

Town and Country Planning Act 1990 (as amended)

PLANNING PERMISSION GRANTED

APPLICATION REFERENCE: 22/01582/FUL

Name and address for correspondence:	Applicant name:
Mr Ian Pawson Ian Pawson Limited 26 Essex Street Barnoldswick BB18 5DT United Kingdom	Mr A Y PatelAY & Y Patel Ltd

Part I - Particulars of Application

Date of Application: 10 February 2023

Proposal:	Demolition of existing shop and car wash building and erection replacement petrol station forecourt shop, installation of new pump island equipment and vents, including ATM, erection of a 2m timber fence and installation security bollards associated landscaping works, new parking area and bin store
Location:	Ceylon Service Station , Yorkshire Street, Rochdale, OL16 2DR

Part II - Particulars of decision

The Rochdale Borough Council hereby give notice in pursuance of the provisions of the Town and Country Planning Act 1990 (as amended) that planning permission has been **GRANTED SUBJECT TO CONDITIONS** for the carrying out of the development referred to in Part I above.

The Council hereby permits the above development in accordance with the details given on the application form and subject to the following condition(s):

Conditions and Reasons:

- 1 The development must be begun not later than three years beginning with the date of this permission.

Reason: Required to be imposed by Section 91 of the Town and Country Planning Act 1990 (as amended).

- 2 This permission relates to the following plans:-

- Proposed Landscape Plan Drawing No 9
- Site Plan as proposed - Drawing No 5A
- Plans and Elevations as proposed - Drawing No 4B
- Location Plan

and the development shall be carried out in accordance with these drawings hereby approved.

Reason: For the avoidance of doubt and to ensure a satisfactory standard of development in accordance with the policies contained within the adopted Rochdale Core Strategy, the saved Rochdale Unitary Development Plan and the National Planning Policy Framework.

- 3 Prior to commencement of the development an investigation and risk assessment, in addition to any assessment provided with the planning application, must be completed to assess the nature and extent of any contamination on the site, whether or not it originates on the site. The investigation and risk assessment must be undertaken by competent persons and a written report of the findings must be produced and shall have been first submitted to and approved in writing by the Local Planning Authority before development commences. The report of the findings must include:

- i) a survey of the extent, scale and nature of contamination
- ii) an assessment of the potential risks to:
 - o human health,
 - o property (existing or proposed) including buildings, crops, livestock, pets, woodland, and service lines and pipes,
 - o adjoining land,
 - o groundwaters and surface waters,
 - o ecological systems,
 - o archeological sites and ancient monuments;
- iii) where unacceptable risks are identified, an appraisal of remedial options and proposal of the preferred option(s)

The development shall thereafter be completed in full accordance with the approved recommendations.

Reason: To ensure the safe development of the site in the interests of the amenity of future occupiers in accordance with Policy G9 of the adopted Rochdale Core Strategy and the National Planning Policy Framework.

Reason for pre-commencement condition: Further investigation will be necessary prior to commencement of any building or engineering works on site.

- 4 No development shall take place until such time as a scheme for the disposal of foul and surface waters from the site has been submitted to and approved in writing by the Local Planning Authority. For the avoidance of doubt, surface water must drain separately from foul water. The surface water drainage scheme should be based on the hierarchy of drainage options in the National Planning Practice Guidance with evidence of an assessment of the site conditions, and include details of how the scheme shall be managed after completion. The development shall be completed, maintained and managed in accordance with the approved details.

Reason: To prevent an increased risk of flooding as a result of the development and to ensure satisfactory disposal of surface and foul water from the site in accordance with the requirements of Policy G8 of the adopted Rochdale Core Strategy and the National Planning Policy Framework.

Reason for pre-commencement condition: As the proposals require ground works, these details are required prior to commencement of any building or engineering works on site.

- 5 Notwithstanding any description of materials in the application, no above ground construction works shall take place until samples and/or full specification of materials to be used externally on the buildings have been submitted to and approved in writing by the Local Planning Authority. Such details shall include the type, colour and texture of the materials. Development shall be carried out in accordance with the approved details prior to the first occupation of the development.

Reason: In order to ensure a satisfactory appearance in the interests of visual amenity in accordance with Policies P2, P3 and DM1 of the adopted Rochdale Core Strategy and the requirements of the National Planning Policy Framework.

- 6 No external lighting shall be installed on the external surfaces of any of the structures hereby approved or within the car parking areas, unless and until a detailed scheme of lighting design has first been submitted to and approved in writing by the local planning authority. The scheme shall include the position and height on the building, luminance, angle of installation, hours of luminance and any hoods to be fixed to the lights. The external lighting shall be installed in complete accordance with the approved scheme and shall be retained as such thereafter.

Reason: In the interests of visual and neighbour amenity P3, G9 and DM1 of the Core Strategy, and the National Planning Policy Framework.

- 7 No part of the development shall be occupied until such time as the car parking, servicing and other vehicular access arrangements shown on the approved plans to serve the development hereby permitted have been made fully available for use. The arrangements shall be retained thereafter for their intended purpose.

Reason: In the interests of highway safety and the free flow of traffic and in accordance with Policies T2 and DM1 of the adopted Rochdale Core Strategy and the National Planning Policy Framework.

- 8 No goods, materials, waste products or containers shall be stored within any of the external service yards hereby approved.

Reason: In order to ensure a satisfactory appearance and in the interests of neighbor amenity in accordance with policies P3 and DM1 of the Core Strategy and the National Planning Policy Framework.

Procedure Statement:

The proposal complies with the development plan and would improve the economic, social and environmental conditions of the area. It therefore comprises sustainable development and the Local Planning Authority worked proactively to issue the decision without delay.

Date Decision Issued 8 June 2023

Daniela Ripa
Interim Head of Planning Services

IMPORTANT

PLEASE ENSURE THAT YOU HAVE READ AND FULLY UNDERSTOOD THE CONTENTS OF THIS DECISION NOTICE. YOUR ATTENTION IS DRAWN TO THE ATTACHED NOTES.

INFORMATIVE:

The Local Planning Authority's reasons for its decision are set out in the accompanying officer's report.

INFORMATIVE:

The applicant is reminded of the need to submit and obtain formal approval of those details required by the conditions of this planning permission before development may lawfully commence on the site. The formal discharge of a planning condition is currently subject to payment of an additional fee per request: £34.00 for householder applications and £116.00 in all other cases.

INFORMATIVE:

The proposed development lies within an area that has been defined by The Coal Authority as containing potential hazards arising from coal mining. These hazards can include: mine entries

(shafts and adits); shallow coal workings; geological fissures; mine gas and previous surface mining sites. Although such hazards are often not readily visible, they can often be present and problems can occur as a result of development taking place, or can occur at some time in the future.

It is recommended that information outlining how the former mining activities affect the proposed development, along with any mitigation measures required, be submitted alongside any subsequent application for Building Regulations approval.

Any intrusive activities which disturb or enter any coal seams, coal mine workings or coal mine entries (shafts and adits) requires the prior written permission of The Coal Authority. Such activities could include site investigation boreholes, digging of foundations, piling activities, other ground works and any subsequent treatment of coal mine workings and coal mine entries for ground stability purposes. Failure to obtain Coal Authority permission for such activities is trespass, with the potential for court action.

Property specific summary information on coal mining can be obtained from The Coal Authority's Property Search Service on 0845 762 6848 or at www.groundstability.com.
