Description

Please describe details of the proposed development or works including any change of use

Change of use from an existing four-bedroom dwellinghouse (use class 3) to a children's home (use class 2 residential institution). The home will provide a safe, stable and family style residential environment for up to 3 children/young people requiring care, supported by 1-2 sleep-in care staff who will be on site 24/7.

The home will continue to operate as a residential dwelling and no extensions, structural alterations or external changes to the building are proposed. The existing internal layout will remain substantially unchanged. Minor internal works will be limited to health and safety improvements, including fire safety measures, installation of appropriate alarms, emergency lighting where required and other works necessary to comply with relevant regulations. The existing driveway will continue to provide off-street parking for staff and visitors. The private rear garden will remain available for the enjoyment and recreation of the residents. The proposal will retain the property's residential character and appearance with no external changed to the property or the surrounding area. The home will be professionally managed with appropriately trained staff providing care and supervision in accordance with all relevant legislation.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:
Development site area of 0.2 hectares or below

Are there any priority habitats on or within 500m of your site?:
No

Can you evidence that you carried out a site assessment if the local authority disputes the presence of priority habitats?:
No

Please justify the reason why biodiversity net gain does not apply:
I have checked with the governments current list of priority habitats on 'Gov.uk' and my existing and proposed sites do not fall within any vicinity. I can confirm that the site is also located in a residential housing estate and in close proximity to a school and industrial estate.

Please read the help text for further information why developments may be exempt or not in scope.
