

AMAZON ECO 2 CYCLE LOCKER

Space-Saving, Durable Cycle Storage with Bespoke Timber Finish Options

The Amazon Eco 2 Cycle Locker is a secure, space-saving bike storage solution with the ability to store two standard-sized bicycles. Built with a robust 3mm solid steel roof, heavy-duty framework, and double lockable swing gates, it ensures durability and user-friendly access. Fully clad in treated softwood as standard, or available with alternative timber cladding options, the locker blends seamlessly into residential, commercial and public settings. Whether specifying for a significant housing development or looking for a personal cycle store for the home, this locker is a great solution. Instead of stepping outside and seeing overflowing bicycles, you can store them away securely. The swing gates open wide enough, providing plenty of room to manoeuvre two cycles in and out. Choose a powder-coated finish offered in various RAL colours to personalise this locker to suit any project or environment.

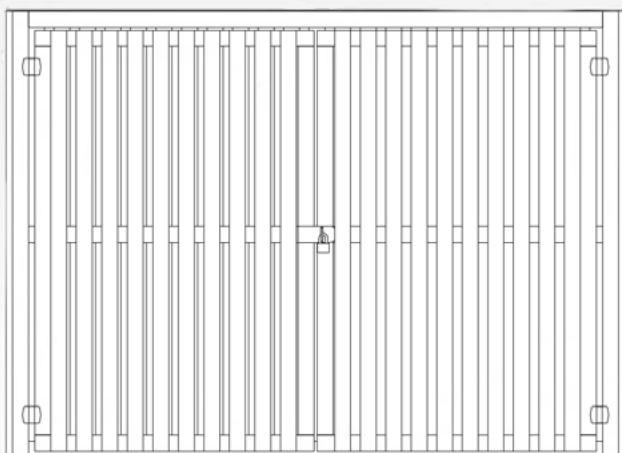

- › **Space-Efficient Design:** Stores two standard-sized bicycles in a compact footprint
- › **Durable Steel Roof:** 3mm solid steel ensures strength and weather protection
- › **Secure Access:** Double lockable swing gates with internal locking points
- › **Premium Timber Cladding:** Standard treated softwood, or optional 50 x 25mm battens
- › **Galvanised Framework:** Compliant with BS EN ISO 1461:2022 for long-lasting corrosion resistance
- › **Custom Finishes:** Optional powder-coated RAL colours for architectural alignment
- › **Flexible Locking Options:** Supports multiple access control solutions
- › **Made in Britain:** Independently tested and backed by a manufacturers warranty

PROJECT

Harrow Grange Farm

We partnered with Higgins Construction to deliver a bespoke bike and storage solution at Grange Farm, a residential development in Harrow, London. As part of their commitment to enhancing community infrastructure, Higgins required a durable, eco-friendly, and visually appealing solution for residents. Our team designed, manufactured, and installed custom Amazon Eco Cycle Lockers and Bin Stores, providing functional, secure spaces for both bicycles and waste storage. The project presented several challenges. The site required multiple storage units within a limited footprint while maintaining accessibility and aesthetic appeal. Security and durability were also essential, ensuring the lockers and bin stores could withstand outdoor conditions while keeping bicycles and waste safe. At the same time, the units needed to complement the residential environment, using sustainable materials that blend seamlessly into the surroundings. Our solution focused on bespoke Amazon Eco Cycle Lockers and Bin Stores, tailored to meet the project's functional, design, and environmental requirements. The cycle lockers, measuring 2,780mm W x 1,200mm H x 1,418mm D, feature a hot-dipped galvanised steel structure for superior rust protection and FSC-certified timber cladding for an eco-friendly aesthetic. Security was enhanced with front swing gates and hasp and staple locks, while the strengthened powder-coated Meta roof ensures long-term weather resistance.
