1.0 INTRODUCTION

Instructions

- 1.1 This Transport Statement has been prepared in accordance with instructions from Architecture Unknown, on behalf of their client Mr M. Suleman, to support a planning application to Rochdale Borough Council for the proposed change of use of the Middleton Conservative Club to a new community and cultural events space.
- 1.2 The purpose of this Transport Statement is to provide an assessment of the proposed development in relation to Paragraphs 109 and 116 of the National Planning Policy Framework 2025, and Policy T2 of the Rochdale Core Strategy. The report will examine the effects of the proposed development within the local highway network and provide an overview of the public transport and active travel opportunities to encourage modal shift to more sustainable travel options.

Guidance and Pre-Application Advice

- 1.3 A pre-application enquiry was made to Rochdale Borough Council regarding the proposed development. The enquiry was given the reference PREAPP/00090/23, and a response was received on 20th May 2024. The response from a highways and transport perspective can be summarised as follows:
- The Local Highway Authority have no objections to the proposals in principle; however, it is recommended that a *Transport Study* be undertaken to determine traffic generation, and compliance with maximum parking standards. Refuse collection should be arranged privately.
- 1.4 Paragraph 109 of the NPPF states that transport planning should be integrated into the early stages of development, ensuring sustainable, high-quality places. This includes assessing and addressing potential impact of development on transport networks, realising opportunities from existing or proposed transport infrastructure, and identifying and pursuing opportunities to promote walking, cycling, and public transport use.
- 1.5 Paragraph 116 of the NPPF states that *“Development should only be prevented or refused on highway grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impact on the road network, following mitigation, would be severe, taking into account all reasonable future scenarios”*.

2.0 EXISTING NETWORK

Site Location

- 2.1 The site is located within Middleton Town Centre, within the property known as 77 Long Street, Middleton, M24 6UN. The site has a total site area of 0.3ha, and comprises a detached 2-storey building, a small car park to the front, and a bowling green to the rear. A small row of shops exits underneath the car park, with the frontage immediately onto Long Street.

Figure 1 - Approximate Site Location (Contains OS Data).

- 2.2 The site is currently accessed off Long Street, one of the primary urban distributor routes through Middleton Town Centre. The site is located approximately 420m to the north east from the Middleton Shopping Centre, and 1.6km to the west of Mill Hill Railway Station.

Existing Traffic Conditions

- 2.3 Long Street forms part of the A664 which forms part of the primary urban distributor route connecting Manchester to Rochdale via Middleton. Long Street also serves a number of minor roads, including Durnford Street and Cemetery Street. Long Street is subject to the urban speed limit of 30MPH, with footways on either side of the carriageway.

- 2.4 The site access is located 80m to the north of the roundabout where Long Street meets Eastway and Market Place. Bus stops are also located immediately outside the site on Long Street. There are no formal public rights of way across the site.

Accident History

- 2.5 Recent accident records for the last 5-years for all junctions off Long Street within 100m of the site access have been analysed using the *CrashMap* (www.crashmap.co.uk) web application.
- 2.6 The results show that no accidents have occurred immediately adjacent to the existing site access off Long Street. However, a search of all junctions within a 100m radius of the site access provided results of 1no. accident within the search area during the 5-year search period. The incident occurred at the roundabout of Long Street and Eastway, with full details available in Appendix A:
- Accident reference 2022061250780 occurred on 24th November 2022 at 06:50 when a vehicle entered the roundabout and collided with a cyclist proceeding normally along the carriageway, causing injury to the cyclist. The accident was categorised as 'slight'.
- 2.7 From the information provided by the accident report, the incident appears to be a typical accident which would occur on any urban distributor road of this nature. There is no evidence to suggest that the accident rate would increase as a result of the proposed development.

3.0 PROPOSED DEVELOPMENT

Land Use

- 3.1 The development proposes internal refurbishments and external renovations to the existing historic façade of the former Conservative Club, located at 77 Long Street, Middleton. The building is proposed to be used for a new multi-use events space for weddings, ceremonial gatherings, and other community events.
- 3.2 A new 2-storey side extension will provide suitable access to both floors of the existing building. The extension will provide a Part K complaint staircase and a new Part M compliant lift service. The side extension will provide a new lobby and reception area for guests.
- 3.3 A new car park is proposed to the rear of the building, which will be accessed via a ramp that will connect to the existing car park at the front of the property. The new car park will provide a total of approximately 38no. parking spaces, providing a total of 53no. parking spaces within the site, and will utilise sustainable drainage techniques to provide various biodiversity enhancements.

Access Arrangements

- 3.4 The proposed development will take access off Long Street via the existing dropped kerb access which served the site when it was the Middleton Conservative Club, and the former Kohinoor Banqueting Hall. The existing access will provide both pedestrian and vehicular access to the site.
- 3.5 The proposed development does not propose any alterations to the existing access, and as such no assessment of the existing access is deemed necessary.

Parking Arrangements

- 3.6 In order to assess the development's requirement for parking, Appendix 5 of the Rochdale Core Strategy *Schedule of Parking Standards* was consulted. While the site does not fall into a specific category, it is considered that *Assembly and Leisure* use was the most appropriate. As the site would be used for social gatherings and cultural events, it was considered that the *Conference Centre* sub-land use would have a similar parking need to that of the proposed land use given that wedding guests would likely arrive by private car or car-share, as this would likely be the most practical transport method to the site when one is dressed in formal attire.

- 3.7 The applicant has set out that the maximum capacity of the event centre will be approximately 350 people at any one time. Therefore, consulting the parameters of Appendix 5 of the Rochdale Core Strategy sets out the following maximum parking requirements for the development:
- Conference Centre – 1no. space per 6no. seats.
 - 350no. seats = 58no. parking spaces.
- 3.8 The proposed development will provide 58no. parking spaces as shown on the drawings prepared by Architecture Unknown. Additionally, the site's Town Centre location, and access to various public transport services which will assist in reducing the overall reliance on car journeys.
- 3.9 Further details of how vehicles will move through the development is set out within the drawing AU-1817-01-HW-001 *Movement Strategy*.

Servicing

- 3.10 The proposed development will be served by a private refuse collection service, as it would have when it previously operated as the Middleton Conservative Club and the Kohinoor Banqueting Hall. Refuse collection will be taken from the front of the building, as it would have historically. All deliveries and refuse collection will be undertaken outside of scheduled event times in order to maintain safe operation of the site's internal roads. It is understood that the lower car parking area permits vehicles with a weight of up to 3-tonnes to use this area.
- 3.11 The access arrangements will not preclude access for emergency services or delivery vehicles to the site.

4.0 TRAFFIC IMPACT

Existing Generated Traffic

- 4.1 The site has had a similar use to the proposed development in the form of its former use as the Middleton Conservative Club and the Kohinoor Banqueting Hall. While the Conservative Club acted as a social club, with more informal events, the Club would previously have been used of large social gatherings such as community events, banquets, and celebratory events. The original building has an approximate GFA of 770sqm.
- 4.2 While there is no exact typical trip rate for this type of land use for the development, it is considered that the Land Use Category *7/Q Community Centre* was an appropriate land use, given that the site provides similar community and cultural event space to that of a community centre. A review of the available land use databases considered that the following parameters would be representative to the site's extant and proposed land:
- Land Use: 7 – Leisure
 - Category: Q – Community Centre
 - Range: 350-800sqm
 - Location: Edge of Town Centre.
- 4.3 As the site is no longer functioning as a Banqueting Hall or Social Club, it was therefore not possible to attain exact traffic generation from these uses. As such, as typical trip rates assessment using first principles approach has been undertaken using the trip rate parameters above. Consequently, the exercise in Table 1 below sets out the extant trip generation from the site.

Table 1 - Existing Trip Generation.

Use	AM Peak			PM Peak		
	Arr.	Dep.	2-Way	Arr.	Dep.	2-Way
Trip Rate	0.878	0.132	1.01	1.097	0.57	1.667
Development Trips	7	1	8	8	4	13
Total Daily Trips						
	Arr.		Dep.	2-Way		
Daily Trip Rate	6.63		6.884	13.514		
Total Development Trips	51		53	104		

Development Generated Traffic

- 4.4 The predicted traffic generated by the proposed development has been calculated using the same typical trip rates using the same land-use parameters set out within paragraph 4.2 and the above Table 1. This methodology has been selected because the proposed land use of the events venue will provide a similar offering to the former Social Club and Banqueting Hall in the form of community and cultural events such as weddings, ceremonial gatherings, and other community events. The majority of the proposed development related to internal and external renovations, with a small side extension proposed which will provide an ancillary reception area for the main building, increasing the overall GFA to approximately 970sqm.
- 4.5 The predicted generated traffic is set out below, with a full report of trip rates available within Appendix C of this report.

Table 2 - Predicted Generated Trips.

Use	AM Peak			PM Peak		
	Arr.	Dep.	2-Way	Arr.	Dep.	2-Way
Trip Rate	0.878	0.132	1.01	1.097	0.57	1.667
Development Trips	9	1	10	11	6	16
Total Daily Trips						
	Arr.		Dep.	2-Way		
Daily Trip Rate	6.63		6.884	13.514		
Total Development Trips	64		67	131		

- 4.6 Following this, a trip comparison exercise has been undertaken to understand the overall difference in trips, as shown in Table 3 below.

Table 3 - Development Trip Comparison.

Use	AM Peak			PM Peak		
	Arr.	Dep.	2-Way	Arr.	Dep.	2-Way
Existing Trips	7	1	8	8	4	13
Proposed Trips	9	1	10	11	6	16
Net Difference	+2	0	+2	+2	+1	+3
Total Daily Trips						
	Arr.		Dep.		2-Way	
Existing Trips	51		53		104	
Proposed Trips	64		67		131	
Net Difference	+13		+14		+27	

- 4.7 As can be seen from Table 3, above, the trip generation from the proposed development will have a marginal net increase of trips which, which is expected as the overall capacity of the events venue will increase with the addition of the ancillary reception area. Based on the above trip generation, the proposed development would likely generate a maximum increase of 27no. total two-way trips over the existing building area. However, only an increase of 3no. two-way trips would be within the peak hour.
- 4.8 Highway traffic impact is typically considered to be material where traffic flows exceed existing flows by 30-movements within the peak hour. The overall volume of traffic generated by the proposed development during the peak hour does not warrant the need for further investigations.
- 4.9 Given the location of the site within Middleton Town Centre, it must also be acknowledged that opportunities for travelling to and from the site by sustainable means should be considered. Therefore, a number of trips can be undertaken by foot, as well as by bicycle and public transport. This is explored further in the following sections of this report.

5.0 SUSTAINABLE TRAVEL ASSESSMENT

- 5.1 In accordance with Paragraph 109 of the NPPF, new development should consider how users of the development will be able to access the site via active travel means. A review of the accessibility of the site by various sustainable modes has been undertaken.

Walking

- 5.2 Walking is the ultimate sustainable travel method. Every journey begins and ends with walking, so this is the mode of transport that should be a primary consideration. The threshold for appropriate walking distances to and from key services and amenities is set out within the 2015 CIHT guidance document *Planning for Walking* and describes how approximately 80% of all journeys under 1-mile are made on foot. The CIHT document identifies the preferred maximum acceptable walking distances for different destination types can be summarised below:

Table 4 - Suggested Acceptable Walking Distances (CIHT, 2015).

	Town Centre	Commuting	Elsewhere
Desirable	200m	500m	400m
Acceptable	400m	1000m	800m
Preferred Maximum	800m	2000m	1200m

- 5.3 It should be noted that the distance identified should be regarded as guidance and that there should also be emphasis places upon the quality, attractiveness, and directness of pedestrian facilities/routes. The geographical areas that are within the acceptable walking distance of the proposed development are illustrated within Figure 2 below. More important than distance is the time to travel to locations from the development which must also be considered.

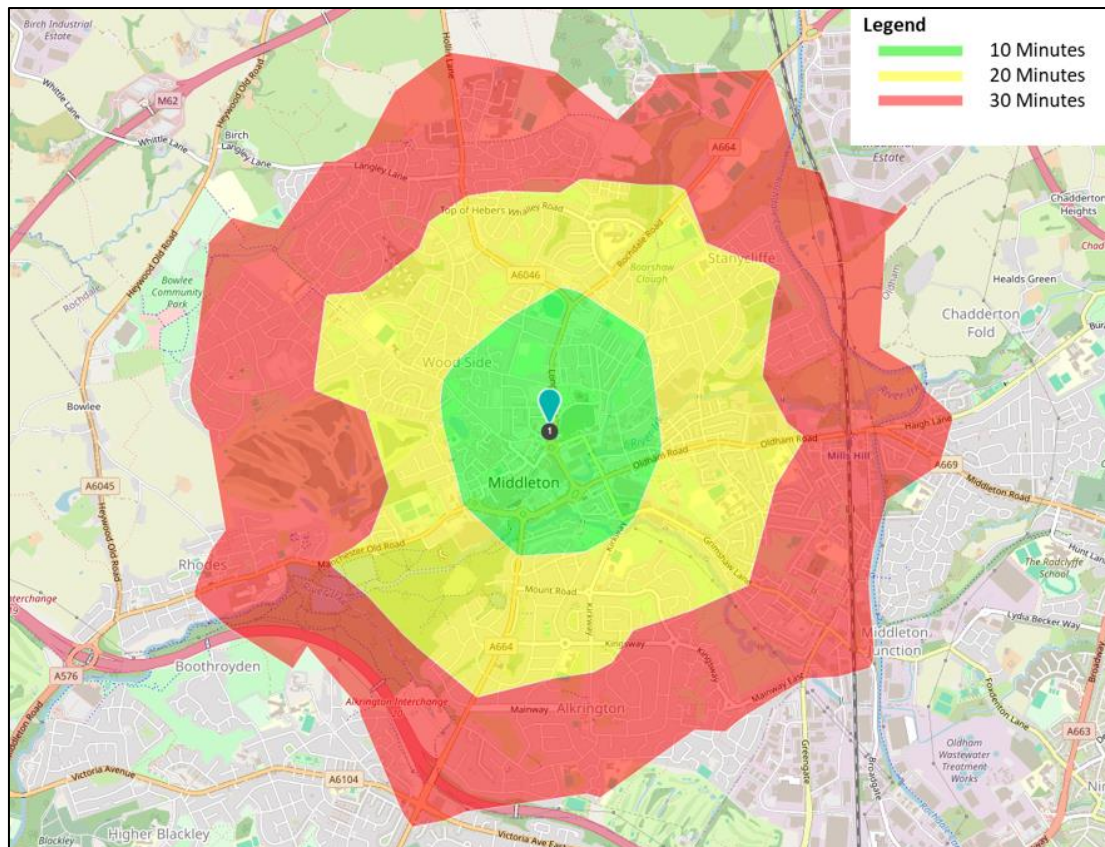

Figure 2 - Walking Isochrones (*Open Street Map*).

- 5.4 As can be seen from Figure 2, the site is within walking distance of all of Middleton Town Centre, including the Middleton Bus Station, Middleton Shopping Centre, Middleton Arena, and Jubilee Park. In addition, many inner residential areas of the town can also be reached within a 10–20-minute walk from the site. Mills Hill Railway Station is accessible within a 30-minute walk from the site.

Cycling

- 5.5 Cycling is an effective mode of travel for medium distances that practically preclude walking. It provides fast, direct access and has no limitations upon arrival and departure times. It is due to this flexibility that cycling has seen a resurgence and is the mode of choice for many commuters. It also enables the rider to get some exercise as part of their commute.
- 5.6 Figure 3 below shows the area which can be accessed within a 30-minute cycle trip from the application site. All of Middleton can be reached within a 10-20-minute cycle from the site, with Mills Hill Railway Station accessible within a 10-minute cycle from the site. The western areas of Chadderton and Oldham, and the southern areas of Rochdale and Heywood can be reached within a 20-minute cycle from the site.

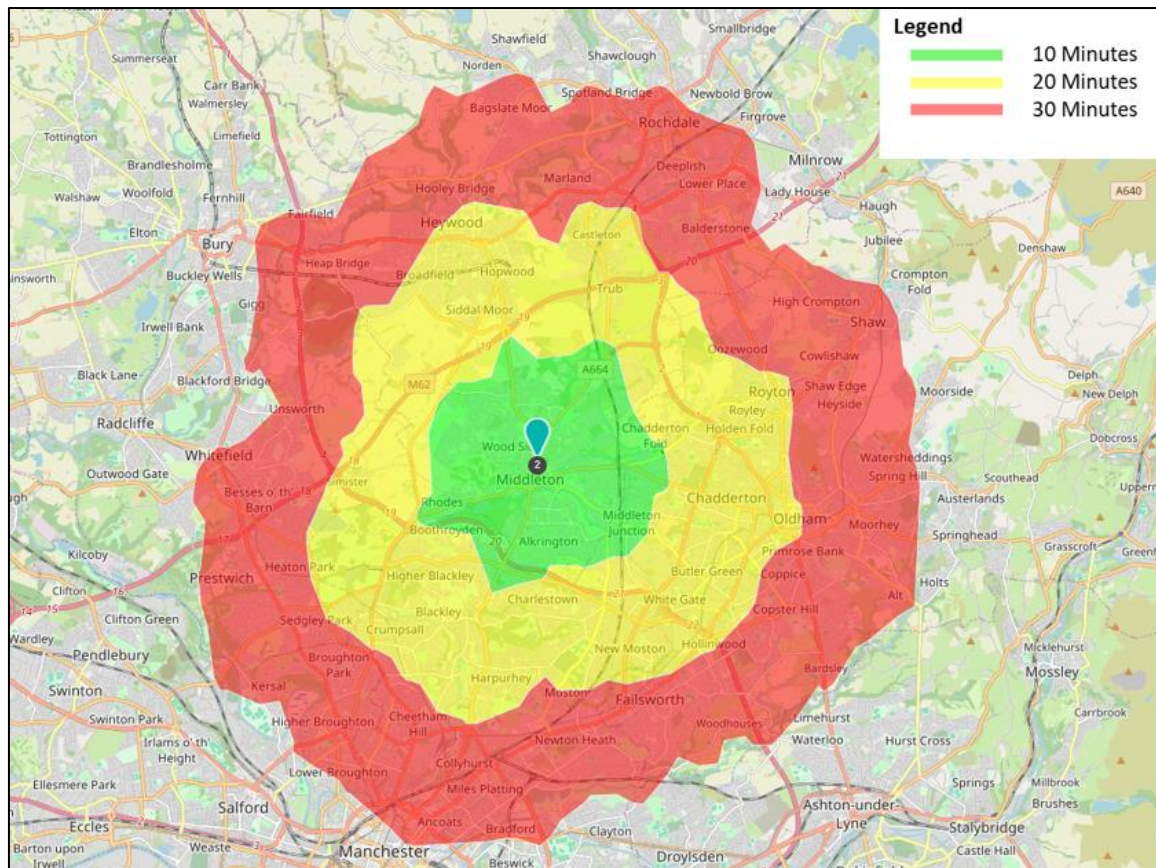

Figure 3 - Cycling Isochrones (*Open Street Map*).

Public Transport

- 5.7 Bus services are available directly outside the site entrance on Long Street. These services can be summarised below, with further services also available from bus stops on Market Place (120m to the east), and Eastway, 170m to the south). These services can be summarised as below, with timetables available within Appendix D of this report.

Table 5 - Bus Services from Long Street (*Traveline*).

Route No.	Terminus	Days	Frequency	Operator
Services from Long Street				
17	Rochdale Interchange – Shudehill Interchange	Mon – Fri Sat Sun	10-Minutes 10-Minutes 15-Minutes	Bee Network
125	Heywood - Rhodes	Mon – Fri Sat Sun	60-Minutes 60-Minutes No Service	Bee Network

Table 6 - Bus Services from Market Place and Eastway (*Traveline*).

Route No.	Terminus	Days	Frequency	Operator
Services from Market Place				
129	Middleton Circular	Mon – Fri	60-Minutes	Bee Network
		Sat	60-Minutes	
		Sun	60-Minutes	
415	Middleton Bus Station – Oldham Bus Station	Mon – Fri	60-Minutes	Bee Network
		Sat	60-Minutes	
		Sun	60-Minutes	
Services from Eastway				
163	Bury Interchange – Piccadilly Gardens	Mon – Fri	10-Minutes	Bee Network
		Sat	12-Minutes	
		Sun	15-Minutes	
18	Langley – Shudehill Interchange	Mon-Fri	10-Minutes	Bee Network
		Sat	15-Minutes	
		Sun	15-Minutes	

5.8 From a review of the above availability of bus services from nearby stops, it is considered that a high-level of public transport provision is available from the development site which provides excellent coverage between the site, Middleton, Rochdale, Oldham, Bury, and Manchester City Centre.

5.9 In addition to bus services, Mills Hill Railway station is accessible within a 30-minute walk or a 10-minute cycle from the site. Services calling at the station are listed below:

Table 7 - Destinations from Mills Hill Railway Station (*National Rail*).

Mills Hill Railway Station		
Start	End	Operator
Rochdale	Clitheroe (<i>via Manchester Victoria, Bolton, and Blackburn</i>)	Northern

Sustainable Travel Summary

- 5.10 As can be seen from the above, the site is well served by public transport, leading to the potential practical uses as an alternative to the private car. It can also be shown that the availability of public transport from the site will create the opportunity for multi-modal trips using a mix of active travel and public transport.
- 5.11 These sustainable transport measures will have the effect of depressing vehicular trip rates referred to in Section 4 of this report. While it is not possible to quantify such benefits, the presence of these measures will provide confidence that the overall traffic impact from the development will be minimal, and the proposed parking provision will be sufficient to cater for the development.

6.0 CONCLUSIONS

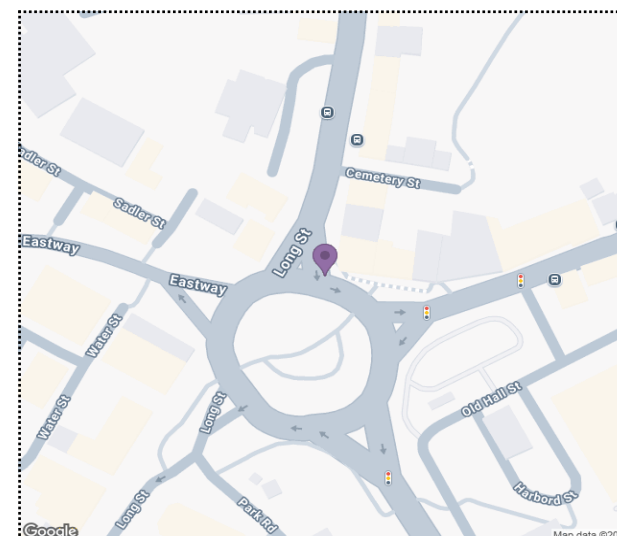

- 6.1 This Transport Statement has been prepared to support a planning application to Rochdale Borough Council for the proposed change of use of the Middleton Conservative Club to a new community and cultural events venue at 77 Long Street, Middleton, Greater Manchester, M24 6UN.
- 6.2 It may be concluded from this report that the existing highway network will operate safely in providing access to the proposed development. In particular:
- The proposed two-way trips are not considered to have any material impact on the peak hour traffic flows. The overall volume of traffic in any given hour does not warrant the need for additional capacity analysis.
 - In view of the low accident record on the nearby highway network and the estimated traffic impact, the proposed development will not be detrimental to highway safety and thus is compliant with Paragraph 116 of the NPPF.
 - The site has excellent access to public transport facilities, and many local services, and residential areas can be reached by walking and cycling.
- 6.3 With regard to parking provision, the proposed development will provide a total of 58no. parking spaces. To achieve the parking provision to cater for the development, the rear derelict bowling green will be converted into a new car park area, which will be permeably paved, and include sustainable drainage techniques. A Movement Strategy is shown on the drawing AU-1817-01-HW-001 *Movement Strategy* to demonstrate how development traffic will be managed during events. The proposed development will not seek to alter the existing vehicular access arrangements off Long Street.
- 6.4 With reference to the policy statements in Paragraph 116 of the NPPF, any residual cumulative impact of the proposed development on the highway network could in no way be considered 'severe', nor would there be any 'unacceptable' impact on highway safety.
- 6.5 Overall, the proposed development will be adequately served in terms of access and transport without creating any perceptible impact on the existing local network in terms of traffic flow or highway safety.
