- ▲ Beaumaris Woodstone Maxi Bat Box x4
- ▲ Habibat Brick Faced Bat Box x11
- Habibat Small Bird Box x10
- Schwegler 1SP House Sparrow Terrace x5
- Habibat Swift Box x10

Notes

Bat boxes are to be installed at the highest possible points (minimum 4m from ground level). All boxes are to be located facing south to southeast to allow the box to be warmed by the sun. They should not be placed where the flight path would be blocked by obstructions or vegetation and should be placed in sheltered locations.

All bird boxes are to be positioned facing between north and east to avoid strong sunlight and strong winds. They should not be placed where the flight path would be blocked by obstructions or vegetation and should be placed in sheltered locations.

Swift boxes are to be installed as high as possible directly underneath a roof or gutter.

House Sparrow terraces are to be installed at a minimum of 2.5m above ground level and if possible near to vegetation.

Small bird boxes are to be installed at a minimum of 2.5m above the ground.

Boxes of similar specifications but different brands may be used. The current plan should be implemented following the review of a risk assessment where working at height is required.
