- Non-Touch
- Updatable Daily Remotely and On Site
- Hanging Solution
- Commercial Grade

Double Sided Window Displays

Hanging Double-Sided Window Display

Built in media player

Very slim 22mm Profile

43" or 55"

700 cd/m2 Brightness on both sides

Ultra High Brightness Hanging Double-Sided Display

Built in media player

49" or 55"

3,500cd/m2 outward-facing screen to combat direct sunlight and a 1,000cd/m2 inward-facing screen

Window Displays:

IMPORTANT: All window displays should be mounted with the panel surface a minimum of 100mm from the inside of the window, however the manufacturer recommend a distance of 200mm to ensure sufficient air circulation between the display and the window.

Ideally a single power socket and ethernet sockets can be fitted into the ceiling space out of view

The ceiling brackets or fixing points could be shipped to the hub contractor during build and installed during commissioning to minimise disruption and potential damage to the screen the screens. The ceiling mount information is provide on the next few pages.

Double Sided Window Displays

This screen has hanging hooks built into the top of the unit as shown. It is supplied with wire cable so the height is very adjustable.

The wire cable can be hidden in the supplied white plastic tubes along with the power & ethernet cables.

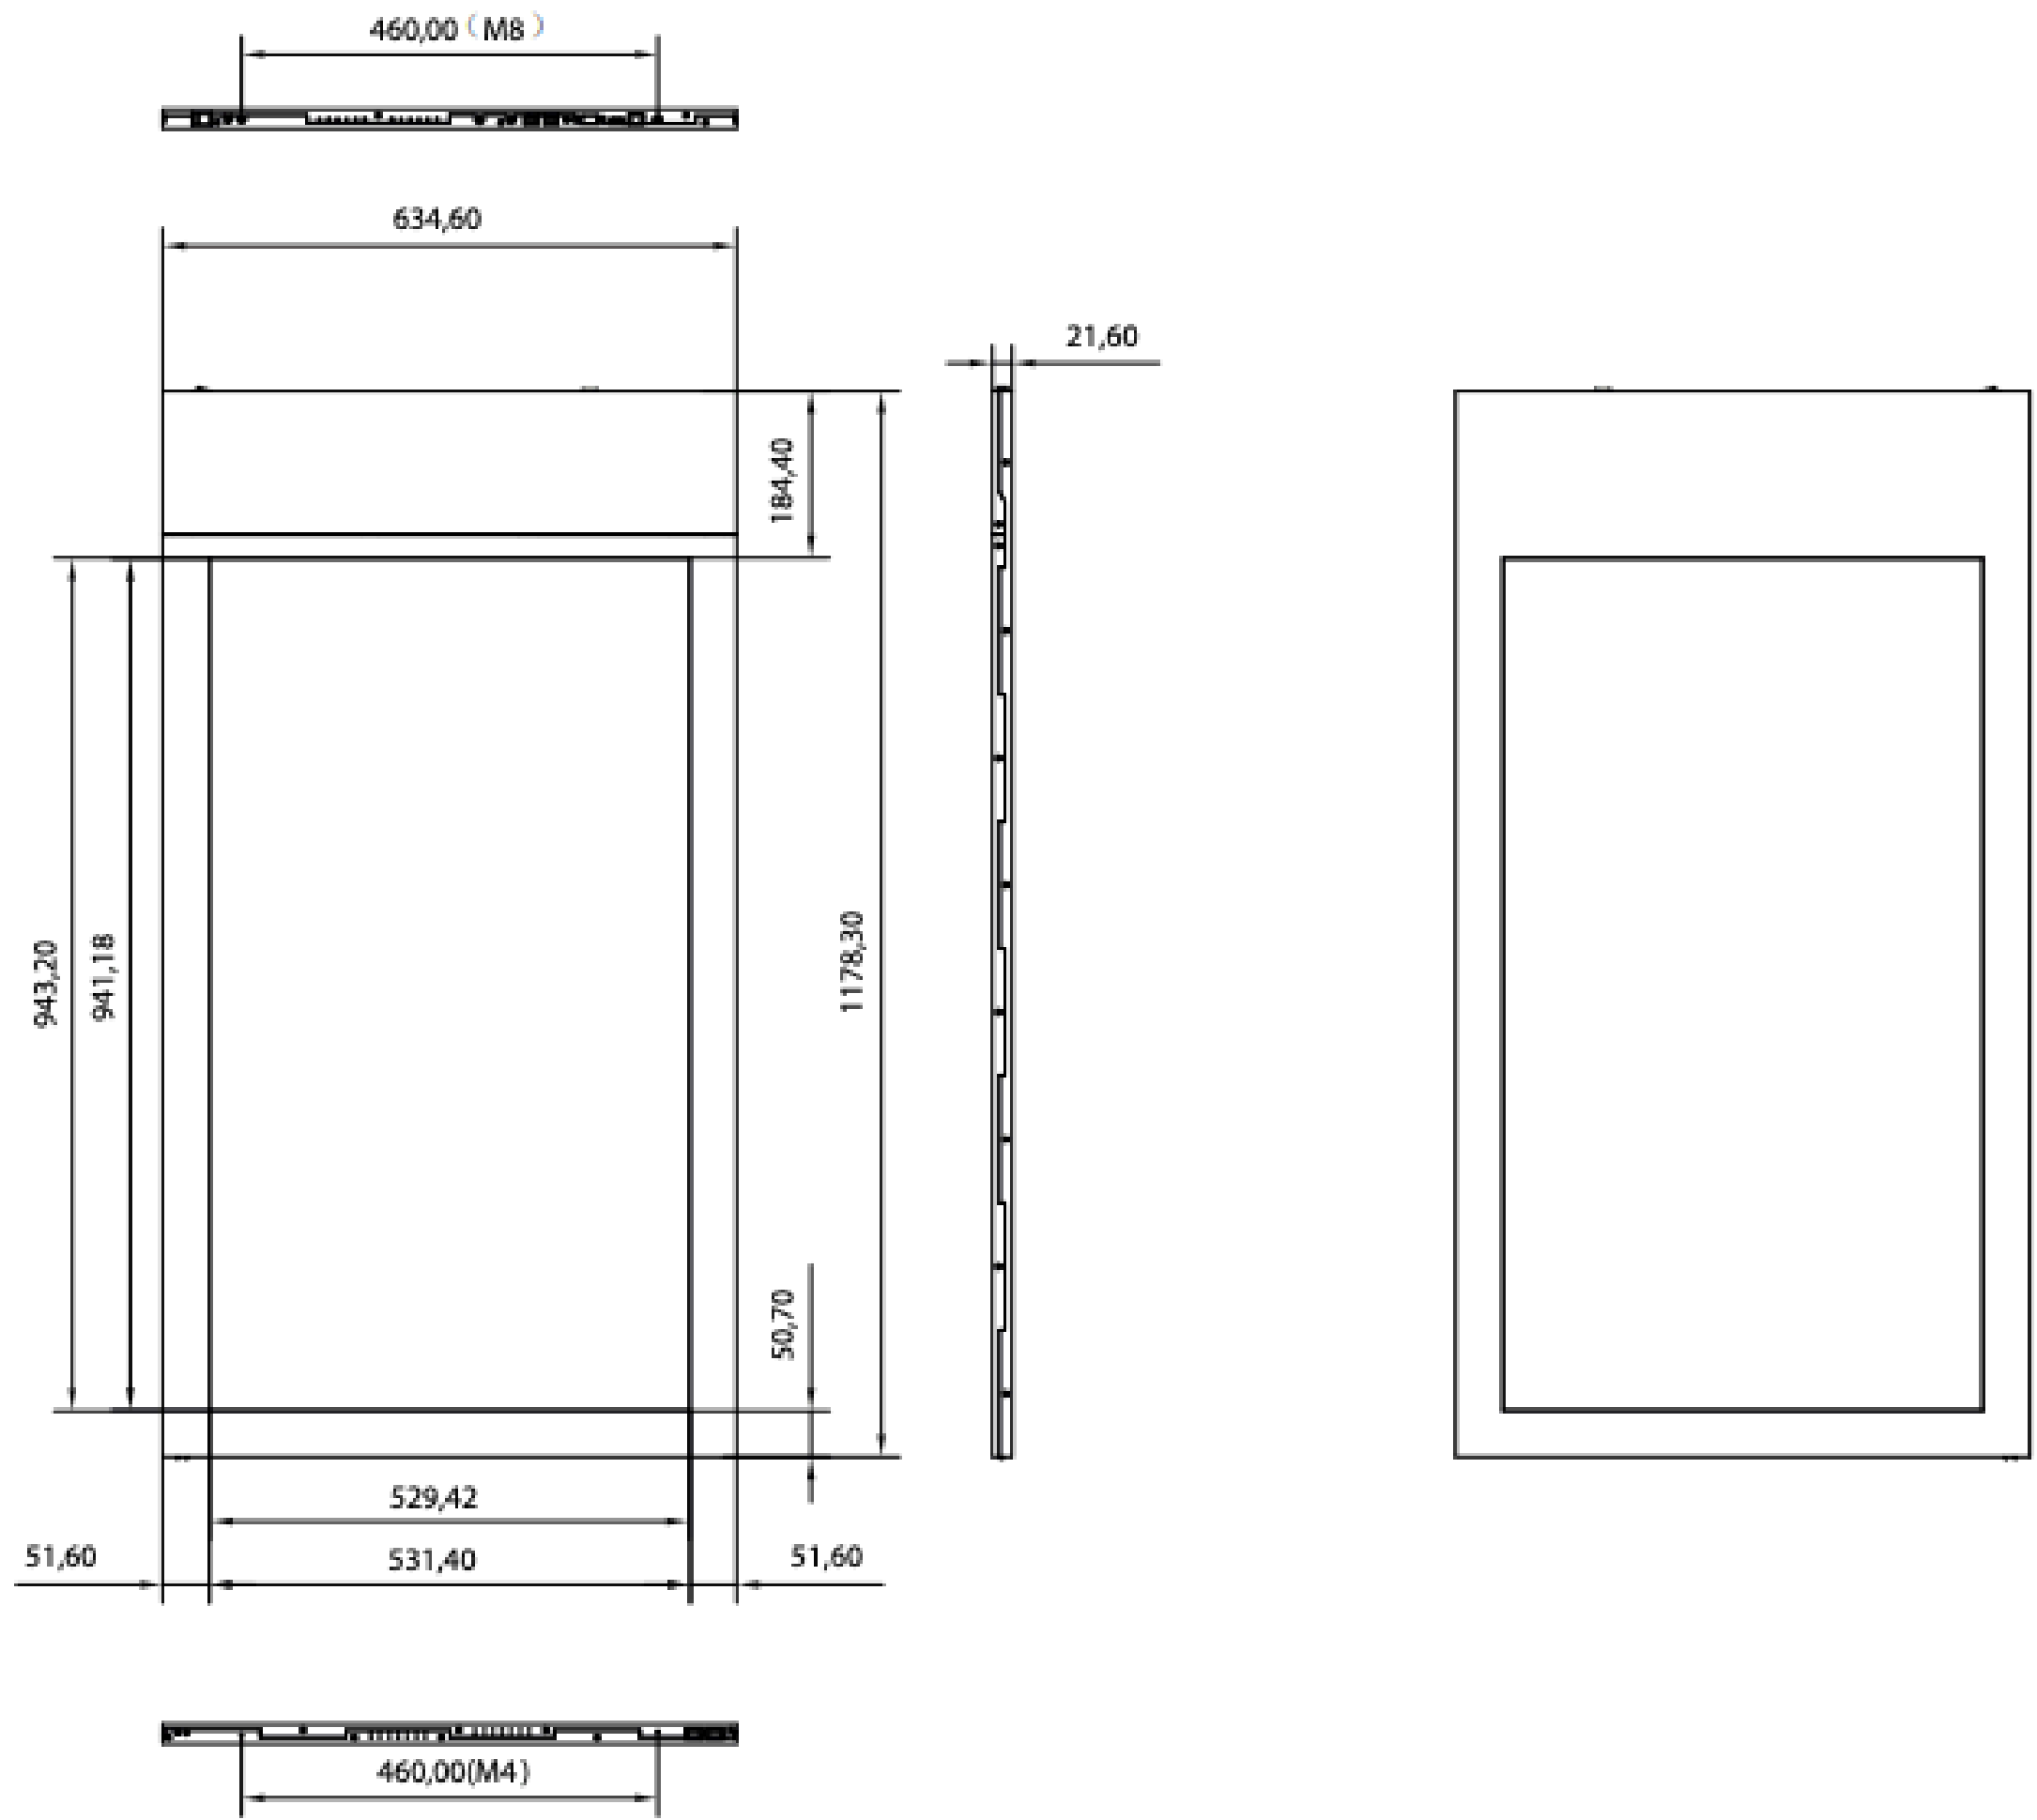

Two fixing chain plates or hooks could be installed in position with the power and network sockets above the ceiling tiles so the screen can be hooked on once the hub is ready to open.

43" Hanging Double-Sided Window Displays

Weight : 16.9kgs

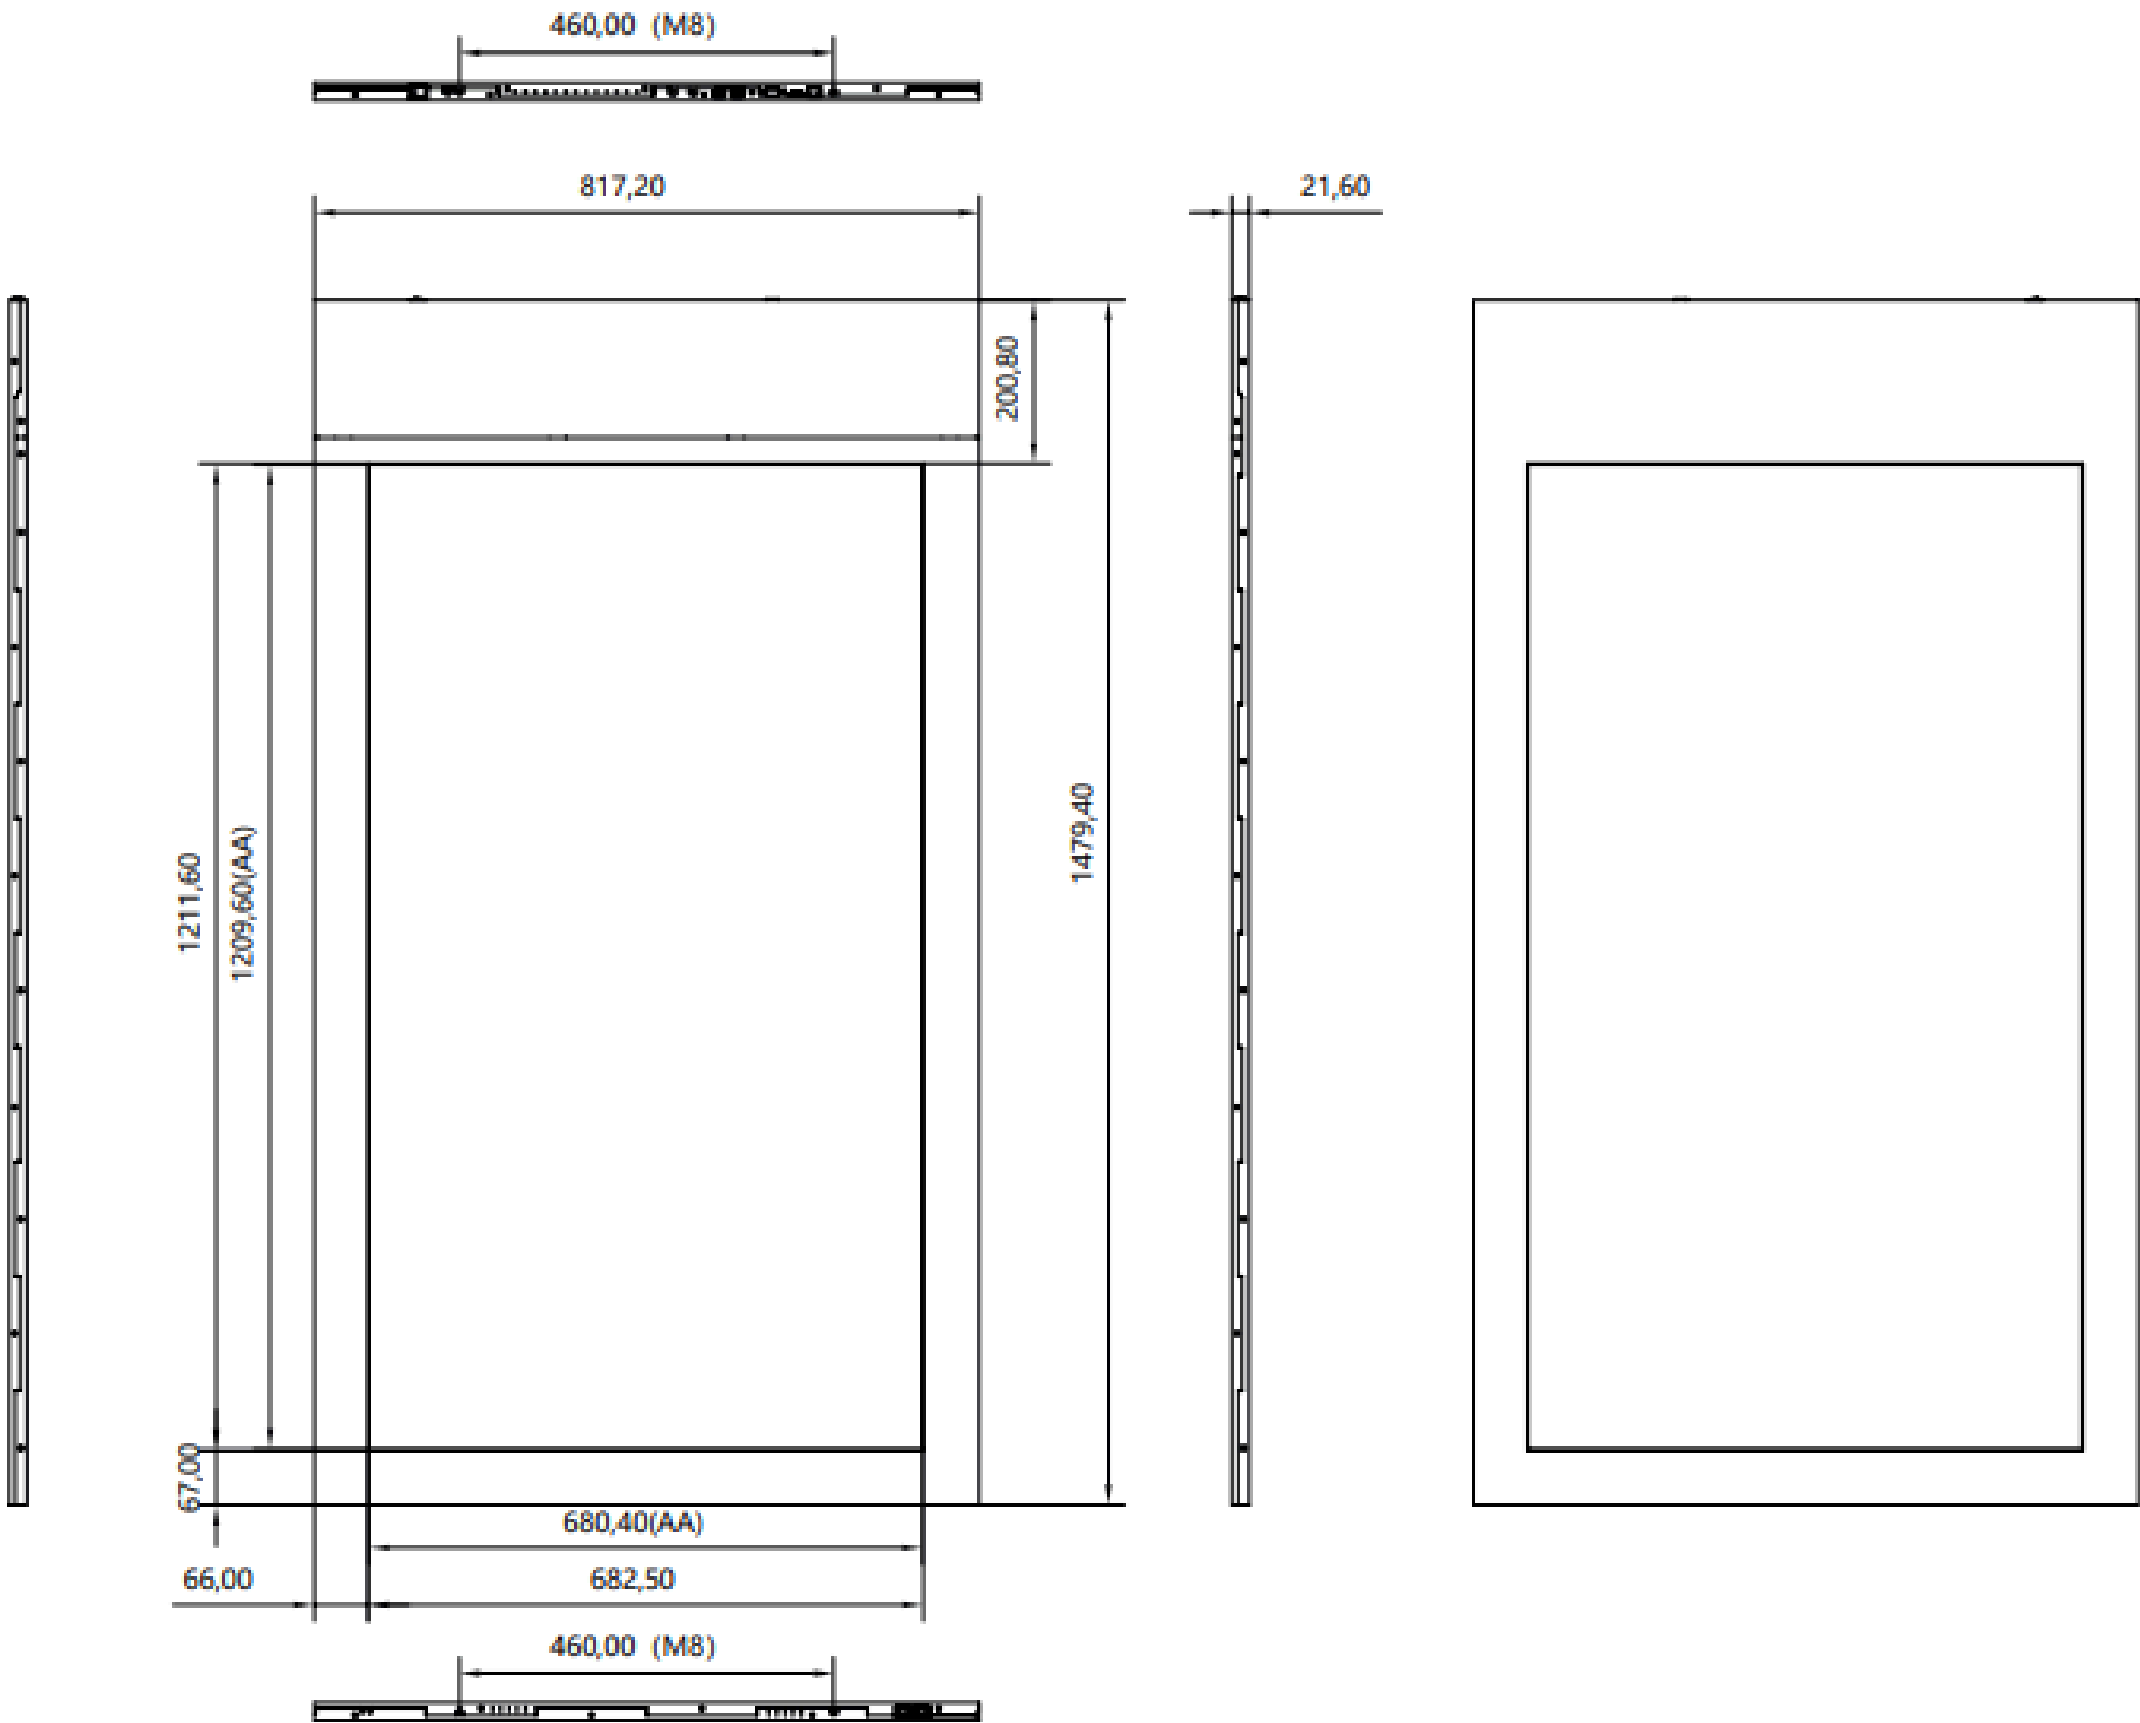

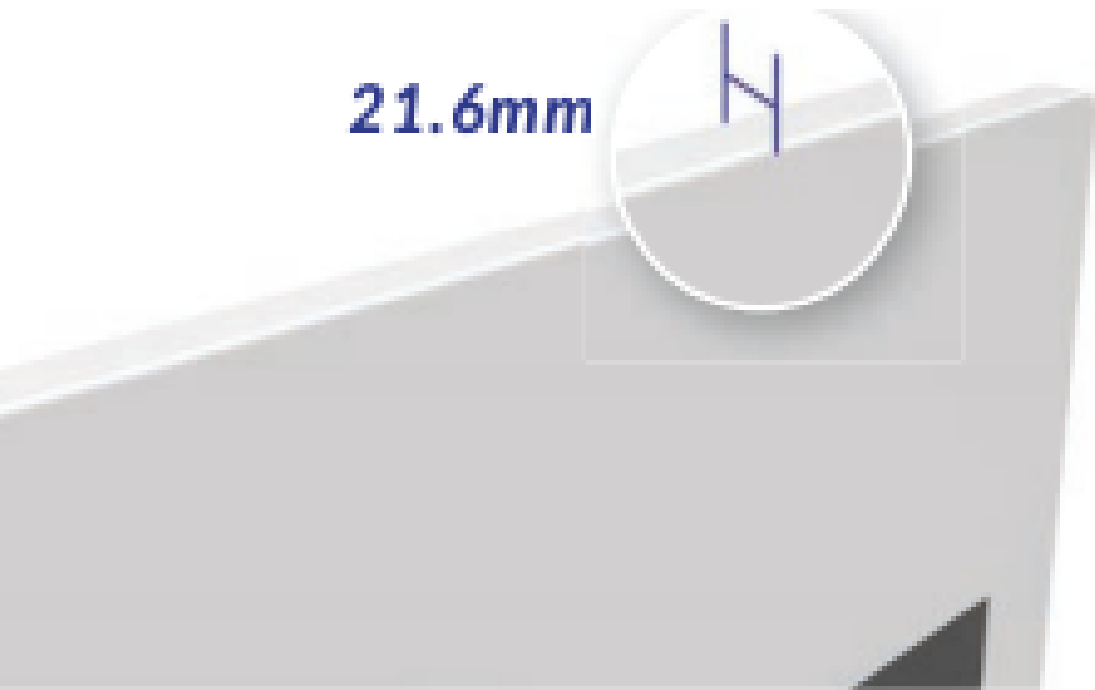

Size mm : 1178.3 x 634.6 x 21.6

55" Hanging Double-Sided Window Displays

Weight : 26.6 kgs

Size mm : 1479.4x817.2x21.6

Ultra High Brightness Hanging Double-Sided Display

The ceiling bracket as shown in the picture (finished in black not white) can be fitted with the arms during the construction of the hub. The power and ethernet can be run down the arms ready for the screen.

There are 10 mounting holes on the ceiling bracket. The ceiling structure needs to be strong enough to hold the weight of the screen as shown below.

Prior to going live the screen itself can be installed and setup ready for use.

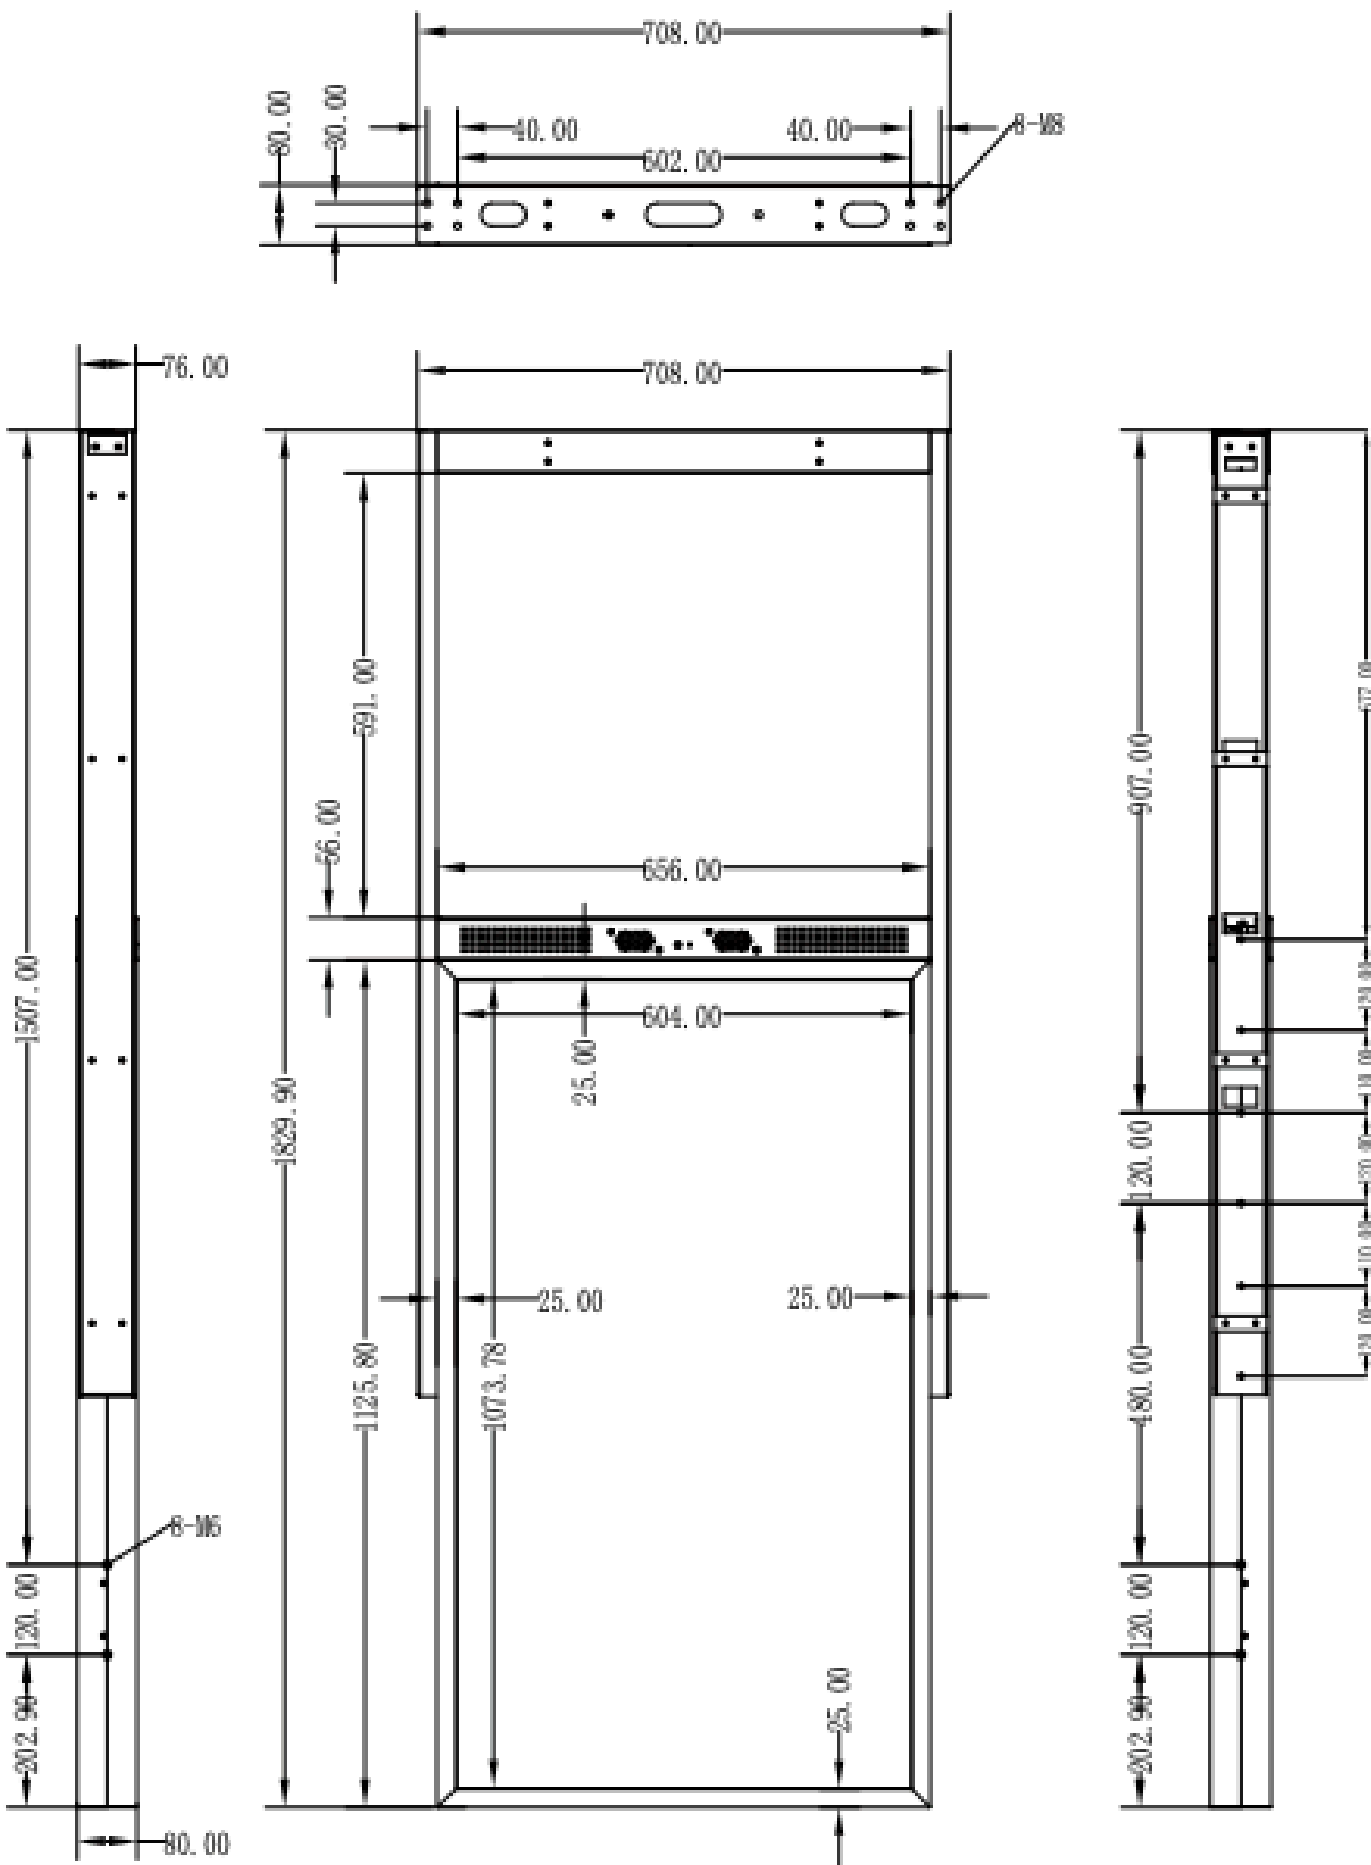

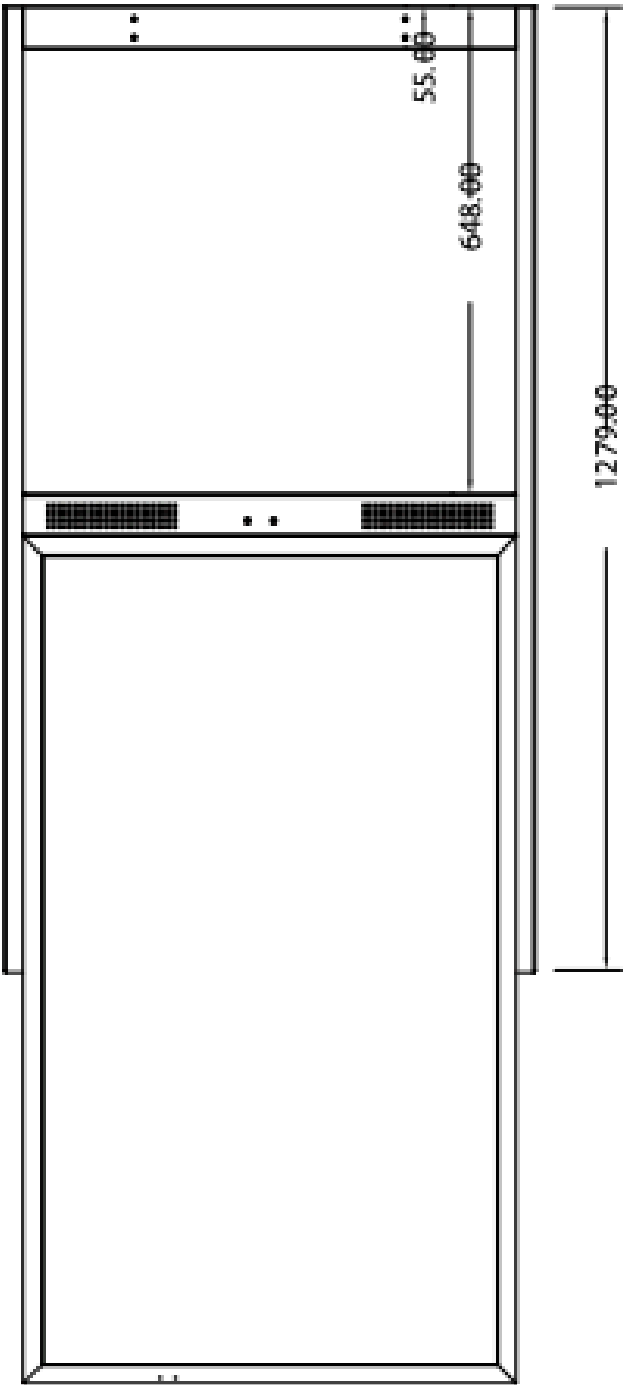

49" Ultra High Brightness Hanging Double-Sided Display

Weight (Screen and Mount) : 28.4KGS

Hanging Adjustable Range (mm): 1599.9 or 1829.9 or 2059.9

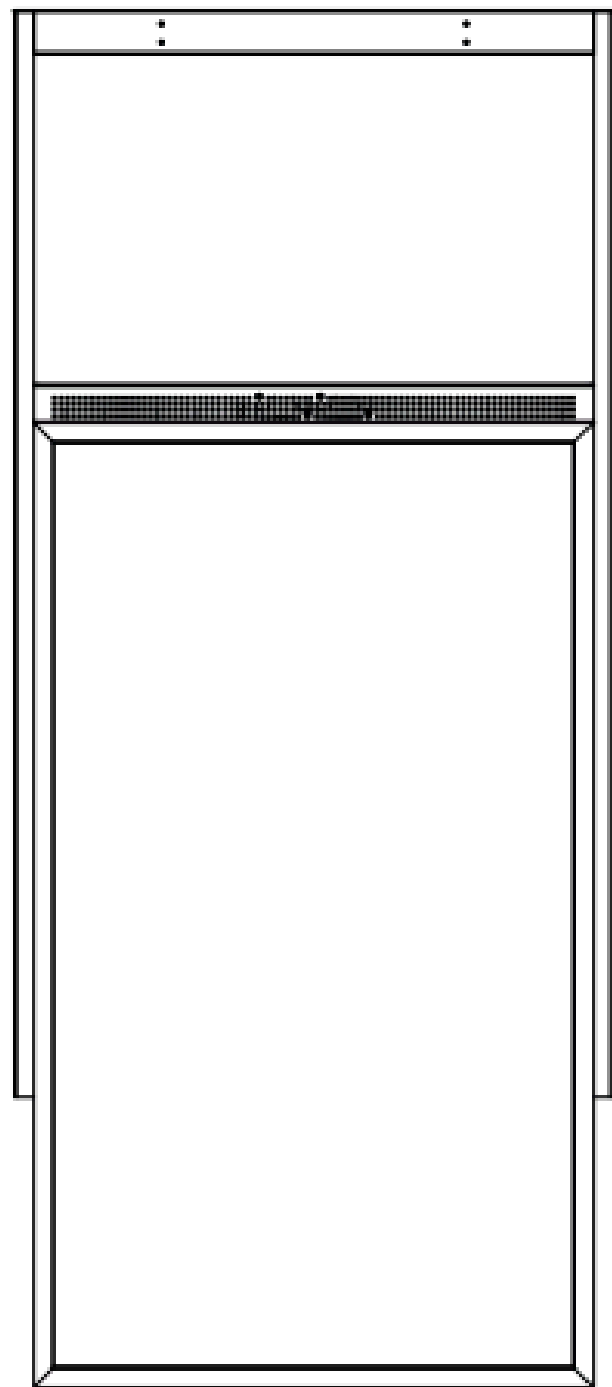

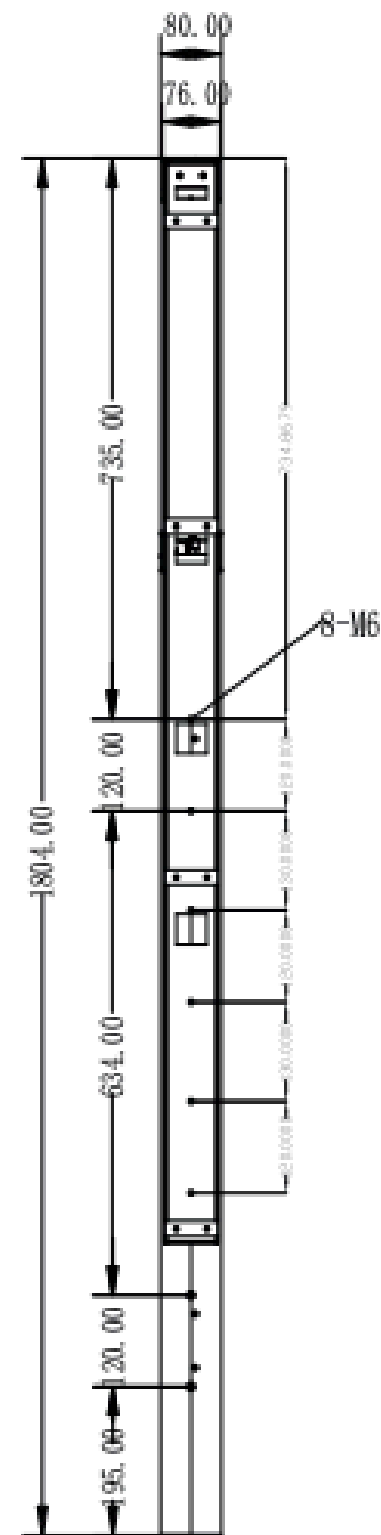

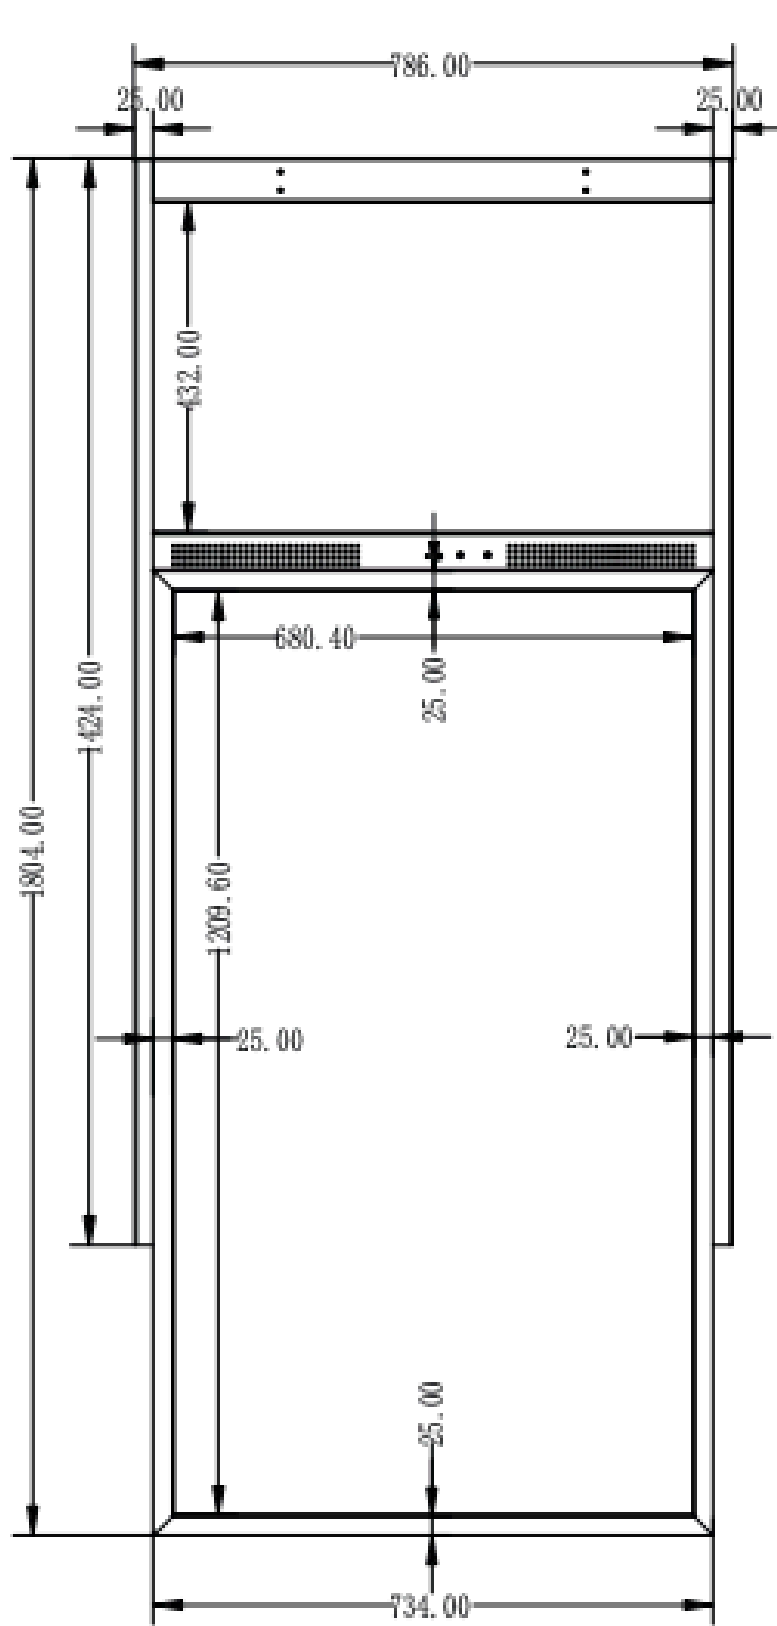

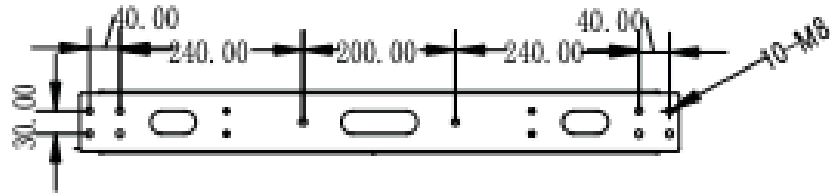

1599.9x708x80 (Shortest Mounting Range)

55" Ultra High Brightness Hanging Double-Sided Display

Weight (Screen and Mount): 48 KGS

Hanging Adjustable Range (mm): 1804 or 2054 or 2304
1804x786x80 (Shortest Mounting Range)

Warranty and Support

All LCD and DV-LED commercial display products come with a 3 year commercial warranty and lifetime technical support (phone and email) as standard. If a screen failed in the warranty period, a replacement unit would be sent straight to the install location so you can swap it over with the faulty unit. This will then be collected and returned to the technical team for investigation.

We also offer two warranty upgrades:

Extended Warranty - We can provide a quote to extend the standard warranty from 3 years to 5 years.

Enhanced Warranty - This hassle free upgrade includes a De-Install / Re-Install service for a 3 year period across the UK.

About Us

We are an award winning product development company based in the South West of the UK. Since our launch in 2009 we have built up an extensive client base across the UK and internationally. We have completed many digital signage installations across the UK.

Our highly experienced in-house team specialise in product design, hardware, software, apps and websites. We are a leading partner and reseller of Allsee Technologies one of the world's biggest and most established manufacturers dedicated to the commercial display and Digital Signage market.

Once your hardware is up and running our technical support engineers will provide the best possible customer experience during the lifetime of your product.
