Non-designated Heritage Assets (NDHA): 0-5km

NDHA within the 5km Study Area have been identified from both RMBC and RBC as well as other surrounding local planning authority areas, as listed in the following sources:

- RMBC website which provides details of locally listed assets;
- RBC website which provides details of a draft local list of non-designated heritage assets;
- Bury Council website which provides details of the Council's draft local list;
- GMAAS HER (which covers the RMBC and Bury area);
- Lancashire County Council HER (which covers the RBC area); and
- West Yorkshire Archaeological Advisory Service HER (which covers the Calderdale area).

There are a large number of NDHA within areas with no predicted visibility of the Project for Assessment, and where therefore impacts upon the setting or heritage significance of heritage assets are predicted. The list of assets with no predicted visibility was derived from analysis in QGIS. The RBC and Bury Local Lists have not been mapped and are only available in list form, with addresses available on their website. As such, these lists were subject to manual review.

Appendix 12.3 Designated heritage assets within the 15km study area, and non-designated heritage assets within the 5km study area situated within urban areas.

Non-designated Heritage Assets: 0-5km

NDHA within the 5km Study Area have been identified from sources outlined in Appendix 12.1.

There are large groups of NDHA located within urban areas to the south of the Site. There would be only patchy visibility of the Project for Assessment from these areas, and the contained urban setting of heritage assets located within these areas is such that the Site does not contribute to their heritage significance. The list of assets situated within urban areas was derived from analysis in QGIS. The RBC and Bury Local Lists have not been mapped and are only available in list form, with addresses available on their website. As such, these lists were subject to manual review.

Appendix 12.4 Designated heritage assets within the 15km study area, and non-designated heritage assets within the 5km study area for which it is the immediate local setting or functional associations which make the greatest contribution to their heritage significance. The wider setting (including the Site) does not contribute or makes a limited contribution to their heritage significance.

Following the analysis as set out at Appendix 12.2 and 12.3, the remaining list of designated heritage assets within the 5-15km study area were further reviewed in order to assess the potential for significant impacts on their heritage significance due to change within their setting arising from the Project for Assessment. This further review was informed by understanding of the heritage significance of the assets, observations from site visits, and professional experience. In particular, it considered whether the type and heritage significance of a heritage asset was such that long distance views from, to or over the asset which include the Project for Assessment were likely to contribute to their setting and heritage significance, and had the potential to be significantly affected by the Project for Assessment. This analysis resulted in the 'scoping out' of all other designated heritage assets within the 5km - 15km study area. The below tables provide a full list of those heritage assets and non-designated heritage assets which have been 'scoped out' of the assessment for this reason.

Reasons for Exclusion:

- (a) Assets which are principally of heritage significance due to their historic function and/or age where setting makes little or no contribution
- (b) Assets where its heritage significance is primarily appreciated in closer views and/or away from the Site
- (c) Assets which are experienced within an enclosed landscape, confined streetscape or urban context where the relationship with the surrounding landscape makes no contribution to its heritage significance

- (d) Assets where setting is limited to historic relationships and intervisibility and/or proximity with related heritage assets, that do not include the Site
- (e) Assets where the views to the surrounding moorland landscape that contribute to the heritage significance of the asset are away from and/or do not include the Site
- (f) Assets situated within a localised rural context, where longer distance views to the surrounding moorland landscape do not contribute to its heritage significance

Non-designated Heritage Assets: 0-5km

NDHA within the 5km Study Area have been identified from sources outlined in Appendix 12.1.

There are large number of NDHA which are of heritage significance due to their historic function, their longevity as features of a localised area of townscape or landscape, or due to their association with other proximate heritage assets. It is only the immediate local setting which makes any contribution to the heritage significance of these heritage assets. The list of NDHA was subject to manual review.

Appendix 12.5 Other Designated and Non-Designated Heritage Assets within the 5km study area where no potential for significant effects upon their heritage significance was identified.

The following assets have been scoped out of the ES as no potential for significant effects upon their heritage significance was identified either at the ES Scoping stage or subsequently.

These assets are assessed in the Heritage Assessment (Appendix 1) in order to address the statutory duties under sections 66(1) and 72(1) of the Planning (Listed Buildings and Conservation Areas) Act 1990 and the requirements of the NPPF.

NDHA within the 5km Study Area have been identified from sources outlined in Appendix 1.

Following the analysis as set out above, the remaining list of NDHA within the 5km study area were further reviewed in order to assess the potential for significant impacts on their heritage significance due to change within their setting arising from the Project for Assessment. This further review was informed by understanding of the heritage significance of the assets, observations from site visits, and professional experience.

The following NDHA are assessed in the Heritage Assessment, but have been excluded from the ES as no potential for significant effects upon their heritage significance was identified either at the ES Scoping stage or subsequently.
