CHECKED AND SIGNED OFF BY: RG

DATE: 17 November 2023

SITE

The application relates to one Beech tree (T2) and one Ash tree (T3) located in the curtilage space of no. 5 Burwell Close in Healey. T2 adjoins the side curtilage boundaries of nos. 1 and 2 The Spinney, Thrum Hall Lane and T3 adjoins the grounds of Thrum Hall Methodist Church.

PROPOSAL

The proposal seeks consent for the removal/monolith of the Beech tree (T2) to a 3-4m stem due to Phytophthora root rot. The application also proposes the deadwood removal and crown reduction by 20-25% of the Ash tree (T3). The submitted arboricultural report states the proposed works to the Ash tree is in the interest of safety due to its proximity to an area occupied by users of the adjacent Thrum Hall Methodist Church.

RELEVANT PLANNING POLICY

National Guidance

National Planning Policy Framework (NPPF)
National Planning Practice Guidance (NPPG)

Adopted Rochdale Core Strategy (CS):

- G6 Enhancing green infrastructure
- G7 Increasing the value of biodiversity and geodiversity

RELEVANT SITE HISTORY

13/00024/WTTPPO - Application for the proposed felling of a beech tree within area A2 subject to Tree Preservation Order TPO005 - Grant subject to conditions

16/00307/WTTPPO - Application for works to two beech trees (T1 and T2 on submitted plan) within rear garden, subject to Tree Preservation Order No. 5 - Grant subject to conditions

CONSULTATION RESPONSES

Tree Officer

No comments received to date.

REPRESENTATIONS

In accordance with Council policy on neighbour notification for this type of application, no letters of notification were sent to neighbouring properties.

ANALYSIS

In considering applications for works to protected trees, Government advice in paragraph 90 of the NPPG states:

“When considering an application the authority is advised to:

- ② assess the amenity value of the tree or woodland and the likely impact of the proposal on the amenity of the area;*
- ② consider, in the light of this assessment, whether or not the proposal is justified, having regard to the reasons and additional information put forward in support of it;*
- ② consider whether any loss or damage is likely to arise if consent is refused or granted subject to conditions;*
- ② consider whether any requirements apply in regard to protected species;*
- ② consider other material considerations, including development plan policies where relevant; and*
- ② ensure that appropriate expertise informs its decision.”*

In considering whether there has to be an arboricultural need for proposed works to a TPO, paragraph 91 of the NPPG states:

“In general terms, it follows that the higher the amenity value of the tree or woodland and the greater any negative impact of proposed works on amenity, the stronger the reasons needed before consent is granted. However, if the amenity value is lower and the impact is likely to be negligible, it may be appropriate to grant consent even if the authority believes there is no particular arboricultural need for the work.”

With regard to the above, the main considerations in respect of this application are whether the proposal for works to the tree is justified in light of the assessment of the amenity value of the tree and whether the reasons for works are of sufficient standing to warrant the granting of consent.

No comments have been received from the Tree Officer at the time of writing. Notwithstanding, the submitted arboricultural report states the Beech tree suffers from Phytophthora root rot. The Ash tree also indicate signs of deadwood which may pose harm to users of the adjacent Thrum Hall Methodist Church. On this basis, the proposed works is justified in the interest of residential amenity, safety and good arboricultural practice. However, to compensate for the loss of amenity value afforded by the Beech tree, it is recommended that a replacement tree of a native species is planted. Given the relatively limited curtilage space of the host property, and the presence of numerous protected trees in the vicinity, it is considered the recommended replacement ratio of 2:1 would not be necessary in this context.

Subject to the suggested conditions, the application proposal is therefore considered to be compliant with the guidance contained within the NPPG noted above, and the application is recommended for approval.

GMEU standing advice on tree works and protected species will be attached to the decision notice and therefore the obligations in respect of protected species will have been met.

RECOMMENDATION

GRANT subject to four standard conditions

5. Within the next planting season after the felling of the tree hereby approved, a replacement tree shall be planted within the site and shall be a native species which is of a similar size at maturity. If the replacement tree is removed, dies, become severely damaged or seriously diseased within three years of planting, it shall be replaced by trees of similar size and species.

Reason: To mitigate for the loss of the existing tree and to protect the visual amenity of the area.

Notes for Applicant:

For the avoidance of doubt, this Decision Notice relates to the following drawings / document(s):-

- Site Plan – Drawing No. 21260/METT dated 25/09/2023
- Arboricultural Safety Survey – Ref. 21260/METT dated 25/09/2023
- Photographs of Beech tree (T2)
