

THE BIKE STORAGE COMPANY

TWO TIER CYCLE RACK OPTIONS *EXPLAINED*

Individual Lower Level Channels

Individual Lower Channels provide a dedicated support for each bike placed on the lower level. There are 3 locking points on each channel, for complete peace of mind.

Rack are provided as standard with Sheffield Cycle Stands for the lower level.

EasyGrip Handles

Our EasyGrip handles act as a high-visibility safety deterrent and an attractive branding solution for the upper level of our Two Tier Cycle Racks. The powdercoated finish can be specified to any RAL colour and is standard red.

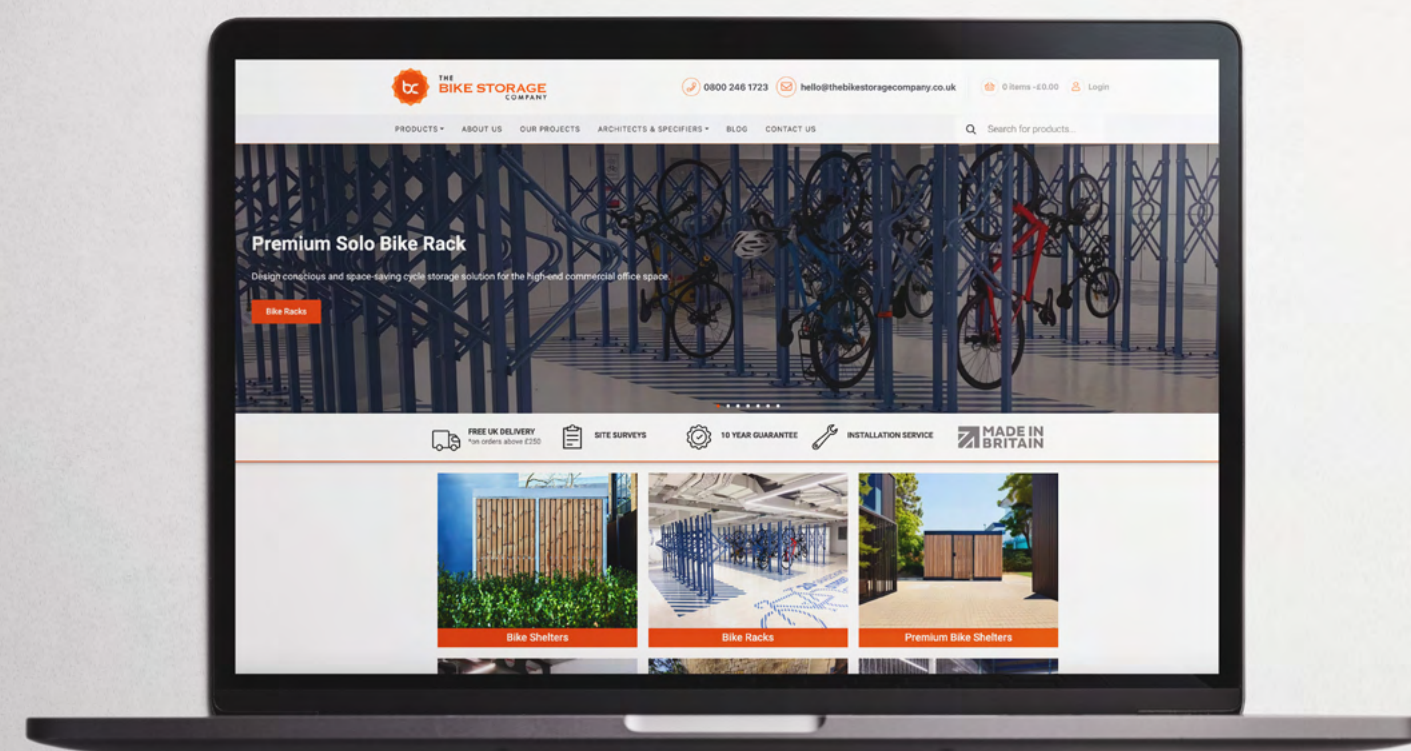

Rack is provided as standard with Hot Dipped Galvanised handles to BS EN ISO 1461:2022

Gas Assisted Two Tier

The addition of gas-assisting lifting for upper-level bikes is a popular option in both residential and commercial environments. Designed to reduce the lifting load incurred by the user when operating the upper level, this option is highly recommended by London Cycling Design Guide standards and local authority guidelines.

Polyester Powdercoated Framework

Powdercoated framework provide a uniform, smart finish to the structure of the Two Tier Cycle Racks. The Bike Channels or Sheffield Stands remain in Galvanised finish to ensure optimal durability and longevity. A selection of RAL colours is available to choose from to match your project colour scheme. For external use, we recommend a Galvanised & Powdercoated finish.
