CHECKED AND SIGNED OFF BY: RG

DATE: 29 February 2024

SITE

The application site is Spotland Bridge Mill located in the Spotland district of Rochdale around a kilometre north-west of the town centre. The building is a large former cotton mill now converted to industrial units, situated at the junction of the A580 Spotland Road with Bridgeford Road.

The site consists of two principal buildings, the first dating from around 1833, the second from the early 20th century, existing by 1908. The application unit is located on the ground floor of the north-west corner of the latter.

Spotland Bridge Mill is a Grade II Listed Building and located within the Spotland Conservation Area.

The application relates to Unit 3 of the East Mill which is located on the ground floor of the north-west corner of the East Mill. This unit is currently vacant and measures 162sqm. Previous uses have fallen within B1 (now E(g)), B2 and B8. The site is serviced by communal car parking / cycle parking and bin stores (approved under previous consent for the whole site).

The listing description for the building (ref: 335/6/10017) reads;

Cotton spinning mill, now industrial centre. c1833, early C20 extension. Built for the firm of Joseph Butterworth and Co. Ltd. EXTERIOR: original mill of five storeys and attic, thirteen bays. Red/brown brick, slate roof, gable copings. Square fireproof external stair attached to N end, privy tower and fire escape doors (same size as windows) with cast-iron railed platforms on W side. Blocking course and corner pilasters.

INTERIOR: Two rows of cast-iron columns, with flat bolting faces for line shafting, support massive timber cross-beams and joisted timber floors; roof structure of queen-strut trusses to attic storey lit by roof lights and gable windows. Lower engine house with paired narrow round-arched windows indicating housing for a double-beam engine at S end. Attached to this is the low contemporary boiler house, 2-storey storeroom to rear; tapering octagonal chimney close by. Later additions include a 2-storey office block with 4-pane sash to right of doorway and a sash window with margin lights above, added by the 1870s. 4-storey, 9 x 8 bay added mill to the east: Accrington brick, flat roof, segmental-arched 9-pane..windows. Structure of steel beams with cast iron columns and concrete floors with sprinkler tower. Powered by mains electricity. Access from the Edenfield Road is through a gateway with wide wrought-iron gates; the original cobbled road surface survives, as does the revetment wall of massive stone slabs on the west side. Also on the site, facing the road junction, is the mill owner/manager's house: coursed gritstone, stone surrounds to doors and windows, slate roof, no stacks. Two storeys, Two rooms deep, single-storey attached outbuilding at rear. Central recessed half-glazed door with overlight, flanking full-height canted bay windows. Doorway and tall stair window to left of centre, rear. Low retaining wall to forecourt.

HISTORY: the mill was built for spinning coarse counts of cotton twist. By 1888 it was powered 17,424 spindles, when the business was taken over by Chas. Whittaker Ltd. Listed as a good example of an early C19 non-fireproof mill, which, with its early C20 addition, shows a typical expansion of the business. (Gurr, Duncan, and Hunt: The Cotton Mills of Oldham: Oldham. 1989-)development pattern for an early site. The c1833 mill is an example of the increasing width (18m) of buildings as construction methods improved and larger machines became available during the middle years of the century. In this example the width is spanned by timber beams for a non-fireproof construction which remained usual through the mid C19. The roof structure and roof lights indicate the Use of powered machinery rather

than storage on this floor. The double beam engine had 2 cylinders side-by-side working a single flywheel; in this mill one line shaft powered each of 2 rows of spinning throstles on the wide spinning floors, (Williams, 1992). (Williams, M and Farnie, DA: Cotton Mills in Greater Manchester: 1992-: 74,82,83,89).

PROPOSAL

The application seeks the change of use of Unit 3 to a microbrewery and brewery tap including refurbishment and alterations to the existing building (sui generis use).

Externally, the proposal involves re-instating existing bricked up window openings with new aluminium framed double glazed units installed to match the existing framing pattern. The brickwork panels will be removed and openings made good. The existing door openings which are blocked up will be re-instated and new timber doors and frames fitted with glazed overlights in a style to match those already approved at the mill.

Internally, the basic layout of Unit 3 will be retained with minor subdivision to accommodate new functions with no alteration to the original crosswalls and the columns/floor structure. It is proposed to raise the existing floor level to accommodate a proposed WC so that it is level with the public area.

There is a large communal car park and dedicated areas for communal cycle storage and bin storage.

The submitted application form refers to 4 full time members of staff and 4 part time members of staff.

Opening hours are proposed as 11:00–23:55 Monday to Saturday and 11:00–23:00 Sundays and Bank Holidays.

Commercial signage is noted on the submitted plans however, this will need separate advertisement consent.

Greater Manchester Combined Authority – Draft Places for Everyone

PfE is a joint Development Plan Document being prepared by nine Greater Manchester districts (Bolton, Bury, Manchester, Oldham, Rochdale, Salford, Tameside, Trafford and Wigan). It identifies the quantum of new housing and employment development, supports the delivery of key infrastructure, and protects environmental assets. The Inspectors' Report, received on 14 February 2024, marks the end the examination into the plan which included public hearing sessions which took place between 1 November 2022 and 5 July 2023. The report sets out the findings of the examination of the Places for Everyone Joint Development Plan Document (PfE). The Inspectors conclude that all legal requirements have been met and that with the recommended main modifications set out in the Appendix of their report, the Places for Everyone Joint Development Plan Document for Bolton, Bury, Manchester, Oldham, Rochdale, Salford, Tameside, Trafford and Wigan satisfies the requirements referred to in Section 20(5)(a) of the 2004 Act and is sound.

The next step is for all nine Places for Everyone Councils to consider the Inspectors' recommendations and adoption of the Plan. Consequently, the plan is at a very advanced stage and has been deemed to be legally sound and is therefore afforded significant weight in decision making.

RELEVANT SITE HISTORY

83/D15327 - Change Of Use From Dress Manufacturers To Retail \ Wholesale Warehouse. Refused.

91/D26495 - Change Of Use From Industrial Unit To Private Hire Booking Office. Approved 16/05/1991.

99/D36638 - Use Of Premises As A Martial Arts School (Retrospective). Approved 13/08/1999.

08/D51590 - Internal And External Alterations To Existing Listed Mill Buildings To Allow Mixed Use Development – Granted.

08/D51589 - Change Of Use And Refurbishment Of Existing Buildings Including New Storey To East Mill To Provide Mixed Use Scheme Comprising 84 Apartments, 1079 SQ M Of Commercial Floorspace (B1/B2) With Associated Car Parking And Landscaping – Approved.

11/D54883 - Application For A New Planning Permission To Replace An Extant Planning Permission (D51589) For Change Of Use And Refurbishment Of Existing Buildings Including New Storey To East Mill To Provide Mixed Use Scheme Comprising 84 Apartments, 1079 SQ M Of Commercial Floorspace (B1/B2) With Associated Car Parking And Landscaping – Approved.

SQ M Of Commercial Floorspace (B1/B2) With Associated Car Parking And Landscaping – Granted.

20/00548/LBC - Replacement of existing windows with PVCu windows – Withdrawn.

20/00602/FUL - Change of use to allow use of part of ground floor from business use (B8) to cafe (Class A3). Approved 14/07/2021.

20/01454/LBC - Replacement of existing windows with aluminium windows - Resubmission of 20/00548/LBC. Approved 18/03/2022.

22/00825/DOC - Submission of details to comply with condition 3 (materials) on planning permission 20/01454/LBC. Request completed 10/08/2022.

23/00229/FUL - Change of use of part of ground floor to microbrewery and brewery tap area including installation of new windows and re-instatement of doorways to north and east elevations. Pending consideration.

CONSULTATION RESPONSES

Conservation Officer

No objections to the proposed on heritage grounds- the proposals seek to positively conserve and utilise existing openings and reinstate historical materials, bringing the building back into a viable use.

I would just suggest conditioning all materials for instatement, including window and door specs and cross-sectional and elevation details of doors (windows provided), finishes to be applied.

Joint Committee of National Amenity Societies

No comments at the time of writing.

REPRESENTATIONS

The application has been publicised with site notices, press notices and neighbour notification letters. No letters of representation have been received.

ANALYSIS

The application site is a Grade II Listed Building and within the Spotland Conservation Area and the provisions of the Planning (Listed Buildings and Conservation Areas) Act 1990 apply. This requires a local planning authority to have special regard to the desirability of preserving the listed building or its setting or any features of special architectural or historic interest which it possesses.

NPPF paragraph 206 states that local planning authorities should look for opportunities for new development within Conservation Areas and World Heritage Sites, and within the setting of heritage assets, to enhance or better reveal their significance.

NPPF paragraph 200 states that any harm to, or loss of, the significance of a designated heritage asset (from its alteration or destruction, or from development within its setting), should require clear and convincing justification.

In accordance with NPPF paragraph 202, where a development will lead to less than substantial harm to the significance of a designated heritage asset, this harm should be weighed against the public benefits of the proposal.

Rochdale Core Strategy Policy P2 states that the borough's heritage will be protected through conserving, enhancing and promoting key heritage assets, which include conservation areas, listed buildings, and non-designated heritage assets.

GMCA's draft Places for Everyone Plan Policy JP-P2 seeks to encourage heritage place-making and states the desire to positively conserve, sustain and enhance the historic environment, heritage assets, and their settings.

Assessment of harm to the significance of the Listed Building

Spotland Bridge Mill is a Grade II listed building and is located within the Spotland Conservation Area. The western element of the present mill represents a more intensive era of industrialisation that began in the early 19th century. It was built around 1833 for cotton spinners Joseph Butterworth and Company and originally named *Spotland Bridge New Mill*. This building is five storeys and was extended by the 1870s. The mill, which then operated 17,424 spindles, was acquired in 1888 by Charles Whittaker Ltd. The four-storey eastern block represents a further expansion at the height of the Lancashire textile industry, and had been built by 1908.

The application seeks the change of use of Unit 3 to a microbrewery and brewery tap including refurbishment and alterations to the existing building (sui generis use).

Externally, the proposal involves re-instating three existing bricked up window openings with new aluminium framed double glazed units installed to match the existing framing pattern. The brickwork panels will be removed and openings made good. Four existing door openings which are blocked up will be re-instated and new timber doors and frames fitted with glazed overlights in a style to match those already approved at the mill.

Internally, the basic layout of Unit 3 will be retained with minor subdivision to accommodate new functions with no alteration to the original crosswalls and the columns/floor structure. It is proposed to raise the existing floor level to accommodate a proposed WC so that it is level with the public area.

The Council's Conservation Officer has reviewed the submitted plans raised no objections to the proposal on heritage grounds. The proposal seeks to positively conserve and utilise existing openings and reinstate historical materials, bringing the building back into a viable use.

The NPPF directs local planning authorities to give great weight to an asset's conservation. It is considered that the public benefits associated with the refurbishment and the repairs and bringing the vacant unit back into use would clearly outweigh the less than substantial harm identified to its significance.

Subject to conditions as detailed in the recommendation below, the proposal would comply with NPPF paragraph 202 and Core Strategy Policy P2.

The proposed works would help to preserve the building and its features of special architectural and historic interest. It would comply with the requirements of the Planning (Conservation Areas and Listed Buildings) Act 1990.

RECOMMENDATION

GRANT subject to the following conditions:

1. The works must be begun not later than the expiration of three years beginning with the date of this consent.

Reason: To comply with the requirements of section 18 of the Planning (Listed Building and Conservation Areas) Act 1990 as amended by the Planning and Compulsory Purchase Act 2004.

2. This permission relates to the following plans and documents:

Drawing No: H474-02

Drawing No: H474-03 – Location Plan

Drawing No: H474-04

Received by the Local Planning Authority on 14th September 2023

and the development shall be carried out in complete accordance with these drawings and documents hereby approved.

Reason: For the avoidance of doubt and to ensure a satisfactory standard of development in accordance with the policies contained within the adopted Rochdale Core Strategy, the saved Rochdale Unitary Development Plan and the National Planning Policy Framework.

3. Prior to the instatement of any new windows, doors and openings, full product specifications, elevations and cross sectional details, at a scale of no less than 1:20, and finishes to be applied, shall be submitted to, and approved in writing by, the Local Planning Authority. Any windows and doors to be instated shall match those as existing in respect of material and appearance.

Reason: to ensure that special regard is paid to protecting the special architectural and historic interest and integrity of the building under Section 16 of the Planning (Listed Buildings and Conservation Areas) Act 1990.

Notes for Applicant:

1. The applicant is advised that should any extraction/ventilation systems be required then this would require planning permission and listed building consent.
