

Town and Country Planning Act 1990 (as amended)

PLANNING PERMISSION GRANTED

APPLICATION REFERENCE: 23/01153/FUL

Name and address for correspondence:	Applicant name:
Mr Rashid Mehmood I. Planning Services 2A Cook Street BURY BL9 0RP	Mr Naeem Shaukat

Part I - Particulars of Application

Date of 23 October 2023
Application:

Proposal:	Erection of a new block of three numbers of terraced dwellings - resubmission of 22/01531/FUL
Location:	17 Prospect Place, Heywood, Rochdale, OL10 4JQ

Part II - Particulars of decision

The Rochdale Borough Council hereby give notice in pursuance of the provisions of the Town and Country Planning Act 1990 (as amended) that planning permission has been **GRANTED SUBJECT TO CONDITIONS** for the carrying out of the development referred to in Part I above.

The Council hereby permits the above development in accordance with the details given on the application form and subject to the following condition(s):

Conditions and Reasons:

- 1 The development must be begun not later than three years beginning with the date of this permission.

Reason: Required to be imposed by Section 91 of the Town and Country Planning Act 1990 (as amended).

- 2 This permission relates to the following plans

Proposed Site Plan Ref IPS/R/17/OL104JQ REV D
Proposed Floor Plan IPS/R/17/OL104JQ REV D
Proposed Elevations IPS/R/17/OL104JQ REV D
Proposed Elevations Incl Boundary IPS/R/17/OL104JQ REV D

and the development shall be carried out in complete accordance with these drawings hereby approved unless otherwise required by the conditions below.

Reason: For the avoidance of doubt and to ensure a satisfactory standard of development in accordance with the policies contained within the adopted Rochdale Core Strategy, the saved Rochdale Unitary Development Plan and the National Planning Policy Framework.

- 3 Prior to the commencement of development, details of a sustainable surface water drainage scheme and a foul water drainage scheme shall be submitted to and approved in writing by the Local Planning Authority. United Utilities may request evidence that the drainage hierarchy has been fully investigated and why more sustainable options are not achievable before a surface water connection to the public sewer is acceptable.

The drainage scheme shall include:

- (i) A plan of surface water and foul drains from the new development and any connection to public sewer.
- (ii) The background calculations of the MicroDrainage® model or any other software or calculations that have been used for the drainage design.
- (iii) Construction details for permeable paving including sub-base details e.g. cross-section, if this type of paving forms part of the sustainable drainage system.
- (iv) Confirmation of any approvals required from United Utilities for connections.

The approved scheme shall also be in accordance with the Non-Statutory Technical Standards for Sustainable Drainage Systems (March 2015) or any subsequent replacement national standards. Prior to occupation/ use of the proposed development, the drainage scheme shall be completed in accordance with the approved details and retained thereafter for the lifetime of the development.

Reason: To promote sustainable development, secure proper drainage and to manage the risk of flooding and pollution. To prevent an increased risk of flooding as a result of the development and to ensure satisfactory disposal of surface water from the site in accordance with Policy G8 of the adopted Rochdale Core Strategy, saved Policy EM/7 of the adopted Rochdale Unitary Development Plan and the National Planning Policy Framework.

Reason for pre-commencement condition: Drainage infrastructure will need to be implemented prior to commencement of above ground works and a scheme therefore needs to be agreed in advance of the same

- 4 No development shall take place until an investigation and risk assessment (in addition to any assessment provided with the planning application) has been submitted to and approved in writing by the Local Planning Authority. The assessment shall investigate the nature and extent of any contamination on the site (whether or not it originates on the site). The assessment shall be undertaken by competent persons and a written report of the findings submitted to and approved in writing by the Local Planning Authority before any development takes place.

The submitted report shall include:

- i) a survey of the extent, scale and nature of contamination
- ii) an assessment of the potential risks to:
 - o human health,
 - o property (existing or proposed) including buildings, crops, livestock, pets, woodland, and service lines and pipes,
 - o adjoining land,
 - o groundwaters and surface waters,
 - o ecological systems,
 - o archaeological sites and ancient monuments;
- iii) where unacceptable risks are identified, an appraisal of remedial options and proposal of the preferred option(s) to form a remediation strategy for the site.

The development shall thereafter be carried out in full accordance with the duly approved remediation strategy and a verification report submitted to and approved in writing by the Local Planning Authority before any of the buildings hereby approved are first occupied.

Reason: To ensure the safe development of the site in the interests of the amenity of future occupiers in accordance with Policy G9 of the adopted Rochdale Core Strategy and the National Planning Policy Framework.

Reason for pre-commencement condition: Further investigation will be necessary prior to commencement of any building or engineering works on site.

- 5 No part of the development shall be occupied until details of the type, siting, design and materials to be used in the construction of boundaries have been submitted to and approved in writing by the Local Planning Authority and the approved structures have been erected in accordance with the approved details. The structures shall thereafter be retained.

Reason: In the interests of amenity and in compliance with policies P3 and DM1 of the adopted Rochdale Core Strategy and the National Planning Policy Framework.

- 6 Notwithstanding any description in the application, no above ground works shall take place until full product specifications for the windows, external doors, roof lights, and detailed designs of the window and door reveals, at a scale of not less than 1:50, to be used on the development hereby approved, have been submitted to and approved in writing by the Local Planning Authority. The windows and doors shall be installed in accordance with the approved details thereafter.

Reason: In the interests of visual amenity and in accordance with policies P3 and DM1 of the adopted Rochdale Core Strategy and the National Planning Policy Framework.

- 7 Notwithstanding any details submitted as part of the application, no part of the development shall be occupied until details of the type, siting, design and materials to be used in the construction of boundaries, screens or retaining walls have been submitted to and approved in writing by the Local Planning Authority and the approved structures have been erected in accordance with the approved details. The structures shall thereafter be retained.

Reason: In the interests of amenity and in compliance with policies P3 and DM1 of the adopted Rochdale Core Strategy and the National Planning Policy Framework.

Procedure Statement:

Date Decision Issued 1 May 2024

Head of Planning Services

IMPORTANT

PLEASE ENSURE THAT YOU HAVE READ AND FULLY UNDERSTOOD THE CONTENTS OF THIS DECISION NOTICE. YOUR ATTENTION IS DRAWN TO THE ATTACHED NOTES.

INFORMATIVE:

The Local Planning Authority's reasons for its decision are set out in the accompanying officer's report.

INFORMATIVE:

The applicant is reminded of the need to submit and obtain formal approval of those details required by the conditions of this planning permission before development may lawfully commence on the site. The formal discharge of a planning condition is currently subject to payment of an additional fee per request: £34.00 for householder applications and £116.00 in all other cases.

INFORMATIVE:

The proposed development lies within an area that has been defined by The Coal Authority as containing potential hazards arising from coal mining. These hazards can include: mine entries (shafts and adits); shallow coal workings; geological fissures; mine gas and previous surface mining sites. Although such hazards are often not readily visible, they can often be present and problems can occur as a result of development taking place, or can occur at some time in the future.

It is recommended that information outlining how the former mining activities affect the proposed development, along with any mitigation measures required, be submitted alongside any subsequent application for Building Regulations approval.

Any intrusive activities which disturb or enter any coal seams, coal mine workings or coal mine entries (shafts and adits) requires the prior written permission of The Coal Authority. Such activities could include site investigation boreholes, digging of foundations, piling activities, other ground works and any subsequent treatment of coal mine workings and coal mine entries for ground stability purposes. Failure to obtain Coal Authority permission for such activities is trespass, with the potential for court action.

Property specific summary information on coal mining can be obtained from The Coal Authority's Property Search Service on 0845 762 6848 or at www.groundstability.com.

INFORMATIVE:

The applicant is advised that the supply and delivery of refuse containers (including all wheelie bins and food waste caddies) for residential developments is chargeable and the responsibility for these charges rests with the applicant/developer. The cost is based on a variable rate per property depending on the property size and number of bedrooms but as an indication, the present charge for a suite of three 240l recycling bins and one 240l refuse bin is £144 per residence. Please contact environmental.management@rochdale.gov.uk for a quotation for your development.

The applicant is reminded that they are responsible for any damage caused to the local highway network, whether adopted or unadopted, through the construction phase of development. The applicant is advised to undertake a dilapidation survey of surrounding roads prior to the commencement of development to inform the works necessary to return the road to a state which is at least equivalent of that prior to works first taking place.
