Product Details

Please click [here](#) to find our manufacturers care and decoration advice for this door.

Door and frame may be delivered from two separate suppliers.

Allow yourself the flexibility to fit the hinges to the left or the right, you decide when installing.

The oak style door and frame is shown without decoration. The oak frame is solid engineered wood red hardwood veneer, the door has an engineered core construction for greater strength and stability, with its sharp look it is a stunning looking door ideal for front and rear entrances. Frame and door finish might differ.

Kit Components: This Oak door and frame set is sold in kit form, the door is fitted with the glass as shown (if any), the main frame is in kit form ready to construct.

Sizes: There is various door sizes to choose from as above with a frame to suit.

The overall frame height using the 1981mm door height is 2067mm high and 2118mm for the 2032mm high door, possible widths are 846mm wide for a 762mm door, 921mm for a 838mm door and 896mm for the 2032mm door, all without any clearances for the door or any other fittings.

Possible adjustments; The frame may need cut to suit each door height and any Bry Dry or Cdx type draught excluder which would sit on top of the sill and between the door to provide the required draught proofing, discard any spare timber mullions that are not required.

All door stops are supplied and if you're not fitting side inset units but are fitting glazing to the sides you will need to source beading to suit this option.

Frequently asked questions

Why am I unable to choose optional add-ons?

Please select your door first. Once you have chosen your door, you will then be able to add any optional extras you would like.

No, we are a supply-only company and do not offer a fitting service.

That said, we are experts in our field and are always happy to help with any questions you may have. We can advise on product care, fitting, hinges, locks, frames, and all other aspects of installation.
