1.0 INTRODUCTION

This statement accompanies an application for Planning Consent to change of use of first and second floors from a Training Centre to three self-contained flats, insertion of dormers to rear, rooflights and door to front.

Guidance for heritage statements emphasises the need for the documents to be appropriate in length. The nature of the property, which encompasses a number of distinct elements with different features, the extent of the proposed works and the designation and surrounding architectural buildings have driven the length of this document.

The application site relates to 29-31 Drake Street, a two storey mid-terraced property positioned in Rochdale town centre and situated within the Rochdale Town Centre Conservation Area. The building is close to Butterworth Brothers Diamond Merchants (14 Drake Street) which is a heritage asset, and close to The Duke of Wellington Hotel (Grade II listed) located at the bottom of Drake Street.

The application building is two stories high with a contemporary glazed shopfront. In more recent years the building has stood empty. A two-storey flat roof red brick outrigger is attached to the rear. The front of the building was originally red brick and has been rendered over. The rear elevation retains original materials. A small yard area is retained to the rear.

2.0 PLANNING POLICY

The key theme of delivering sustainable development is at the core of all the policies and objectives in this document. Sustainable development incorporates not only an environmental role (protection of heritage and townscape assets of value), but also a social role (supporting the communities health and social needs) and economic role (contributing to building a strong, competitive and responsive economy by supporting growth and the provision of infrastructure).

There is a presumption in favour of sustainable development. This means approving development that accords with the development plan without delay (where the development plan is up to date) and (where the development plan is silent), granting permission unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the Framework taken as a whole.

Section 66 of the Planning (Listed Buildings and Conservation Areas) Act 1990 (as amended) states that in considering whether to grant planning permission for development which affects a listed building or its setting, the local planning authority shall have special regard to the desirability of preserving the building or its setting or any features of special architectural or historic interest which it possesses.

Policy P2 of the Rochdale Core Strategy sets out that the Council will conserve, enhance and promote key heritage assets, including consideration of their wider settings.

‘Significance’ with regard to heritage assets is defined by the NPPF as: ‘The value of a heritage asset to this and future generations because of its heritage interest. That interest may be archaeological, architectural, artistic or historic. Significance derives not only from a heritage asset’s physical presence, but also from its setting.’

Planning practice guidance identifies that substantial harm is a high test and may not arise in many cases. Whether a proposal causes substantial harm will be a judgment for the decision taker, having regard to the circumstances of the case and the policy in the National Planning Policy Framework. In determining whether works to a listed building constitute substantial harm, an important consideration would be whether the adverse impact seriously affects a key element of its special architectural or historic interest. It is the degree of harm to the asset’s significance rather than the scale of the development that is to be assessed. The harm may arise from works to the asset or from development within its setting.

When considering potential impacts, the **NPPF** provides the guidance below-;

193. When considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation (and the more important the asset, the greater the weight should be). This is irrespective of whether any potential harm amounts to substantial harm, total loss or less than substantial harm to its significance.

196. Where a development proposal will lead to less than substantial harm to the significance of a designated heritage asset, this harm should be weighed against the public benefits of the proposal including, where appropriate, securing its optimum viable use.

197. The effect of an application on the significance of a non-designated heritage asset should be taken into account in determining the application. In weighing applications that directly or indirectly affect non-designated heritage assets, a balanced judgement will be required having regard to the scale of any harm or loss and the significance of the heritage asset.

198. Local planning authorities should not permit the loss of the whole or part of a heritage asset without taking all reasonable steps to ensure the new development will proceed after the loss has occurred.

ROCHDALE CORE STRATEGY - ADOPTED OCTOBER 2016

Policy DM1: General Development Requirements This seeks to ensure that new development meets a range or criteria including: a) Are of a high quality of design and take the opportunity to enhance the quality of the area b) Are compatible with surrounding land uses c) Do not adversely affect the amenity of residents through visual intrusion, overbearing impact, overshadowing or loss of privacy e) Provide satisfactory vehicle access and parking h) Minimise opportunities for crime against people or property

Policy P2: Protecting and enhancing character, landscape and heritage. This seeks to protect and enhance the Borough's character through amongst other things; Conserving and enhancing townscape character and conserving, enhancing and promoting key heritage assets both statutory and non-statutory

Policy P3 of the adopted Core Strategy requires all new developments, regardless of location in the borough, to adhere to high standards of design.

3.0 LISTED STATUS AND SURROUNDING BUILDINGS - LISTINGS

Overall, Drake Street is well-recognised and greatly cherished with many buildings of local importance to Rochdale's history and identity. There are high levels of vacancies along Drake Street indicating market failure and some buildings are now in a very poor state of repair, most notably the former Iveson's furniture store and warehouse, a much loved Rochdale landmark.

At its northern extent, Drake Street sweeps around onto South Parade. The buildings on the eastern end of the South Parade represent a continuation of the buildings at the bottom of Church Lane and Drake Street as they attractively turn the corner onto South Parade. The sweeping corner is a reminder that this was once a busy and difficult bend to navigate. The buildings are characteristically plain Georgian three storey shops of stuccoed brick with stone lintels. They have suffered some mutilation, such as the removal of the historic chimneys and the loss of the stone flagged roofs, and presently are not looking their best.

Butterworth Brothers Diamond Merchants (14 Drake Street)

Butterworth Bros shop was established in 1903, although the building itself was built in 1896. The Butterworth family is one of the longest established in Rochdale. Butterworth Bros is prominently positioned at the junction of Drake Street and Church Lane and has a highly attractive shop front that reinforces the character of Drake Street as a historical shopping street. The front façade of the building has a soft curved shape and is orientated for maximum visibility looking up Drake Street from the Butts. The building is split over three floors and is built of brick with sandstone cills and lintels, string courses, cornice and coping stones to the parapet. The traditional dark brown, gold and cream shop front is particularly attractive. In 1981 it underwent an extensive renovation. The delicate carving of the original front was faithfully reproduced but only the top fascia of the original frontage remains.

The Duke of Wellington Hotel (Grade II listed)

At the bottom of Drake Street, opposite the curved frontage onto South Parade, is the Former Duke of Wellington Hotel which was opened in 1810. Before The Wellington, it was the Smith Family townhouse and the built date is thought to be around 1750. The Smiths were a merchant family with strong trading

connections to Portugal. This was their town residence and they spent summertime a short distance away at Summer Castle, a now demolished residence on the hillside to the south east of Drake Street. Although now

demolished, Summer Castle and its windmill can be seen in old paintings of South Parade and what is now the bottom of Drake Street. The building has significance as the backdrop to Rochdale's political development. As the leading coach house in the town it would have been busy with travellers, locals and merchants debating and exchanging ideas. Between 1825 and 1839 the Commissioners of Police held their first meeting at the Hotel. The immediate area outside the Wellington was known as Speaker's corner and hustings were last erected opposite the Wellington Hotel on November 16th, 1868, when 10,000 people were estimated to be present.

4.0 PROPOSAL IMPACT

This site is located within the Rochdale Town Centre Conservation Area and is close to 14 Drake Street which is a non-designated heritage asset. The grade II Listed Wellington Hotel is a short distance from the proposed site. The building at 29-31 Drake Street appears Georgian, this is due to Georgian styles of the neighbouring properties, although the building itself has no notable features to suggest this. Also, the building itself does not have any features of architectural interest.

Whilst many of Rochdale's heritage assets are in use and well maintained, problems occur when buildings fall out of use and/or are not easily adaptable to alternative uses, thus falling into a state of neglect and disrepair. Heritage at risk of being lost through vacancy, neglect or decay is a significant issue in Rochdale. Vacant and poorly maintained heritage assets are more likely to fall into disrepair and this can ultimately lead to the partial, or complete, loss of the asset itself and the character of the area of which they are irreplaceable components.

The poor management and maintenance of heritage assets can detract from their ability to meet their intended function, as well as significantly detract from the environmental quality and attractiveness of the town. This can have a wider range of impacts, such as acting as a disincentive to investment in the area, increasing crime and the fear of crime and creating a poor image of a neighbourhood. Securing appropriate, viable and continued use of Rochdale's heritage assets should therefore be an important priority as this will help manage those heritage assets already at risk and prevent further assets falling into disrepair.

The application proposes the change of use of the first and second floors of the building, including the insertion of rooflights and two dormers to the rear door to the front. These external alterations have been carefully designed to not have a negative impact on the appearance of the property and its surrounding area.

Para 201 of the NPPF states with regard to conservation areas that not all elements will necessarily contribute to its significance'. The application property makes a neutral contribution to the character and appearance of the Conservation Area. The minor alterations will have a neutral impact on the character and appearance of the Conservation Area.

Internally, this proposal seeks to refurbish and redecorate the building with a suitable use and function.

It is considered the proposal would conserve the area's unique heritage, by bringing a new and appropriate use to building, encouraging sensitive new development and refurbishing historic buildings in such a way that enhances and conserves the special character of the area.

Furthermore, this application would stimulate new investment by encouraging a stronger and more diverse economy in the daytime and evenings. The property would be improved and through this would create enhancements to the physical fabric of the area, securing the future of the building. A diverse, mixed-use character will ensure a stronger local economy, which enhances the town Centre offer.

In addition, the minimal external change to the building would not result in the loss of the original form that would be harmful to the heritage asset, the Conservation Area and surrounding Listed Buildings. The reuse of the building would ensure and secure a viable and complementary use for this building. As such, and on balance, the changes are considered to have a neutral impact and are justified. The building through this application would revitalise an area which currently makes a contribution to the town centre area and setting of surrounding important buildings. This proposal would neutralise the impact where this can be achieved through the sympathetic reuse of the redundant building located within the town centre and should be supported by the Council.

There is great potential for mixed use development that builds on the area's history of independent shops and finds new uses for larger properties that punctuate the street. The proposal would help regenerate this historic gateway and introduce a use for the site to ensure that it is an attractive place to live, work, play and visit.

Overall, the proposal is not considered detrimental to the historic environment, the character and setting of any listed buildings. The proposals are therefore considered to be in line with policies in the UDP, the above-mentioned SPD's and, National Planning Policy Framework.

5.0 CONCLUSION

The existing building is not listed, either nationally or locally. Nevertheless, whilst there is no impact on any designated heritage assets, the building does retain some heritage value located in the town centre Conservation Area. A Heritage Assessment has therefore been provided in support of the application, the conclusions of which are summarised below. In brief, the significance of the building derives from its architectural and historic interest as being within the Conservation Area, but the extent of previous internal alterations to the building are such that this heritage interest is very limited. The property sits in a prominent position on Drake Street. The Heritage Impact Assessment concludes that extent of external and internal alterations is such that the building has little to no evidential value.

Although the existing building is not subject to any formal heritage designations, it nevertheless has heritage value, and has long been a feature of the local area. For the reasons set out above, it has already been demonstrated that the continued use of the building as a training centre is not viable due to the changes in demand, so the long-term use of this building depends upon approval of the planning permission.

In conclusion, the application would not harm the character or appearance of the street scene, conservation area or the setting of the heritage assets and listed buildings. The application therefore accords with Policies DM1, P2 and P3 of the adopted Core Strategy, Policy BE/17 of the UDP and the NPPF, in addition to Sections 66 and 72 of the 1990 Act.
