

Town and Country Planning Act 1990 (as amended)

PLANNING PERMISSION GRANTED

APPLICATION REFERENCE: 24/01171/FUL

Name and address for correspondence:	Applicant name:
Jeff Smith 6th Floor, Parsonage Chambers Manchester M3 2HW	David Perkin

Part 1 - Particulars of Application

Date of Application: 10 January 2025

Proposal:	Erection of one detached dwelling with associated car parking and landscaping
Location:	Bentgate House , Newhey Road, Milnrow, Rochdale, OL16 4JY

Part 2 Compliance with Conditions

It is YOUR responsibility to comply with planning conditions. The Council's Planning Enforcement Team is responsible for investigating alleged breaches of planning control. This includes ensuring that all relevant conditions have been complied with. Effective enforcement is important to:

- Tackle breaches of planning control which would otherwise have unacceptable impact on the amenity of the area
- maintain the integrity of the decision-making process;
- help ensure that public acceptance of the decision-making process is maintained.

Whilst the majority of developers/homeowners do comply with the requirements of planning permissions, there are a number who do not. Where any planning conditions are breached, the Council can take formal enforcement action without further notice. Enforcement action could include such measures as requiring remedial works, cessation of use, or complete demolition and can cause the developer/homeowner unnecessary expense, delay and frustration. In some cases, failure to comply with planning conditions can lead to the loss of the planning permission.

Part 3 - Particulars of decision

The Rochdale Borough Council hereby give notice in pursuance of the provisions of the Town and Country Planning Act 1990 (as amended) that planning permission has been **GRANTED SUBJECT TO CONDITIONS** for the carrying out of the development referred to in Part I above.

The Council hereby permits the above development in accordance with the details given on the application form and subject to the following condition(s):

Conditions and Reasons:

- 1 The development must be begun not later than three years beginning with the date of this permission.

Reason: Required to be imposed by Section 91 of the Town and Country Planning Act 1990 (as amended).

- 2 This permission relates to the following plans and documents:

- o Location Plan Drawing No PL01 Rev A
- o Site Plans Drawing PL02 Rev A
- o Proposed Floor Plans Drawing No PL03 Rev B
- o Proposed Elevations Drawing PL04 Rev A
- o Site Sections Drawing PL05
- o Proposed Landscaping Plan Drawing PL06
- o Acoustic Planning Report Referenced 1308/APR1
- o Heritage Impact Assessment Referenced 078-C1-HIA V1
- o Design and Access Statement Referenced 078-C1-D&A V1
- o Preliminary Ecological Appraisal and Day Time Building Inspection Referenced P.2075.24
- o Biodiversity Impact Assessment Referenced P.2075.24 Rev A
- o Arboricultural Impact Assessment Referenced P.2075.24 Rev B
- o Site Investigation Desk Study With Walkover Survey Report No. 8044

and the development shall be carried out in accordance with these details hereby approved unless otherwise required by the conditions below.

Reason: For the avoidance of doubt and to ensure a satisfactory standard of development in accordance with the policies contained within the adopted Rochdale Core Strategy, the saved Rochdale Unitary Development Plan and the National Planning Policy Framework.

- 3 Prior to the commencement of development, details of a sustainable surface water drainage scheme and a foul water drainage scheme shall be submitted to and approved in writing by the Local Planning Authority. The drainage schemes must include:

- (i) An investigation of the hierarchy of drainage options in the National Planning Practice Guidance (or any subsequent amendment thereof). This investigation shall include evidence of an assessment of ground conditions and the potential for infiltration of surface water in accordance with BRE365;
- (ii) A restricted rate of discharge of surface water agreed with the local planning authority (if it is agreed that infiltration is discounted by the investigations);
- (iii) Levels of the proposed drainage systems including proposed ground and finished floor levels in AOD;
- (iv) Incorporate mitigation measures to manage the risk of sewer surcharge where applicable; and
- (v) Foul and surface water shall drain on separate systems.

The approved schemes shall also be in accordance with the Non-Statutory Technical Standards for Sustainable Drainage Systems (March 2015) or any subsequent replacement national standards.

Prior to occupation of the proposed development, the drainage schemes shall be completed in accordance with the approved details and retained thereafter for the lifetime of the development.

Reason: To promote sustainable development, secure proper drainage and to manage the risk of flooding and pollution.

Reason for pre-commencement condition: Drainage infrastructure will need to be implemented prior to commencement of above ground works and a scheme therefore needs to be agreed in advance of the same.

- 4 No above ground works shall commence until samples of all external facing and roofing materials (notwithstanding any details shown on previously submitted plans) have been submitted to and approved in writing by the Local Planning Authority. All works shall be undertaken strictly in accordance with the details as approved and retained as approved thereafter. For the avoidance of doubt, these details should relate to windows, doors, roof slates and all elevation materials.

Reason: In order to ensure use of appropriate materials which are sympathetic to the character of the building and the surrounding area in the interests of visual amenity and heritage and to comply with the requirements of Core Strategy Policies P1, P2 and P3 and the National Planning Policy Framework.

- 5 No development (including any demolition, site clearance or preparation works) shall take place until such time as a Tree Protection Plan and Arboricultural Method Statement has been submitted to and approved in writing by the Local Planning Authority.

Any measures identified within the Plan or Statement shall be installed in accordance with BS:5837:2012 'Trees in relation to design, demolition and construction' prior to any works taking place.

The necessary protection measures shall be retained throughout the construction phase of the development and no work, excavation, tipping, or stacking/storage of materials shall take place beyond such protective fencing during the construction period.

Reason: In order to protect the existing trees on the site in the interests of the amenities of the area and in accordance with Policies P3, G1, G6 and G7 of the adopted Rochdale Core Strategy Policies JP-P1, JP-G6 and JP-G7 of the adopted Places for Everyone Joint Development Plan and the National Planning Policy Framework.

Reason for pre-commencement condition: The trees must be protected before any works are carried out.

- 6 Notwithstanding what is already shown on Proposed Landscaping Plan PL06, no above ground works shall commence until a detailed soft landscaping scheme and full landscaping specification has been submitted to and agreed in writing by the Local Planning Authority. The scheme shall indicate the types and numbers of trees, plants and shrubs to be planted, their distribution and arrangement on the site and those areas to be seeded.

All proposed planting shall be carried out in accordance with the approved details within the first planting and seeding seasons following the completion of the development. Any trees, plants or shrubs which within a period of 5 years from the completion of the development die, are removed or become seriously damaged or diseased shall be replaced in the next planting season with others of similar size and species.

Reason: To ensure that the site is satisfactorily landscaped having regard to its location and the nature of the proposed development and in accordance with Policy G7 of the adopted Rochdale Core, Policies JP-P1 and JP-G2 of the Places for Everyone Plan and the NPPF.

- 7 Prior to first occupation of the development hereby approved, full details of the colour, form and texture of all hard landscaping (ground surfacing materials) (notwithstanding any such detail shown on previously submitted plans and specification) shall have been

submitted to and approved in writing by the Local Planning Authority. All works shall be undertaken strictly in accordance with the details as approved, and shall be completed in all respects before the final completion of the development and thereafter retained.

Reason: In order to ensure use of appropriate materials which are sympathetic to the character of the building and the surrounding area in the interests of visual amenity and heritage and to comply with the requirements of Core Strategy Policies P1, P2 and P3 and the National Planning Policy Framework.

- 8 No part of the development hereby permitted shall be occupied until a scheme of biodiversity enhancements has been submitted to and approved in writing by the Local Planning Authority. Such measure shall include, but not limited to, the provision of bird boxes, bird bricks, bat boxes and bat bricks to be integrated to the fabric of the buildings hereby approved, bug hotels, hibernaculum, wildflower seeding and hedgehog habitat (including provision of 'Hedgehog Highways') The duly approved scheme shall be implemented in full prior to final occupation of the phase of development to which the measures relate and retained thereafter.

Reason: In the interests of enhancing biodiversity and habitat provision within the site in accordance with Policy G7 of the adopted Rochdale Core Strategy, Policy JP-G8 of the adopted Places for Everyone Joint Development Plan and the National Planning Policy Framework.

- 9 Prior to the commencement of any earthworks or vegetation clearance, a method statement detailing eradication or avoidance measures for invasive species identified on site by the submitted Preliminary Ecological Appraisal and Day Time Building Inspection Report Referenced P.2075.24 should be supplied to and agreed in writing to the Local Planning Authority. The method statement shall include measures to prevent the spread of invasive non-native (alien) species of plant during any operations such as mowing, strimming or soil movement, and measures to ensure that any soils brought to the site are free of the seeds/roots/stems of any invasive plant covered under the Wildlife and Countryside Act 1981. Development shall be carried out in accordance with the approved method statement.

Reason: In accordance with policy G7 of the adopted Rochdale Core Strategy and Policy JP-G8 of the adopted Places for Everyone Joint Development Plan and to ensure the satisfactory treatment and disposal of invasive plant species which, under the terms of the Wildlife & Countryside Act 1981 (as amended) it is an offence to be caused to be spread in the wild.

Reason for Pre-commencement Condition: Construction/clearance works on site have the potential to cause the further spread invasive species, which therefore need to be managed sensitively prior to works starting on site.

- 10 No development shall take place (including any site clearance, demolition or preparation works) until a reasonable avoidance measures statement for hedgehogs has been submitted to and approved in writing by the Local Planning Authority. The development shall be carried out in accordance with the approved statement thereafter.

Reason: In order to minimise potential risk to protected species and in accordance with Policy G7 of the adopted Rochdale Core Strategy, Policy JP-G8 of the adopted Places for Everyone Joint Development Plan and the National Planning Policy Framework.

Reason for pre-commencement condition: Site clearance poses a potential threat to hedgehogs which are protected under the Wildlife and Countryside Act 1981 and protective measures must therefore be agreed in advance.

- 11 The proposed development must be constructed in line with the requirements of the submitted and approved Acoustic Report Referenced 1308/APR1 dated 31 October 2024 to achieve the following internal noise levels:

- o 35 dB(A) Leq (16 hour) in the bedrooms with windows shut and other means of ventilation provided between 7 am and 11pm;
- o 30dB(A) Leq 8 hour in the bedrooms with windows shut and other means of ventilation provided between 11pm and 7am;
- o 35 dB(A) Leq (16 hour) in the living room/s with windows shut and other means of ventilation provided between 7 am and 11pm;
- o 40dB(A) Leq (16 hour) in other habitable rooms with windows shut and other means of ventilation provided at all times.

Upon completion and prior to occupation of the development hereby permitted, validation testing must be carried out to ensure the required noise levels have been achieved, the details of which shall be submitted to and approved in writing by the LPA prior to first occupation of the apartment hereby approved.

Reason: To protect the amenity of future occupiers in accordance with Policy G9 of the Rochdale Core Strategy.

- 12 A watching brief for contamination shall be maintained when carrying out the approved development. If contamination is not suspected, found or caused during development, a completion letter to confirm the absence of contamination shall be submitted to and approved in writing of the Local Planning Authority prior to the first use or occupation of the approved development.

In the event that contamination is found at any time when carrying out the approved development that was not previously identified it must be reported in writing immediately to the Local Planning Authority. An investigation and risk assessment must be undertaken and where remediation is necessary a remediation scheme must be prepared, which shall be submitted to and approved in writing by the Local Planning Authority.

Reason: To ensure the safe development of the site in the interests of the amenity of future occupiers in accordance with Policy G9 of the adopted Rochdale Core Strategy, Policy JP-S1 of the adopted Places for Everyone Joint Development Plan and the National Planning Policy Framework.

BIODIVERSITY NET GAIN

The effect of paragraph 13 of Schedule 7A to the Town and Country Planning Act 1990 is that planning permission granted for development of land in England is deemed to have been granted subject to the condition (biodiversity gain condition) that development may not begin unless:

- a) A Biodiversity Gain Plan has been submitted to the planning authority,
- and;
- b) The planning authority has approved the plan.

The planning authority, for the purposes of determining whether to approve a Biodiversity Gain Plan, if one is required in respect of this permission would be Rochdale Borough Council.

Based on the information available this permission is considered to be one which will require the approval of a biodiversity gain plan before development is begun because none of the statutory exemptions or transitional arrangements are considered to apply.

For the purposes of paragraph 13 of Schedule 7A to the Town and Country Planning Act 1990, a biodiversity gain plan is a plan which:

- (a) relates to development for which planning permission is granted, and;
- (b) specifies the matters referred to below:

The matters are:

- (a) information about the steps taken or to be taken to minimise the adverse effect of the development on the biodiversity of the onsite habitat and any other habitat;
- (b) the pre-development biodiversity value of the onsite habitat;
- (c) the post-development biodiversity value of the onsite habitat;
- (d) any registered offsite biodiversity gain allocated to the development and the biodiversity and the biodiversity value of that gain in relation to the development;
- (e) any biodiversity credits purchased for the development; and
- (f) any such other matters as the Secretary of State may by regulations specify.

Procedure Statement:

The proposal complies with the development plan and would improve the economic, social and environmental conditions of the area. It therefore comprises sustainable development and the Local Planning Authority worked proactively to issue the decision without delay.

Date Decision Issued 30 April 2025

Melanie Hale
Head of Planning Services

IMPORTANT

PLEASE ENSURE THAT YOU HAVE READ AND FULLY UNDERSTOOD THE CONTENTS OF THIS DECISION NOTICE. YOUR ATTENTION IS DRAWN TO THE ATTACHED NOTES.

INFORMATIVE:

The Local Planning Authority's reasons for its decision are set out in the accompanying officer's report.

INFORMATIVE:

The applicant is reminded of the need to submit and obtain formal approval of those details required by the conditions of this planning permission before development may lawfully commence on the site. The formal discharge of a planning condition is currently subject to payment of an additional fee per request: £43.00 for householder applications and £145.00 in all other cases.

INFORMATIVE:

The proposed development lies within an area that has been defined by the Mining Remediation Authority as containing coal mining features at surface or shallow depth. These features may include: mine entries (shafts and adits); shallow coal workings; geological features (fissures and break lines); mine gas and former surface mining sites. Although such features are seldom readily visible, they can often be present and problems can occur, particularly as a result of new development taking place.

Any form of development over or within the influencing distance of a mine entry can be dangerous and raises significant land stability and public safety risks. As a general precautionary principle, the Mining Remediation Authority considers that the building over or within the influencing distance of a mine entry should be avoided. In exceptional circumstance where this is unavoidable, expert advice must be sought to ensure a suitable engineering design which takes account of all relevant safety and environmental risk factors, including mine gas and mine-water. Your attention is drawn to the Mining Remediation Authority Policy in relation to new development and mine entries available at:

Building on or within the influencing distance of mine entries - GOV.UK

Any intrusive activities which disturb or enter any coal seams, coal mine workings or coal mine entries (shafts and adits) requires a Mining Remediation Authority Permit. Such activities could include site investigation boreholes, excavations for foundations, piling activities, other ground works and any subsequent treatment of coal mine workings and coal mine entries for ground stability purposes. Application forms for Mining Remediation Authority permission and further guidance can be obtained from The Mining Remediation Authority's website at:

www.gov.uk/get-a-permit-to-deal-with-a-coal-mine-on-your-property

What is a permit and how to get one? - GOV.UK (www.gov.uk) In areas where shallow coal seams are present caution should be taken when carrying out any on site burning or heat focused activities.

If any future development has the potential to encounter coal seams which require excavating, for example excavation of building foundations, service trenches, development platforms, earthworks, non-coal mineral operations, an Incidental Coal Agreement will be required. Further information regarding Incidental Coal Agreements can be found here -

<https://www.gov.uk/government/publications/incidental-coal-agreement/guidance-notes-for-applicants-for-incidental-coal-agreements>

If any coal mining features are unexpectedly encountered during development, this should be reported immediately to the Mining Remediation Authority on 0800 288 4242. Further information is available on the Mining Remediation Authority website at: Mining Remediation Authority - GOV.UK

INFORMATIVE:

The applicant is advised that the supply and delivery of refuse containers (including all wheelie bins and food waste caddies) for residential developments is chargeable and the responsibility for these charges rests with the applicant/developer. The cost is based on a variable rate per property depending on the property size and number of bedrooms but as an indication, the present charge for a suite of three 240l recycling bins and one 240l refuse bin is £144 per residence. Please contact environmental.management@rochdale.gov.uk for a quotation for your development.

INFORMATIVE:

Biodiversity Net Gain

Irreplaceable Habitat

If the onsite habitat includes irreplaceable habitat (within the meaning of the Biodiversity Gain Requirements (Irreplaceable Habitat) Regulations 2024) there are additional requirements for the content and approval of Biodiversity Gain Plans.

The Biodiversity Gain Plan must include, in addition to information about steps taken or to be taken to minimise any adverse effect of the development on the habitat, information on arrangements for compensation for any impact the development has on the biodiversity of the irreplaceable habitat.

The planning authority can only approve a Biodiversity Gain Plan if satisfied that the adverse effect of the development on the biodiversity of the irreplaceable habitat is minimised and appropriate arrangements have been made for the purpose of compensating for any impact which do not include the use of biodiversity credits.

The effect of section 73D of the Town and Country Planning Act 1990

If planning permission is granted on an application made under section 73 of the Town and Country Planning Act 1990 (application to develop land without compliance with conditions previously attached) and a Biodiversity Gain Plan was approved in relation to the previous planning permission ("the earlier Biodiversity Gain Plan") there are circumstances when the earlier Biodiversity Gain Plan is regarded as approved for the purpose of discharging the biodiversity gain condition subject to which the section 73 planning permission is granted.

Those circumstances are that the conditions subject to which the section 73 permission is granted:

- i. do not affect the post-development value of the onsite habitat as specified in the earlier Biodiversity Gain Plan, and,

ii. in the case of planning permission for a development where all or any part of the onsite habitat is irreplaceable habitat the conditions do not change the effect of the development on the biodiversity of that onsite habitat (including any arrangements made to compensate for any such effect) as specified in the earlier Biodiversity Gain Plan.
