radon protection measures are not required.

Surface Water (Hydrology)

The nearest surface water feature is Wince Brook, 92 metres north.

Nearest abstraction point is 603 metres northwest.

The area slopes down to the northwest and the flow of surface water is expected to be in this direction.

Flooding - General

Information is obtained from the EA flood maps and suggests areas where rivers would flood. There are two zones:

- 'normal' flooding, based on a 1 in 100 chance of it happening in any year (1:200 if flooding is from the sea). This is normally closer to the river.
- 'extreme' flooding, further away from the river and having a 1 in 1000 chance.

Flooding can occur for many reasons other than those dealt with by the EA maps. These include:

- burst pipes
- blocked drains, sewers and culverts
- inadequate drainage
- cloudbursts/flash flooding overwhelming normally satisfactory drainage systems

Statements in this report such as 'clear of flooding/flood plain' and 'flooding – no further action' are references to the EA river and sea flood maps and are no guarantee that flooding will not occur.

Groundwater Flooding

The site is shown to be in an area with limited potential for groundwater flooding to occur.

Flooding from Rivers

The site is shown to be clear of flooding from rivers.

Surface Water Flooding

The southwest/middle of the site is shown to be at risk of 1 in 1000 year surface water flooding.

Groundwater (Hydrogeology)

The solid rocks and superficial (drift deposits) under the site are indicated as Secondary A aquifers.

Nearest abstraction point is 842 metres northwest.

Groundwater flow is likely to follow the topography and move to the northwest.

Landfill/Waste Sites

There is one historical landfill sites listed within 250 metres as follows:

- Former Times Mill, 108 metres northeast, information not supplied on waste type.

There are two licenced waste management facilities listed within 250 metres, as follows:

- 160 metres north, physical treatment facility, surrendered in 2014 *.
- 240 metres northeast, HCl waste TS and treatment, issued in 2013 *.

* not relevant due to distance/severity/significance

Filled Ground

Within 250 metres of the site there are the following suspected filled features:

- 26 metres south
- 40 metres northeast
- 150 metres northeast
- 180 metres west
- 226 metres west
- 242 metres northwest

Nearby Industry

There is one LAOOC listing within 250 metres, as follows:

- 205 metres north, PG6/8, textile and fabric coating of finishing processes in 2000, Authorised *.

There are five Trade Directory Entries listed within 200 metres, as follows:

- 12 metres south, T-shirts, active (registered office at house) *.
- 58 metres southeast, sewing machines, industrial, inactive (registered office at house) *.
- 59 metres east, waste disposal services, inactive (registered office at house) *.
- 140 metres northeast, cleaning services, domestic, active *.
- 186 metres northeast, tyre dealers, inactive *.

* not relevant due to distance/severity/significance/age

Sensitive Land Uses

Nitrate vulnerable zones on northwest of site *

* not relevant due to distance/severity/significance

SITE HISTORY

Date	On Site	Off Site
1848 1:10,560	Track runs southwest – northeast to Ramsden Farm on north/middle. Possible pond at northeast (small scale).	Sand pit 35 metres southeast. Wince Brook 95 metres north. Refuse heaps 330 metres southwest. Mostly undeveloped
1893 1:2,500	Ramsden Farm buildings on north of site. More clearly shown well on northeast boundary.	Pond 16 metres on southwest. Dane Mills (cotton) 140 metres northeast. Reservoir 185 metres northwest. Railway 220 metres northeast. Sand pit to southeast not present.
1909 1:2,500	New building on west of site.	Times Mill (cotton) 115 metres northeast. Central Iron Works 225 metres northwest. Filled ground 180 metres southeast.
1932 1:2,500	Little or no change.	Dane Mills, now Neva Mills.
1954 – 1957 1:1,250	Building on west of site demolished.	Large area of filled ground 40 metres southeast.
1968 – 1969 1:2,500	Two buildings (probable barns) at northwest/ middle and middle of site.	Railway to northeast now dismantled. Ponds southwest, filled. Housing southeast and southwest. School 150 metres southwest.
1973 – 1975 1:1,250	Little or no change.	Reservoir now filled. Neva Mills, demolished. Central Iron Works now Bowl Works.
1978 – 1992 1:1,250	Buildings at northwest/middle and middle demolished.	Works 120 metres north, 190 metres northwest, 190 northeast, 200 metres northeast and 205 metres northeast.
1992 1:1,250	Little or no change.	School to southwest, demolished and housing built.
2000	Little or no change	Houses immediately west.
2009 1:10,000	Building on-site demolished. Site is now a field.	No relevant change

*An internet search suggests the farm was subject to a fire circa 2005

DISCUSSION

Contamination

The site is a vacant plot with fields to the north, east, northwest and housing to the southeast, southwest and west.

There have previously been several farm buildings on-site, these are now demolished, following a fire circa 2005. Farms are potential sources of contaminants from use and storage of vehicles and materials exceeding residential thresholds.

Demolition rubble from the farm may be present on-site and this is another possible source of raised levels of contaminants.

The fire at the farm could also introduce contaminants to the ground. The fire can generate contaminants (especially hydrocarbons - PAHs) or release building materials (especially asbestos). The fire water can transport contaminants around the site.

There are no nearby land uses likely to affect the site and no pollution incidents on or close to the site.

The proposed development will be houses with gardens. Potential pollutant linkages are:

- Direct contact with soil.
- Ingestion of soil.
- From homegrown vegetables and soil attached to vegetables.
- Inhalation and ingestion of dust.
- Sulphate attack on buried concrete.
- Contaminants entering drinking water pipes.

Contaminants are expected to exceed residential thresholds and a moderate to high risk is possible

Controlled Waters

There is an underlying Secondary A aquifer beneath glacial sand and gravel.

Wince Brook is 92 metres north.

The gardens will allow rainwater to pass through the surface soils, potentially leaching out contaminants that may migrate towards the aquifer and Wince Brook. Bearing in mind the underlying sand and gravel, and distance to Wince Brook, a low to moderate risk is anticipated to controlled waters.

The well (if still present), may give an easier route for contaminants to migrate down to the aquifer.

Landfill Gas/Ground Gas

The site is within 250 metres of an historical landfill sites and six filled features within 250 metres of the site. These are potential sources of landfill and ground gases which could migrate to and present a risk to the development.

The underlying coal measures are a further possible gas source.

Bearing in mind the size of the filled areas, distance from the site and river between the site and the landfill, it is considered that there is likely to be a low risk to the development.

Radon

Radon protection measures are not required.

Flooding from Rivers and Seas

The Environment Agency maps show that this site is clear of flooding from rivers.

Groundwater and Surface Water Flooding

The southwest/middle of the site is shown to be at risk of 1 in 1000 year surface water flooding.

The site is shown to be in an area with limited potential for groundwater flooding to occur.

Foundations

It is expected that made ground may be present, with underlying sand and gravel. This can provide variable conditions for foundations and a range of options may need to be considered, including reinforced concrete raft to a piled foundation.

INDUSTRY PROFILE

The site was formerly a farm, which has burnt down in recent years.

Industry	Possible Contaminants
Potential Contaminants	Metals e.g.: copper, zinc, chromium, nickel, lead, cadmium, arsenic, Inorganic compounds: cyanide, sulphates Phenols Mineral oils/fuel oils/diesel/petrol (TPHs) Asbestos Pesticides General hydrocarbons (PAHs)

CONCEPTUAL MODEL

A conceptual model based on the source-pathway-receptor concept is included with this desk study to show the potential pollutant linkages with this site.

Source	Receptors	Pathway	Potential/Likely Pollutant Linkage
Asbestos	Construction workers	Inhalation	Yes
	End-users	Inhalation	Yes
	Off-site	Migration off-site	Yes
Inorganic contaminants	Construction workers	Short-term direct contact, inhalation of dust, ingestion	Yes
	Householders	Direct contact, ingestion, from home grown vegetables, ingestion and inhalation of dust	Yes
	Groundwater	Leaching towards	Unlikely
	River/stream	Leaching towards	Unlikely
Sulphate	Building fabric	Concrete directly in contact with soil	Possibly
Hydrocarbons	Construction workers	Short-term direct contact, inhalation of dust, ingestion	Yes
	Householders	Direct contact, ingestion, from home grown vegetables, ingestion and inhalation of dust	Yes
	Service pipes	Seeping into drinking water pipes	Yes
	Groundwater	Migrating towards	Possibly
	River/stream	Migrating/leaching towards	Possibly
Hydrocarbon vapours	Construction workers	Short-term inhalation	No
	Householders	Inhalation of vapours indoors and outdoors	No
Landfill gas	End-users - in buildings	Seeping into buildings, explosion, asphyxiation	Yes
Radon	End-users - in buildings	Seeping into buildings	No

CONCLUSION

Contamination

Taking into account the past use of the site it is thought likely that contamination will be present on the site, exceeding residential thresholds.

An intrusive investigation is required, consisting of boreholes/trial holes and tests to confirm the presence/absence and extent of contamination on the site.

The former farm buildings are specific point sources for contamination and the investigation will need to target these, proposed gardens (most sensitive part of the development), former well, proposed houses and provide all round coverage.

Controlled Waters

A low risk to controlled water is expected and no further action is considered necessary at this stage. This will need to be reviewed following the soil tests at which point leachate test and test on shallow water samples may be required.

Landfill Gas/Ground Gas

There are nearby landfill sites, filled features and underlying coal seams, which are potential gas sources.

A gas testing programme is required.

Radon

Radon protection measures are not required.

Flooding

The EA maps indicate that the area is clear of flooding from rivers.

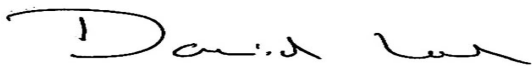

The maps suggest that the site could be subject to 1 in 1000 year surface water flooding. These maps are fairly crude and it is beyond the scope of this report to provide a comprehensive flood risk assessment.

Foundations

A series of boreholes are required in the area of the proposed building to allow the most suitable foundations to be designed.

Yours faithfully

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client. In the attached datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

132	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1956	A13NE (NE)	301	-	387838 405691
133	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1848	A8NW (S)	375	-	387557 404916
134	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1956	A8NW (S)	385	-	387651 404897
135	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1848	A12SE (SW)	448	-	387232 405090
136	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1848	A14NW (E)	449	-	388151 405469
137	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1848	A12NE (NW)	501	-	387210 405687
138	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1932	A14NW (E)	545	-	388240 405511
139	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1932	A14NW (E)	546	-	388231 405552
140	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1848	A8NW (S)	560	-	387644 404722
141	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1910	A12SE (W)	591	-	387058 405133
142	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1848	A8NE (S)	592	-	387882 404741
143	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1848	A8NE (SE)	622	-	387938 404735
144	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1956	A9NW (SE)	633	-	388122 404868
145	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1848	A8NE (SE)	640	-	387963 404728
146	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1848	A12SE (SW)	643	-	387038 405041
147	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1848	A14NW (NE)	645	-	388302 405647
148	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1956	A8SW (S)	656	-	387372 404683
149	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1848	A14SW (SE)	663	-	388298 405091
150	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1848	A18NW (N)	671	-	387454 406093
151	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1956	A18NW (N)	685	-	387622 406137

Lancashire And Furness

Published 1848

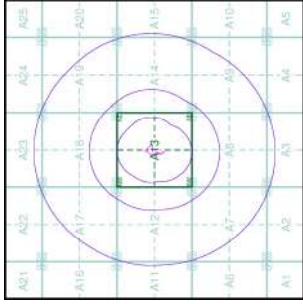

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, which were adopted for England, Wales and Scotland in the 1840's. In 1854, the Ordnance Survey published the first 1:10,560 scale maps. These maps were used to update the 1:10,560 maps. The published date of the maps is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear 'unfinished', with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Lancashire And Furness

Published 1893

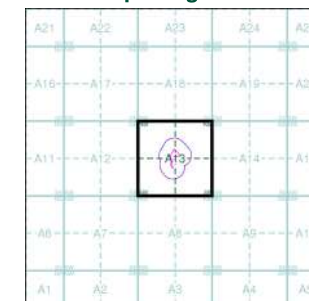

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Supply of Unpublished Survey Information

Published 1973 - 1975

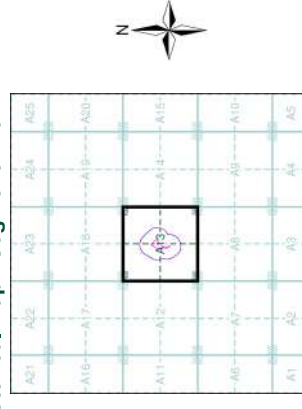

Source map scale - 1:1,250

SUSI maps (Supply of Unpublished Survey Information) were produced between 1972 and 1977, mainly for internal use at Ordnance Survey. These were more of a check-progress plan as they showed updates of individual single map sheets. These maps are unpublished, but they do not represent a single moment in time. They were produced at both 1:2,500 and 1:1,250 scales.
