

Town and Country Planning Act 1990 (as amended)

PLANNING PERMISSION GRANTED

APPLICATION REFERENCE: 23/00320/FUL

Name and address for correspondence:	Applicant name:
Trevor Hobday Trevor Hobday Associates Birbiston Littlemoor Road Clitheroe BB7 1EW United Kingdom	Mr Nick Riley

Part I - Particulars of Application

Date of 29 March 2023
Application:

Proposal:	Erection of 4 no. commercial units (Use Class B2) with office space at first floor level, erection of 2.45m high boundary fence and creation of hardstanding - Resubmission of 22/00988/FUL
Location:	Land Off Britannia Street, Heywood, OL10 1JG, ,

Part II - Particulars of decision

The Rochdale Borough Council hereby give notice in pursuance of the provisions of the Town and Country Planning Act 1990 (as amended) that planning permission has been **GRANTED SUBJECT TO CONDITIONS** for the carrying out of the development referred to in Part I above.

The Council hereby permits the above development in accordance with the details given on the application form and subject to the following condition(s):

Conditions and Reasons:

- 1 The Local Planning Authority worked proactively with the applicant to identify various solutions during the application process to ensure that the proposal comprised sustainable development and would improve the economic, social and environmental conditions of the area and would accord with the development plan. These were incorporated into the scheme and/or have been secured by planning condition.

- 1 The development must be begun not later than three years beginning with the date of this permission.

Reason: Required to be imposed by Section 91 of the Town and Country Planning Act 1990 (as amended).

- 2 This permission relates to the following plans:-

Location Plan received 29/03/2023
Existing Site Plan received 29/03/2023
Proposed Site Plan received 19/05/2023
Swept Path Analysis Plan received 19/05/2023
Proposed Elevations 3121-02
Proposed Ground Floor and First Floor Plan 3121-01

and the development shall be carried out in complete accordance with these drawings hereby approved.

Reason: For the avoidance of doubt and to ensure a satisfactory standard of development in accordance with the policies contained within the adopted Rochdale Core Strategy, the saved Rochdale Unitary Development Plan and the National Planning Policy Framework.

- 3 No development shall take place until the trees that are to be retained within the site has been enclosed with temporary protective fencing and temporary ground protection has been fully installed in full accordance with BS:5837:2012 'Trees in relation to design, demolition and construction'. and in accordance with the details contained in paragraph 3.6 of the Tree Report Method Statement by Matthew Lally. The necessary protection measures shall be retained during the period of construction and throughout the installation of the temporary development hereby approved and no work, excavation, tipping, or stacking/storage of materials shall take place beyond such protective fencing during the construction period.

Reason: In order to protect the existing trees on the site in the interests of the amenities of the area and in accordance with Policies P3, G1, G6 and G7 of the adopted Rochdale Core Strategy and the National Planning Policy Framework.

Reason for pre-commencement condition: The trees must be protected before any works are carried out.

- 4 Prior to the commencement of development, details of a sustainable surface water drainage scheme and a foul water drainage scheme shall be submitted to and approved in writing by the Local Planning Authority. United Utilities may request evidence that the drainage hierarchy has been fully investigated and why more sustainable options are not achievable before a surface water connection to the public sewer is acceptable.

The drainage scheme shall include:

- (i) An investigation of the hierarchy of drainage options in the National Planning Practice Guidance (or any subsequent amendment thereof). This investigation shall include evidence of an assessment of ground conditions and the potential for infiltration of surface water in accordance with BRE365;
- (ii) A restricted rate of discharge to public sewer agreed with the local planning authority (if it is agreed that infiltration is discounted by the investigations); the rate should match the existing predevelopment greenfield runoff rate from the site (or a minimum of 5l/s) or be a reduction in the existing brownfield runoff rate of 50% of Qbar (average annual peak flow, 1 in 2.3 year storm return period).
- (iii) Foul and surface water shall drain on separate systems at least to the point of discharge from the site, in accordance with Building Control Part H Drainage requirements.
- (iv) Levels of the proposed drainage systems including proposed ground and finished floor levels in mAOD.
- (v) The background calculations of the MicroDrainage® model or any other software or calculations that have been used for the drainage design.
- (vi) Construction details for permeable paving including sub-base details e.g. cross-section, if this type of paving forms part of the sustainable drainage system.

The approved scheme shall also be in accordance with the Non-Statutory Technical Standards for Sustainable Drainage Systems (March 2015) or any subsequent replacement national standards. Prior to occupation/ use of the proposed development, the drainage scheme shall be completed in accordance with the approved details and retained thereafter for the lifetime of the development.

Reason: To promote sustainable development, secure proper drainage and to manage the risk of flooding and pollution. To prevent an increased risk of flooding as a result of the development and to ensure satisfactory disposal of surface water from the site in accordance with Policy G8 of the adopted Rochdale Core Strategy, saved Policy EM/7 of the adopted Rochdale Unitary Development Plan and the National Planning Policy Framework.

Reason for pre-commencement condition: Drainage infrastructure will need to be implemented prior to commencement of above ground works and a scheme therefore needs to be agreed in advance of the same

- 5 Prior to commencement of the development a Phase I Report (Preliminary Risk Assessment) must be completed to assess the actual and/or potential contamination risks at the site. The Phase 1 Report must be submitted to, and approved in writing by, the Local Planning Authority and shall include a desk top study, site walk over, conceptual model, basic hazard assessment and recommendation regarding the need or otherwise for further investigation and risk assessment.

Where the Phase 1 Report has identified potential unacceptable risks, a suitable investigation, risk assessment and remedial action shall be carried out in accordance with details and within a timescale to have first been submitted to and approved in writing by the Local Planning Authority.

In the event that contamination is suspected or found at any time when carrying out the approved development that was not previously identified, or contamination is caused, the Local Planning Authority shall be notified immediately and development affected and potentially affected by the contamination must stop. An investigation and/or risk assessment and/or remediation shall be carried out in accordance with an agreed process and within agreed timescales to have first been submitted to and approved in writing by the Local Planning Authority. If contamination is not suspected, found or caused during development, this must be confirmed in a completion letter which is subject to the approval in writing of the Local Planning Authority.

Reason: To protect future occupants from any contamination of the site and to accord with policies G9 and DM1 of the adopted Rochdale Core Strategy and policy in the National Planning Policy Framework.

Reason for pre-commencement condition: Contamination investigation and any required mitigation measures will require investigation before the significant disturbance to ground and removal of material.

- 6 No above ground works shall take place until a scheme of biodiversity enhancements for the site including, but not limited to, the provision of bird boxes, bird bricks, bat boxes and bat bricks to be integrated to the fabric of the buildings hereby approved, bug hotels, hibernaculum, wildflower seeding and hedgehog habitat (including provision of 'Hedgehog Highways') has been submitted to and approved in writing by the Local Planning Authority. The duly approved scheme shall be implemented in full prior to first occupation of the dwellings and retained thereafter.

Reason: In the interests of enhancing biodiversity and habitat provision within the site in accordance with Policy G7 of the adopted Rochdale Core Strategy and the National Planning Policy Framework.

- 7 No part of the development shall be occupied until details of the type, siting, design and materials to be used in the construction of boundaries, screens or retaining walls have been submitted to and approved in writing by the Local Planning Authority and the approved structures have been erected in accordance with the approved details. The structures shall thereafter be retained.

Reason: In the interests of amenity and in compliance with policies P3 and DM1 of the adopted Rochdale Core Strategy and the National Planning Policy Framework.

- 8 The development hereby approved shall not be operated (including receiving deliveries) outside the hours of 0800-1800 Monday to Saturday, and shall not be open on Sundays and Bank Holidays

Reason: To protect the amenity of nearby occupants and to accord with policies G9 and DM1 of the adopted Rochdale Core Strategy and the National Planning Policy Framework.

- 9 The car parking, servicing and other vehicular access arrangements shown on the approved plans to serve the development hereby permitted shall be made fully available for use prior to the development being first brought into use and shall be retained thereafter for their intended purpose. Turning areas and parking spaces are retained for their intended purpose and not to be used for the storage of goods, materials, bins or other items.'

Reason: In the interest of highway safety and the free flow of traffic and in accordance with Policies T2 and DM1 of the adopted Rochdale Core Strategy and the National Planning Policy Framework.

- 10 The materials used in the construction of the exterior of the development hereby permitted shall match those used in the construction of the exterior of the existing building in colour, form, type, size and texture.

Reason: In order to ensure a satisfactory appearance in the interests of visual amenity in accordance with policies P3 and DM1 of the adopted Rochdale Core Strategy and the National Planning Policy Framework.

- 11 No goods, materials, waste products, containers or vehicle trailers shall be stored on land outside the buildings, without the prior written consent of the Local Planning Authority.

Reason: In order to ensure a satisfactory appearance in accordance with Policies BE/2 and BE/14 of the Council's Unitary Development Plan.

Procedure Statement:

Date Decision Issued 4 August 2023

Daniela Ripa
Interim Head of Planning Services

IMPORTANT

PLEASE ENSURE THAT YOU HAVE READ AND FULLY UNDERSTOOD THE CONTENTS OF THIS DECISION NOTICE. YOUR ATTENTION IS DRAWN TO THE ATTACHED NOTES.

INFORMATIVE:

The Local Planning Authority's reasons for its decision are set out in the accompanying officer's report.

INFORMATIVE:

The applicant is reminded of the need to submit and obtain formal approval of those details required by the conditions of this planning permission before development may lawfully commence on the site. The formal discharge of a planning condition is currently subject to payment of an additional fee per request: £34.00 for householder applications and £116.00 in all other cases.

INFORMATIVE:

The proposed development lies within an area that has been defined by The Coal Authority as containing potential hazards arising from coal mining. These hazards can include: mine entries

(shafts and adits); shallow coal workings; geological fissures; mine gas and previous surface mining sites. Although such hazards are often not readily visible, they can often be present and problems can occur as a result of development taking place, or can occur at some time in the future.

It is recommended that information outlining how the former mining activities affect the proposed development, along with any mitigation measures required, be submitted alongside any subsequent application for Building Regulations approval.

Any intrusive activities which disturb or enter any coal seams, coal mine workings or coal mine entries (shafts and adits) requires the prior written permission of The Coal Authority. Such activities could include site investigation boreholes, digging of foundations, piling activities, other ground works and any subsequent treatment of coal mine workings and coal mine entries for ground stability purposes. Failure to obtain Coal Authority permission for such activities is trespass, with the potential for court action.

Property specific summary information on coal mining can be obtained from The Coal Authority's Property Search Service on 0845 762 6848 or at www.groundstability.com.

INFORMATIVE:

The applicant is advised that the supply and delivery of refuse containers (including all wheelie bins and food waste caddies) for residential developments is chargeable and the responsibility for these charges rests with the applicant/developer. The cost is based on a variable rate per property depending on the property size and number of bedrooms but as an indication, the present charge for a suite of three 240l recycling bins and one 240l refuse bin is £144 per residence. Please contact environmental.management@rochdale.gov.uk for a quotation for your development.
