Consultation Response on behalf of Head of Highways and Engineering

Application: 25-00507-FUL

Date Received: 18 June 2025

Date of Response: 11 July 2025

PROPOSAL:

Installation of a block of 4no. temprary classrooms and WCs

CONSULTATION REPORT:

These application site is at Hopwood Hall College. The proposal is a temporary measure whilst the for 3 years. This location is remote well removed from the highways network is not considered to be a sustainable location and parking on site is already problematic and dangerous.

We do not expect any volume of traffic beyond that of the existing use and as a result have no objection to this proposal due to traffic generated.

The access to the site is existing and suitable for this volume and type of traffic.

There is insufficient parking on site at present to accommodate current volumes of staff vehicles and students vehicles. This is an intensification of use and a loss of parking, The parking on site is already dangerously over subscribed and poorly managed. Whilst this area is well removed from the highway and not the responsibility of the local authority we must highlight this safety concern and encourage the college to consider alternative solution which does not remove much needed parking. As this is a safety concern for the college however and not for the highways department we will not raise an objection to the proposals.

AMENDMENTS TO CONSULTATION RESPONSE:

No amendments to report

OFFICER RECOMMENDATION:

Whilst we do have safety concerns for this site we have no objection to this proposal
