

Town and Country Planning Act 1990 (as amended)

PLANNING PERMISSION GRANTED

APPLICATION REFERENCE: 25/00934/FUL

Name and address for correspondence:	Applicant name:
Mr Sam Tucker Tucker Design Denham Hall Denham Lane Brindle PR6 8PR United Kingdom	Mr Roger Smethurst Heywood Cricket Club

Part 1 - Particulars of Application

Date of 27 September 2025
Application:

Proposal:	Demolition of an existing portacabin building and replacement of a pre-fabricated modular community building
Location:	Heywood Cricket Club, Woodfield Terrace, Aspinall Street, Heywood, Rochdale, OL10 4JE

Part 2 Compliance with Conditions

It is YOUR responsibility to comply with planning conditions. The Council's Planning Enforcement Team is responsible for investigating alleged breaches of planning control. This includes ensuring that all relevant conditions have been complied with. Effective enforcement is important to:

- Tackle breaches of planning control which would otherwise have unacceptable impact on the amenity of the area
- maintain the integrity of the decision-making process;
- help ensure that public acceptance of the decision-making process is maintained.

Whilst the majority of developers/homeowners do comply with the requirements of planning permissions, there are a number who do not. Where any planning conditions are breached, the Council can take formal enforcement action without further notice. Enforcement action could include such measures as requiring remedial works, cessation of use, or complete demolition and can cause the developer/homeowner unnecessary expense, delay and frustration. In some cases, failure to comply with planning conditions can lead to the loss of the planning permission.

Part 3 - Particulars of decision

The Rochdale Borough Council hereby give notice in pursuance of the provisions of the Town and Country Planning Act 1990 (as amended) that planning permission has been **GRANTED SUBJECT TO CONDITIONS** for the carrying out of the development referred to in Part I above.

The Council hereby permits the above development in accordance with the details given on the application form and subject to the following condition(s):

Conditions and Reasons:

- 1 The development must be begun not later than three years beginning with the date of this permission.

Reason: Required to be imposed by Section 91 of the Town and Country Planning Act 1990 (as amended).

- 2 This permission relates to the following plans:

- o Location Plan Drawing No 1007-100-01
- o Existing Site Plan Drawing No 1007.100.02
- o Existing Portacabin Elevations Drawing No 1007.100.07
- o Existing and Proposed Elevations Drawing No 1007.100.06
- o Proposed Elevations Drawing No 1007.100.05
- o Proposed General Arrangement and Roof Plan Drawing No 1007.100.04
- o Proposed Site Plan Drawing No 1007.100.03
- o Design and Access Statement 1st September 2025 Version 1
- o Flood Risk Assessment by RIDA Reference 310 FRA-001

The development shall be carried out in accordance with these drawings and documents hereby approved unless otherwise required by condition below.

Reason: For the avoidance of doubt and to ensure a satisfactory standard of development in accordance with the policies contained within the adopted Rochdale Core Strategy, the saved Rochdale Unitary Development Plan, Places for Everyone Joint Development Plan and the National Planning Policy Framework.

- 3 Prior to the commencement of development, details of a sustainable surface water drainage scheme and a foul water drainage scheme shall be submitted to and approved in writing by the Local Planning Authority. The drainage schemes must include:

- I. An investigation of the hierarchy of drainage options in the National Standards for Sustainable Drainage Systems (or any subsequent amendment thereof). This investigation shall include evidence of an assessment of ground conditions and the potential for infiltration of surface water;
- II. A restricted rate of discharge of surface water agreed with the local planning authority (if it is agreed that infiltration is discounted by the investigations);
- III. Levels of the proposed drainage systems including proposed ground and finished floor levels in AOD;
- IV. Incorporate mitigation measures to manage the risk of sewer surcharge where applicable; and
- V. Foul and surface water shall drain on separate systems.

The approved schemes shall be in accordance with the National Standards for Sustainable Drainage Systems (2025) or any subsequent replacement national standards.

Prior to occupation of the proposed development, the drainage schemes shall be completed in accordance with the approved details and retained thereafter for the lifetime of the development.

Reason: To promote sustainable development, secure proper drainage and to manage the risk of flooding and pollution. To prevent an increased risk of flooding as a result of the development and to ensure satisfactory disposal of surface water from the site in accordance with Policy G8 of the adopted Rochdale Core Strategy, Policy JP-S4 of the adopted Places for Everyone Joint Development Plan and the National Planning Policy Framework.

Reason for pre-commencement condition: Drainage infrastructure will need to be implemented prior to commencement of above ground works and a scheme therefore needs to be agreed in advance of the same.

- 4 No development shall take place until finished floor levels for the proposed buildings and finished ground levels across the site relative to agreed off-site datum point(s) have been submitted to and approved in writing by the Local Planning Authority. The development shall be undertaken in accordance with the approved details.

Reason: In the interests of amenity and in compliance with Policies P3 and DM1 of the adopted Rochdale Core Strategy and the National Planning Policy Framework

Reason for pre-commencement condition: An understanding of proposed levels in relation to existing levels is required prior to commencement of any relevant engineering operations on site.

- 5 Notwithstanding any description of materials in the application no above ground construction works shall take place until samples and / or full specifications of materials to be used externally on the building(s) have been submitted to and approved in writing by the Local Planning Authority. Such details shall include the type, colour and texture of the materials. Development shall be carried out in accordance with the approved details.

Reason: In the interests of amenity and in compliance with policies P3 and DM1 of the adopted Rochdale Core Strategy and the National Planning Policy Framework.

- 6 The building hereby approved shall not be occupied until such time as a scheme of biodiversity enhancements for the site has been submitted to and approved in writing by the Local Planning Authority. The duly approved scheme shall be implemented in full prior to first use of the building and retained thereafter.

Reason: In the interests of enhancing biodiversity and habitat provision within the site in accordance with Policy G7 of the adopted Rochdale Core Strategy and the National Planning Policy Framework.

- 7 The development hereby approved shall be carried out in accordance with the Flood Mitigation Measures as set out in section 6 and 7 of the submitted Flood Risk Assessment by RIDA reference 310 FRA-001 and dated Feb 2022. The necessary measures shall be maintained and retained thereafter.

Reason: To prevent placing the development at unacceptable risk of flooding and to prevent contributing to the risk of flooding elsewhere and in accordance with the Policy G8 of the adopted Rochdale Core Strategy and the National Planning Policy Framework.

- 8 No external lighting shall be installed on the building hereby approved or across the site unless and until a detailed scheme for the same has been submitted to and approved in writing by the Local Planning Authority. Any such scheme shall be duly implemented in accordance with the approved details and retained as such thereafter.

Reason: In the interests of ensuring the conservation of protected species in accordance with Policy G7 of the adopted Rochdale Core Strategy, the National Planning Policy Framework and the Wildlife and Countryside Act 1981 (as amended).

- 9 The building hereby approved shall not be occupied until full details and specifications of solar photo-voltaic panels including large scale drawings at a scale of not less than 1:50 including details of their siting and appearance, have been submitted to and approved in writing by the Local Planning Authority. The development shall be carried out in accordance with the approved details thereafter.

Reason: In the interests of achieving the objectives of PfE Policy JP-S2 and CS Policies G1 and G2 and in the interests of ensuring a satisfactory visual appearance to the development and in accordance with Policies P3 and DM1 of the adopted Rochdale

BIODIVERSITY NET GAIN

The effect of paragraph 13 of Schedule 7A to the Town and Country Planning Act 1990 is that planning permission granted for development of land in England is deemed to have been granted subject to the condition (biodiversity gain condition) that development may not begin unless:

- a) A Biodiversity Gain Plan has been submitted to the planning authority,
- and;
- b) The planning authority has approved the plan.

The planning authority, for the purposes of determining whether to approve a Biodiversity Gain Plan, if one is required in respect of this permission would be Rochdale Borough Council.

Based on the information available this permission is considered to be one which will **not** require the approval of a biodiversity gain plan before development is begun because one of the statutory exemptions or transitional arrangements are considered to apply:

- De minimis exemption.

Procedure Statement:

The proposal complies with the development plan and would improve the economic, social and environmental conditions of the area. It therefore comprises sustainable development and the Local Planning Authority worked proactively to issue the decision without delay.

Date Decision Issued 10 November 2025

Melanie Hale
Head of Planning Services

IMPORTANT

PLEASE ENSURE THAT YOU HAVE READ AND FULLY UNDERSTOOD THE CONTENTS OF THIS DECISION NOTICE. YOUR ATTENTION IS DRAWN TO THE ATTACHED NOTES.

INFORMATIVE:

The Local Planning Authority's reasons for its decision are set out in the accompanying officer's report.

INFORMATIVE:

The applicant is reminded of the need to submit and obtain formal approval of those details required by the conditions of this planning permission before development may lawfully commence on the site. The formal discharge of a planning condition is currently subject to payment of an additional fee per request: [Fees for Planning Applications in England](#)

INFORMATIVE:

The proposed development lies within an area that has been defined by the Mining Remediation Authority as containing coal mining features at surface or shallow depth. These features may include: mine entries (shafts and adits); shallow coal workings; geological features (fissures and break lines); mine gas and former surface mining sites. Although such features are seldom readily visible, they can often be present and problems can occur, particularly as a result of new development taking place.

Any form of development over or within the influencing distance of a mine entry can be dangerous and raises significant land stability and public safety risks. As a general precautionary principle, the Mining Remediation Authority considers that the building over or within the influencing distance of a mine entry should be avoided. In exceptional circumstance where this is unavoidable, expert advice must be sought to ensure a suitable engineering design which takes account of all relevant safety and environmental risk factors, including mine gas and mine-water. Your attention is drawn to the Mining Remediation Authority Policy in relation to new development and mine entries available at:

Building on or within the influencing distance of mine entries - GOV.UK

Any intrusive activities which disturb or enter any coal seams, coal mine workings or coal mine entries (shafts and adits) requires a Mining Remediation Authority Permit. Such activities could include site investigation boreholes, excavations for foundations, piling activities, other ground works and any subsequent treatment of coal mine workings and coal mine entries for ground stability purposes. Application forms for Mining Remediation Authority permission and further guidance can be obtained from The Mining Remediation Authority's website at:

www.gov.uk/get-a-permit-to-deal-with-a-coal-mine-on-your-property

What is a permit and how to get one? - GOV.UK (www.gov.uk) In areas where shallow coal seams are present caution should be taken when carrying out any on site burning or heat focused activities.

If any future development has the potential to encounter coal seams which require excavating, for example excavation of building foundations, service trenches, development platforms, earthworks, non-coal mineral operations, an Incidental Coal Agreement will be required. Further information regarding Incidental Coal Agreements can be found here -

<https://www.gov.uk/government/publications/incidental-coal-agreement/guidance-notes-for-applicants-for-incidental-coal-agreements>

If any coal mining features are unexpectedly encountered during development, this should be reported immediately to the Mining Remediation Authority on 0800 288 4242. Further information is available on the Mining Remediation Authority website at: Mining Remediation Authority - GOV.UK

INFORMATIVE:

The applicant is advised that the supply and delivery of refuse containers (including all wheelie bins and food waste caddies) for residential developments is chargeable and the responsibility for these charges rests with the applicant/developer. The cost is based on a variable rate per property depending on the property size and number of bedrooms. Please contact environmental.management@rochdale.gov.uk for a quotation for your development.
