

23/00632/WTTPO – Cecil Street

Tree Report

Company:

Total groundcare solutions

Tree Identification & quantity:

Ash x 1

Tree condition & issues:

Medium to large (35-40ft) tree showing obvious signs of Ash die back around the entire tree, several large branches have died back completely which could cause significant damage or injury if they break off in windy conditions.

Tree location:

Situated at the rear of property with garages and cars park underneath, a small side road and footpath also runs under the lower branches.

Work recommended:

Removal of deadwood would only be a short term fix to the problem, my view is that the tree needs to be felled
