

Town and Country Planning Act 1990 (as amended)

PLANNING PERMISSION GRANTED

APPLICATION REFERENCE: 25/00661/FUL

Name and address for correspondence:	Applicant name:
Mrs Mairead Stibbs Planning Prospects Ltd 4 MILL POOL NASH LANE BELBROUGHTON DY9 9AF	Indurent Management Ltd

Part 1 - Particulars of Application

Date of 9 July 2025
Application:

Proposal:	Primary substation including 2 switch rooms and 2 transformers, vehicular access, and associated infrastructure on land to the north of Mulberry Way and east of Unit M1
Location:	Land Within Heywood Distribution Park , Pilsworth Road, Heywood , Rochdale, ,

Part 2 Compliance with Conditions

It is YOUR responsibility to comply with planning conditions. The Council's Planning Enforcement Team is responsible for investigating alleged breaches of planning control. This includes ensuring that all relevant conditions have been complied with. Effective enforcement is important to:

- Tackle breaches of planning control which would otherwise have unacceptable impact on the amenity of the area
- maintain the integrity of the decision-making process;
- help ensure that public acceptance of the decision-making process is maintained.

Whilst the majority of developers/homeowners do comply with the requirements of planning permissions, there are a number who do not. Where any planning conditions are breached, the Council can take formal enforcement action without further notice. Enforcement action could include such measures as requiring remedial works, cessation of use, or complete demolition and can cause the developer/homeowner unnecessary expense, delay and frustration. In some cases, failure to comply with planning conditions can lead to the loss of the planning permission.

Part 3 - Particulars of decision

The Rochdale Borough Council hereby give notice in pursuance of the provisions of the Town and Country Planning Act 1990 (as amended) that planning permission has been **GRANTED SUBJECT TO CONDITIONS** for the carrying out of the development referred to in Part I above.

The Council hereby permits the above development in accordance with the details given on the application form and subject to the following condition(s):

Conditions and Reasons:

- 1 The development must be begun not later than three years beginning with the date of this permission.

Reason. Required to be imposed by Section 91 of the Town and Country Planning Act 1990 (as amended).

- 2 This permission relates to the following plans:

- Location Plan 0505 Rev P02
- Site Plan Proposed 250031_HYD-SMP-ZZ-00-DR-ME-CCP-003 Rev P02
- Substation Proposed Drainage - 30042-BGL-XX-XX-DR-C Rev 4
- Heywood Distribution Park Drainage Strategy
- Substation Roof Plan 250031_ HYD-SMP-ZZ-RF-DR-ME-CCP-005 Rev P02
- Substation Layout Plan 250031_HYD-SMP-ZZ-00-DR-ME-CCP-004 Rev P02
- Substation Site Elevations 250031_HYD-SMP-ZZ-ZZ-DR-ME-CCP-006 Rev P02
- Substation Axonometric View 250031_ HYD-SMP-ZZ-ZZ-DR-ME-CCP-007 Rev P02
- Revised Materials Schedule 250031_ HYD-SMP-ZZ-ZZ-SH-ME-CCP-030 Rev P02
- GA SITE BOUNDARY, LANDSCAPE & FENCING DETAILS - SHEET 1 OF 2 TO 250031_ HYD-SMP-ZZ-ZZ-DR-ME-CCP-012 Rev P02
- GA SITE BOUNDARY, LANDSCAPE & FENCING DETAILS - SHEET 2 OF 2 250031_ HYD-SMP-ZZ-ZZ-DR-ME-CCP-013 Rev P02

and the development shall be carried out in accordance with these drawings hereby approved.

Reason: For the avoidance of doubt and to ensure a satisfactory standard of development in accordance with the policies contained within the saved Rochdale Unitary Development Plan, the adopted Rochdale Core Strategy and the National Planning Policy Framework.

- 3 Prior to commencement of the development and where the site characterisation has identified unacceptable risks, a detailed remediation scheme, comprising report reference 07290-PJA-GR-RP-0002 (already submitted) and drawings showing the proposed gas ingress prevention measures to be installed which will bring the site to a condition suitable for the intended use by removing unacceptable risks to human health, buildings and other property have been submitted to and approved in writing by the Local Planning Authority.

The approved remediation scheme shall thereafter be fully implemented. There shall be no variation of the approved remediation scheme unless otherwise approved in writing by the Local Planning Authority. Following completion of the measures identified in the approved remediation scheme and prior to the commencement of the permitted use/development, a verification report that demonstrates the effectiveness of the remediation carried out must be produced and submitted to and approved in writing by the Local Planning Authority.

In the event that contamination is found at any time when carrying out the approved development that was not previously identified it must be reported in writing immediately to the Local Planning Authority. An investigation and risk assessment must be undertaken and where remediation is necessary a remediation scheme must be prepared, which is subject to the approval in writing of the Local Planning Authority. Following completion of measures identified in the approved remediation scheme a validation report must be prepared which is subject to the approval in writing of the Local Planning Authority."

Reason: To ensure the safe development of the site in the interests of the amenity of future occupiers in accordance with Core Strategy Policy G9, saved UDP Policy EM/8, and the National Planning Policy Framework.

STATUTORY BIODIVERSITY NET GAIN

The effect of paragraph 13 of Schedule 7A to the Town and Country Planning Act 1990 is that planning permission granted for development of land in England is deemed to have been granted subject to the condition (biodiversity gain condition) that development may not begin unless:

- a) A Biodiversity Gain Plan has been submitted to the planning authority,
- and;
- b) The planning authority has approved the plan.

The planning authority, for the purposes of determining whether to approve a Biodiversity Gain Plan, if one is required in respect of this permission would be Rochdale Borough Council.

Based on the information available this permission is considered to be one which will require the approval of a biodiversity gain plan before development is begun because none of the statutory exemptions or transitional arrangements are considered to apply.

For the purposes of paragraph 13 of Schedule 7A to the Town and Country Planning Act 1990, a biodiversity gain plan is a plan which:

- (a) relates to development for which planning permission is granted, and;
- (b) specifies the matters referred to below:

The matters are:

- (a) information about the steps taken or to be taken to minimise the adverse effect of the development on the biodiversity of the onsite habitat and any other habitat;
- (b) the pre-development biodiversity value of the onsite habitat;
- (c) the post-development biodiversity value of the onsite habitat;
- (d) any registered offsite biodiversity gain allocated to the development and the biodiversity and the biodiversity value of that gain in relation to the development;
- (e) any biodiversity credits purchased for the development; and
- (f) any such other matters as the Secretary of State may by regulations specify.

Procedure Statement:

The Local Planning Authority worked proactively with the applicant to identify various solutions during the application process to ensure that the proposal comprised sustainable development and would improve the economic, social and environmental conditions of the area and would accord with the development plan. These were incorporated into the scheme and/or have been secured by planning condition.

Date Decision Issued 16 October 2025

Melanie Hale
Head of Planning Services

IMPORTANT

PLEASE ENSURE THAT YOU HAVE READ AND FULLY UNDERSTOOD THE CONTENTS OF THIS DECISION NOTICE. YOUR ATTENTION IS DRAWN TO THE ATTACHED NOTES.

INFORMATIVE:

The Local Planning Authority's reasons for its decision are set out in the accompanying officer's report.

INFORMATIVE:

The applicant is reminded of the need to submit and obtain formal approval of those details required by the conditions of this planning permission before development may lawfully commence on the site. The formal discharge of a planning condition is currently subject to payment of an additional fee per request: [Fees for Planning Applications in England](#)

INFORMATIVE:

The proposed development lies within an area that has been defined by the Mining Remediation Authority as containing coal mining features at surface or shallow depth. These features may include: mine entries (shafts and adits); shallow coal workings; geological features (fissures and break lines); mine gas and former surface mining sites. Although such features are seldom readily visible, they can often be present and problems can occur, particularly as a result of new development taking place.

Any form of development over or within the influencing distance of a mine entry can be dangerous and raises significant land stability and public safety risks. As a general precautionary principle, the Mining Remediation Authority considers that the building over or within the influencing distance of a mine entry should be avoided. In exceptional circumstance where this is unavoidable, expert advice must be sought to ensure a suitable engineering design which takes account of all relevant safety and environmental risk factors, including mine gas and mine-water. Your attention is drawn to the Mining Remediation Authority Policy in relation to new development and mine entries available at:

Building on or within the influencing distance of mine entries - GOV.UK

Any intrusive activities which disturb or enter any coal seams, coal mine workings or coal mine entries (shafts and adits) requires a Mining Remediation Authority Permit. Such activities could include site investigation boreholes, excavations for foundations, piling activities, other ground works and any subsequent treatment of coal mine workings and coal mine entries for ground stability purposes. Application forms for Mining Remediation Authority permission and further guidance can be obtained from The Mining Remediation Authority's website at:

www.gov.uk/get-a-permit-to-deal-with-a-coal-mine-on-your-property

What is a permit and how to get one? - GOV.UK (www.gov.uk) In areas where shallow coal seams are present caution should be taken when carrying out any on site burning or heat focused activities.

If any future development has the potential to encounter coal seams which require excavating, for example excavation of building foundations, service trenches, development platforms, earthworks, non-coal mineral operations, an Incidental Coal Agreement will be required. Further information regarding Incidental Coal Agreements can be found here -

<https://www.gov.uk/government/publications/incidental-coal-agreement/guidance-notes-for-applicants-for-incidental-coal-agreements>

If any coal mining features are unexpectedly encountered during development, this should be reported immediately to the Mining Remediation Authority on 0800 288 4242. Further information is available on the Mining Remediation Authority website at: Mining Remediation Authority - GOV.UK

INFORMATIVE:

The applicant is advised that the supply and delivery of refuse containers (including all wheelie bins and food waste caddies) for residential developments is chargeable and the responsibility for these charges rests with the applicant/developer. The cost is based on a variable rate per property depending on the property size and number of bedrooms. Please contact environmental.management@rochdale.gov.uk for a quotation for your development.
