FAO Majid Mir

Majid,

Thank you for consulting GMAAS on this application to discharge archaeological condition (11) on approved Listed Building Consent application 23/00508/LBC.

North Star Archaeology has prepared a report on the results of a scheme of historic building recording at the site, undertaken in accordance with a WSI that had previously been approved by GMAAS. GMAAS was given the opportunity to review a draft of the report in summer 2024; we provided some comments detailing the requirement of some minor amendments, and a revised and finalised report was shared with us in August. The finalised report has now been provided in support of this application for condition discharge.

The work has added to a growing body of research into the origins and development of 18th to 19th century farms in the Pennine fringe uplands, and a copy of the report will be accessioned to the GM Historic Environment Record making it a publicly accessible document - which, in this instance, meets the requirements for dissemination set out in the condition. The report also provides details regarding the digital archive from the project.

GMAAS is able to recommend that **Condition 11 can now be fully discharged**.

Kind regards,

Ben
