Details of the pre-application advice received

Given the existing use of the site and its land allocation within a mixed employment zone, it is considered that the principle of redeveloping the site with seven industrial units is acceptable. The proposed plans show that these would be of a fairly standard design comprising metal clad units which include coloured panels to give character and feature to the individual units as well as a contemporary appearance. These units are considered to be acceptable in terms of their general design and layout and it is considered that units of this type or similar would be supported. The principle of developing this site with an industrial development is considered to be acceptable. However there are concerns raised about the current layout and the provision of adequate serving and turning space is likely to necessitate a reduction in the proposed number of units.

I believe we have addressed the concerns by reducing the sizes of the units to accommodate more turning space for larger vehicles.

Authority Employee/Member

With respect to the Authority, is the applicant and/or agent one of the following:

- (a) a member of staff
- (b) an elected member
- (c) related to a member of staff
- (d) related to an elected member

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
