Class J of Part 14 of Schedule 2 of the GPDO allows for the:

The installation, alteration or replacement of—

- (a) microgeneration solar thermal equipment on a building;*
 - (b) microgeneration solar PV equipment on a building; or*
 - (c) other solar PV equipment on the roof of a building,*
- other than a dwellinghouse or a block of flats*

Description of Proposed Development

The panels would be installed on a: Pitched ☒ Flat ☐ roof.

The highest part of the solar PV equipment would be above the highest part of the roof.

The solar PV equipment would be installed metres from the external edge of the roof.

The solar PV equipment would be installed on the roof of a building which is **NOT**:

- ☐ On article 2(3) land and fronting the highway.
- ☐ A scheduled monument
- ☐ A listed building or within the curtilage of a listed building

In light of the above, the proposed installation of solar PV equipment at this location would constitute permitted development by virtue of compliance with the provisions of paragraph J1(a-f) of Class J of Part 14, Schedule 2 of the Town and Country Planning (General Permitted Development) Order 2020 (as amended)

Prior Approval Matters

As required by paragraph J4(2), the local authority are required to give regard to the design or external appearance of the development with particular regard to the impact of glare on surrounding land users in the determination of an application made under Class J of part 14 of Schedule 2.

Design and External Appearance

Paragraph 127 of the National Planning Policy Framework states that planning policies and decisions should ensure that developments are visually attractive and are sympathetic to local character and history. Consistent with the aims of the NPPF are policies DM1 and P3 of the adopted Rochdale Core Strategy, which requires require all new developments regardless of location in the borough, to adhere to high standards of design, by respecting context where it is positive and having regard to

the scale, density, massing, height, layout, landscape, materials and access of surrounding buildings and areas in general. Policies DM1 and G9 of the adopted Rochdale Core Strategy seek to ensure that new development is compatible with surrounding land uses, both in terms of its impact upon those uses and the impact of the surrounding land uses upon the amenities of future residents / users, also requiring that development does not have impacts that lead to an unacceptable increase in air, water, noise, light or other pollution.

The proposed Solar PV Panels are on a pitched roof and it is not considered that the proposals would unduly impact residential amenity by way of glare. The design and appearance are considered to be acceptable. As such, it is considered that the proposal would accord with the policies contained within the Adopted Core Strategy and the National Planning Policy Framework, and as such, would not require prior approval.

Recommendation:

Prior Approval Not Required

Informative:

For the avoidance of doubt, the decision relates to the following drawings:-
