ORNAMENTAL HEDGE			
4/ linear metre single row for CS	Common name	Key	10m
<i>Prunus lusitanica</i>	Portuguese Laurel	PLH	40 45/60cm in CS bushy

NATIVE BULBS			
<i>Crocus Blue/ White mix</i>	Crocus	C	500 As shown
<i>Narcissus pseudonarcissus</i>	Daffodil	N	500 As shown

ORNAMENTAL SHRUBS/ PERENNIALS			
<i>Agapanthus Blue Umbrella</i>	Abu	20-35cm	C2 5
<i>Bergenia cordifolia</i>	Bc	20-30cm	C2 4
<i>Euonymus Emerald Gaiety</i>	Ee	20-35cm	C2 3
<i>Ceanothus Puget Blue</i>	Cpb	20-30cm	C2 3
<i>Choisya Sundance</i>	Cs	20-35cm	C5 3
<i>Cornus alba elegantissima</i>	Ce	40-60cm	C2 2
<i>Geranium Johnsons Blue</i>	Gp	20-30cm	C2 5
<i>Hebe Blue Gem</i>	Hb	20-30cm	C5 4
<i>Hebe Autumn Glory</i>	Ha	20-30cm	C5 4
<i>Hebe Sutherlandii</i>	Hs	20-30cm	C5 4
<i>Hebe Ruby Port</i>	Hp	20-30cm	C5 4
<i>Heuchera Palace Purple</i>	He	20-35cm	C2 4
<i>Hydrangea Vanilla Fraise</i>	Hy	40-60cm	C2 2
<i>Lonicera pileata Maigreen</i>	Lm	30-45cm	C2 2
<i>Pennisetum Little Bunny</i>	Plb	20-35cm	C2 5
<i>Pennisetum rubrum</i>	Pru	20-35cm	C2 5
<i>Potentilla Lovely Pink</i>	Pp	20-35cm	C2 4
<i>Potentilla Elizabeth</i>	Pe	20-35cm	C2 4
<i>Rosemary prostratus</i>	Rp	20-30cm	C2 4
<i>Rudbeckia 'Goldstrum'</i>	Rgo	20-30cm	C2 5
<i>Sedum Autumn Glory</i>	Sa	20-30cm	C2 5
<i>Senecio sunshine</i>	Ss	20-30cm	C2 3
<i>Skimmia rubella</i>	Sr	20-30cm	C2 3
<i>Stipa Pony tails</i>	Spt	20-35cm	C2 5
<i>Vinca minor Atropurpurea</i>	Vm	15-20cm	C2 5

- Site boundary
- Existing trees (RPA shown as dashed magenta line) (refer to Tree Survey Report for details)
- Proposed tree 8-10cm girth
- Proposed tree Ht. 60-90cm
- Existing hedge
- Proposed hedge
- Proposed shrubs
- Specimen shrub
- Proposed wildflower grass
- Proposed modified grassland
- Proposed native scrub
- Proposed timber garden fence and gate
- Proposed fence and gate (1m high post and 5 rails with gate to match 1.2m wide)

LANDSCAPE SPECIFICATION

TOPSOIL CULTIVATION In accordance with BS 3882. Apply glyphosate herbicide prior cultivation and allow the recommended period before further action. Ensure ground is free draining by breaking up subsoil and installation of land drainage as required. Do not work the soil in frozen or waterlogged condition. Remove any debris and stones greater than 50mm from surface and cultivate to suitable tilth for planting. Rake surface to achieve required level flush with adjacent paving for turf and 50mm below for planting to allow for mulch layer and smooth flowing contours for open space areas without hollows or soft areas. Topsoil depths to be minimum 150mm for grass and 450mm for planting and at least 300mm of suitable subsoil beneath the topsoil layer. Site topsoil to be supplemented with imported topsoil in accordance with BS 3882. Shrub beds in grass areas to be neatly cut to layout shown.

PLANTING Plant material shall conform to the National Plant Specification and be healthy, vigorous specimens, well rooted but not pot bound, free from pests and disease, hardy and undamaged by transport operations in accordance with HTA 'handling and establishing landscape plants'. Planting and turfing to be in accordance with BS 3936 and 4428. Plant species substitutes will be permitted to accommodate availability and to include stock of particular good quality in nursery provided these are of a similar habit, size, colour, value etc and that they are **approved in advance** by the Landscape Architect. Native species to be local provenance. Bare root and rootballed plants to be planted between November and March. Backfill of planting holes and tree pits to be excavated topsoil with 25% by volume tree and shrub planting compost. Shrub pits to be generally 300 x 300 x 300mm or 75mm wider and deeper than the root spread. Tree pits to be 900 x 900 x 600mm or 150mm wider than the root spread. Stakes to be two 75mm diameter pointed stakes driven until firm and trimmed to 900mm above G.L. with 50 x 100mm crossbar screwed to stakes. Rubber tree cushion nailed to crossbar and rubber tree belting nailed to secure tree. Single 75mm diameter stake for bare-rooted trees with rubber tree belting with spacer. Apply slow release fertiliser (16:10:10) at rate of 100g/ sq.m. to planting areas and 250g per tree. Thoroughly water planting.

PLANTING DENSITIES/ SETTING OUT Refer to the Planting Schedule for densities. Where a bed is indicated as mixed species on the plan, the area should be divided equally between the species shown and the relevant density for that species applied to that proportion of the bed. Taller species to the rear of the bed and smaller species to the front planted in bold groups of single species and not mixtures unless clearly requested on the plan annotations.

TREE RABBIT GUARDS If rabbit activity is noted in the area and guarding is authorised each bare-rooted native plant hedge plant to receive a 12/14 weight 900mm cane and 60cm clear spiral guard. Trees to receive 90cm spiral guard. If extensive rabbit activity is observed rabbit fencing to ornamental areas will be required as directed by the Landscape Architect.

MULCH Spread 50mm layer of general purpose bark mulch, free from large sticks, and debris over all shrub areas, 800mm wide strips for hedging and 800mm diameter circles for tree pits in grass with neatly trimmed edge.

TURFING Following cultivation preparation specified above supply and lay Rolawn Hallstone turf or similar approved with staggered joints close butted to uniform levels to finish 25mm above adjacent paving levels once well tamped down. Use sharp sand spread on surface to achieve fine tuning of levels. Thoroughly soak turf on completion and ensure regular watering is arranged until the turf has rooted. Do not turf in waterlogged or frozen conditions.

SEEDING AMENITY GRASS Following cultivation preparation specified above apply Bost on Seeds Low maintenance amenity mix or similar approved at a rate of 35gms/ sq.m. and roll with quad or hand drawn ballast grass roller. Apply water with sprinkler hose in dry conditions to ensure germination. Levels to be flush with adjacent paving following firming and settlement of topsoil. Further stone-picking, top-dressing and re-seeding of bare patches to ensure uniform, level grass is established. Re-roll as required at first cut stage.

SEEDING WILDFLOWER GRASS Prepare as for amenity grass and sow 3-5 g/ sq.m. of mix BS7M to hedge margins and BS8M to shady areas beneath retained trees supplied by Boston Seeds and applied in accordance with their recommendations.

Rev E 09 01 26 Fence added to rear gardens to enclose BNG area BW
Rev D 09 01 26 Fence and gate added to enclose BNG habitat area BW
Rev C 08 10 25 Revised layout BW
Rev B 24 06 25 Response to Ecology comments- BNG enhancement BW
Rev A 04 06 25 Retained trees shown from Tree Survey Report
Proposed trees relocated to avoid the proposed Surface Water drains BW
