Proposed Demolition Works

Please describe the building(s) to be demolished

The application seeks demolition of two buildings. The first and largest of these is a detached roadside building shown on the submitted location plan. This comprises of a large flat roof storey structure constructed from facing brickwork under a ply and felt roof. Attached to the rear and running at right angles to the main building is a large gabled single storey extension constructed from a brick plinth with vertical asbestos sheeting above and an asbestos sheeted roof. A small flat roof brick and ply/felt extension is located on the western side of the above building. The roadside elevation contains a number of uPVC windows at ground and first floor level and a roller shutter door.

The second smaller building which is proposed for demolition is a relatively modern detached structure which sits behind the roadside building has been constructed from sectional composite panels to the walls and a box profile tin roof. A pedestrian door is located within the western gable of the building with two uPVC windows at first floor level and a roller shutter door is located in the southern elevation close to the south eastern corner of the building.

Please state the reasons why demolition needs to take place

The buildings are proposed for demolition as the company requires a larger yard area than currently provided to park and manoeuvre vehicles within the site.

Please describe the proposed method of demolition

The works will involve the safe removal and disposal of any identified asbestos containing materials. The brick frontage building will be demolished and removed from site. The smaller composite panel building will be carefully taken apart so it can be reused on one of the applicant's other sites.

1. Site immobilisation.
2. Asbestos removal.
