

OTH/2026/0625 - Statement of Tree Works

Pioneers Tree Services, haven been round and helped me explain the correct wording what needs to be done so rather than getting him to do a statement to save time if its ok with you, I'm replying with his statement, this is what he said.

'The tree has had a crown reduction previously. This is what we want to apply to do again. I am recommending that a full crown reduction needs to be done'

He also agrees with the tree branches over hanging are becoming dangerous due to the severe winds we get at the back, the branches hanging over my children's play area on the trampoline and the gymnastics equipment. I just don't want one of them getting hurt.

Pioneer Tree Services have helped mark up the photos in red of where the tree needs to be reduced back to. We've put a curved red line and squiggled above the line what need to come off. The other photo with the red circle shows where it's been taken back to the crown previously.

I've marked up the map again for you with a black cross that is where the sycamore we want to do a full crown reduction on is located.
