

Appendix 12.7 Wireline Visualisations and Reference Photography

The following additional wireframes and associated reference photography have been repaired in response to requests from RMBC and RBC.

Appendix 12.7a contains a series of wireline visualisations, prepared by Stephenson Halliday. The wirelines have been prepared in line with the Landscape Institute's Technical Guidance Note 06/19, Visual Representation of Development Proposals and Visual Representation of Wind Farms: v2.2. Scottish Natural Heritage, February 2017. Appendix 11.2 sets out full details of the Visuals Methodology.

Appendix 12.7b contains reference photography taken from the same locations as the wireframe visualisations. These reference photographs provide contextual information only documenting above ground features including vegetation and buildings (which are not shown in the wireframe visualisations). The reference photography was taken using an iPhone 12 mini camera and is not verified photography. The images are presented either as single frame images or combined panoramas created using Adobe software. They are only intended to be used to aid understanding of the heritage context. To understand the extent and appearance of the proposed development, reference should be made to the accompanying wirelines in Appendix 12.7a.

WIRELINE DRAWING

Date June 2026	By DT		Notes: 1) This visualisation is a cylindrical projection panorama; it provides landscape and visual context only. 2) This data has been output directly from the wireline model; it ignores screening effects of woodland and other intervening objects. 3) All directions given as bearings relative to Grid North (BNG). 4) Location map scale: 1:50,000.
