Description of Proposed Works

Please describe the proposed works

The removal of an existing shed, to be replaced by a garden room measured 5920 wide x 5090 long. The internal floor space will measure 5660 x 4890, giving a floor area of 27.7 sq m. The maximum height of the garden room will be 2960, this includes a 150mm concrete base.

The positioning of the room is at the back left of the plot, in place of the existing shed. Behind this room is an existing garage/shed of a neighbouring property that is over 3100 high so the proposed building will be lower than this and not of any great visual impact.

The building will be placed approximately 400-500mm of the left and back fence line to allow access down the back and side, and around 800mm off the existing detached garage to allow access.

The building will be of a steel construction and clad in composite material. The roof will be a steel Kingspan design incorporating 80mm insulation. The steel frame will have 80mm insulation in between.

The building will be sited on a 150mm concrete base, which the cladding will over sail to cover.
